

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/Process
1	<p><b>[EU2020] Europe 2020 indicators</b>            Description: Maintain the set of Europe 2020 indicators and related metadata (ESMSIPs). Contribute to further development of the set of indicators. Prepare analyses and dissemination products for the main users. (ESMSIP=Euro SDMX Metadata Structure - Indicator Profile, SDMX=Statistical Data and Metadata Exchange).            Product(s): • [EU2020] Europe 2020 indicators.            Other output(s): • Publication of an analytical statistical book about progress towards Europe 2020 targets ('Smarter, greener, more inclusive?'). • Europe 2020 scoreboard (dedicated section).</p>	Process
2	<p><b>[457] Monitoring Own Resources GNI</b>            Description: Verification of Gross National Income (GNI) data with Member States and GNI Committee, replies to European Court of Auditors reports, support to DG BUDG.            Output(s): • Opinion of GNI Committee on the appropriateness of GNI data for use as an input into DG BUDG's Own Resources calculations.</p>	Process
2	<p><b>[458] Monitoring Own Resources VAT</b>            Description: Verification of Value added tax (VAT) data with Member States and DG BUDG, Support to DG BUDG.            Output(s): • Technical advice to DG BUDG on the use of VAT statistics for Own Resources purposes.</p>	Process
2	<p><b>[459] Support in National Accounts to Enlargement Countries</b>            Description: Advice to Enlargement Countries concerning their future legal obligations regarding National Accounts.            Output(s): • Advice to Enlargement Countries concerning their future legal obligations regarding National Accounts.</p>	Process
2	<p><b>[460] Remunerations of EU Staff</b>            Description: Calculation of the statistics needed for the annual and intermediate adaptation of EU officials' salaries and pensions, correction coefficients, mission allowances; Article 64/5 Working Group.            Output(s): • Annual adjustment of remuneration of EU officials and correction coefficients (intra-EU and extra-EU) - for Commission and other EU institutions, non-EU bodies; mission allowances. Annual report on remunerations and appendices.</p>	Process
2	<p><b>[461] Pension Scheme European Officials - assessment</b>            Description: Assessment of the Pension Scheme European Officials (PSEO) actuarial balance in accordance with Annex XII of the Staff Regulations; Article 83 Working Group.            Annual report on pensions and appendices.            Output(s): • Contribution rate of members of staff to the PSEO, coefficients for pension transfer.</p>	Process
2	<p><b>[462] Liabilities related to social benefit schemes of the personnel of the European Institutions</b>            Description: Calculation of liabilities related to social benefits of personnel of the European Institutions (Pension Scheme European Officials (PSEO) + Pension Scheme of Members of the EU Institutions (PSMI) + Pension Scheme of Members of the European Parliament (PSMEP) + Joint Sickness Insurance Scheme (JSIS).            Output(s): • Liabilities of PSEO, PSMI, PSMEP, JSIS.</p>	Process
2	<p><b>[487] Identifying, assessing and monitoring risks</b>            Description: Organisation of the annual country risk assessment in the framework of Excessive Deficit Procedure. Identifying, assessing and monitoring risks or problems from upstream data sources with a view to initiating corrective action at the earliest possible point (Early Warning System (EWS)).            Output(s): • Annual country risk assessment (confidential).</p>	Process
2	<p><b>[EDP] Verification of EDP statistics</b>            Description: Maintaining on-going direct contacts with Member States and selected candidate countries to ensure a preventive approach for the quality of statistics used for the Excessive Deficit Procedure (EDP), including dialogue visits, and where appropriate, methodological visits. Monitoring of the appropriateness, exhaustiveness and timeliness of the upstream public finance data by reference to European System of Accounts (ESA) requirements, within an Excessive Deficit Procedure, as part of the dialogue visits. Provide timely ex-ante and ex-post methodological advice.            Output(s): • Excessive Deficit Procedure (e.g. EDP notification tables + "Maastricht debt" + Financial crisis). Mission reports including conclusions and recommendations. Report to the Economic and Financial Committee.</p>	Process
2	<p><b>[EDPn] Validation of EDP notification</b>            Description: Verifying the quality of the bi-annual Excessive Deficit Procedure (EDP) notifications sent by Member States, preparing the bi-annual EDP press release, and associated documentation, and examining notifications of selected Candidate Countries.            Output(s): • Bi-annual EDP press release and associated documentation.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/Process
2	<p><b>[EPSAS] European Public Sector Accounting Standards</b>            Description: Harmonisation of public sector accounting standards under the accruals basis of accounting.            Output(s): • European Public Sector Accounting Standards (EPSAS).</p>	Process
2	<p><b>[Gov(IT)] IT for EDP and GFS statistical production</b>            Description: Contribute to continuity of administration, maintenance and technical support for applications and databases used in the EDP (Excessive deficit procedure) and GFS (Government statistics - Financial and non-Financial) related National Accounts statistical production. Continuous support for EDP/GFS related National Accounts Statistical Production Systems and data. Administration and developments related to FAME database domains in Unit D4 and technical support for Units D1 to D3.            Output(s): • Technical support for GFS related NA Statistical Production Systems. • Corrective and evolutionary maintenance for GFS related NA Statistical Production Systems.</p>	Process
2	<p><b>[Gov] Quarterly and Annual Government statistics - Financial and non-Financial Accounts for general government</b>            Description: Collection, validation and dissemination in Eurobase, in press releases and publications on government finance statistics, for example in Statistical Books and on Statistics Explained. Maintenance of Government Finance Statistics (GFS) web site. Improvement of the quality of GFS data transmitted by Member States. Presentation of regular progress reports to the EDP Statistics Working Group meetings, Classification of the Functions of Government (COFOG) and GFS Task Forces. Promotion of the quality and relevance of General Government quarterly accounts. It includes statistics on the annual Structure of Government Debt, European Financial Stability Facility (EFSF) lending and bilateral Intergovernmental lending. Transmission Reports and follow-up.            Product(s): • [GovA] Annual government finance. • [GovD&amp;D] Government deficit and debt. • [GovQ] Quarterly government accounts.            Other output(s): • Progress report on quarterly GFS data transmission and quality issues integrated and regularly presented in EDP Statistics WG meetings, in the GFS Task Force and in the COFOG TF.</p>	Process
2	<p><b>[GovMeth(1/2)] Coordination of methodological tasks for GFS (1/2)</b>            Description: (1) Update of European System of Accounts (ESA) on government sector, of Manual of General Government deficit and debt according to ESA 2010. (2) Preparation of Eurostat decisions and guidance notes. (3) Organisation of the Excessive Deficit Procedure (EDP) Statistics Working Group. Coordination of the implementation of manuals in all Member States. (4) Organisation of training on Government Finance Statistics (GFS). (5) Coordination of methodology with the National Accounts Directorate in Eurostat and other accounting standards.            Output(s): • Task force and Working Group meetings. • Greater knowledge of Government Finance Statistics in countries, leading to higher and more harmonised GFS data.</p>	Process
2	<p><b>[GovMeth(2/2)] Coordination of methodological tasks for GFS (2/2)</b>            Description: (1) Update of relevant Government Finance Statistics (GFS) manuals according to European System of Accounts (ESA) 2010 (2) Coordination of GFS methodological issues with Member States where appropriate, in coordination with Excessive Deficit Procedure (EDP) methodological developments (3) Timely organisation of Classification of the Functions of Government (COFOG) Task Force and GFS Task Force, dealing with transmission and methodological issues related to GFS. (4) Provision of advice to MS. (5) Contribution to GFS training courses.            Output(s): • Methodological issues addressed in GFS TF and EDPS WG meetings and raised in transmission reports, correspondence with MS. • Organisation of COFOG and GFS Task Forces. • Contribution to the methodology regarding GFS. • Guidance related to GFS produced, discussed and published where appropriate. • Update and production of methodological manuals. • Contribution to GFS training.</p>	Process
2	<p><b>[MIP] Scoreboard of indicators of the Macroeconomic Imbalance Procedure</b>            Description: Development, improvements, and regular publication of data and news releases concerning the scoreboard of indicators in the context of the Macroeconomic Imbalance Procedure (MIP). Follow up of quality management of MIP indicators (Level 1 report).            Product(s): • [MIP] MIP scoreboard.</p>	Process
3	<p><b>[FATS] Statistics on foreign affiliates</b>            Description: Validation and processing of annual Statistics on foreign affiliates (FATS) data received from Member States and other reporting countries. Dissemination of national data and EU aggregates on Eurostat website. Quality reporting and methodological development ensured.            Product(s): • [FATS] Foreign affiliates of EU enterprises.</p>	Process
3	<p><b>[FDI] Statistics on Foreign Direct Investment</b>            Description: Data production, compilation and dissemination of statistics. Maintenance and development of methodology as well as data quality issues. Maintenance and development of the Foreign Direct Investment (FDI) Network. Quality reporting and methodological development ensured.            Product(s): • [FDI] Foreign direct investments.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
3	<p><b>[GVC] Developing the area of Global Value Chains</b>            Description: Developing the area of Global Value Chains, following the work of the ESSnet (European Statistical System collaboration networks) on GVC and taking into accounts the follow-up of the recommendations of the Sturgeon Report on Global Value Chains and production of improved indicators on economic globalisation. All the work should be coordinated at international level. Development includes also an attempt to an extension to a representative group of Member States for every resulting data set.            Product(s): • [GVC-Ind] Globalisation indicators. • [GVC-IS] International sourcing. • [STEC] Services trade by enterprise characteristics. • [IntServ] International trade in services.            Other output(s): • Micro-data linking of SBS and other business related statistics.</p>	Project (2010-2019)
4	<p><b>[434] Improvement of national accounts methodology</b>            Description: Development of methodology and methodological advice at Eurostat, EU and international level, with respect to System of National Accounts (SNA) 2008 and European System of Accounts (ESA) 2010.            Output(s): • Methodological guidance and manuals.</p>	Process
4	<p><b>[435] Test data transmissions on pension entitlements as included in the revised European System of Accounts (ESA) Transmission Programme</b>            Description: Follow-up of the methodological framework and compilation guide on pensions and analysis of the pension data received through the supplementary table.            Output(s): • Methodological guidance and manuals.</p>	Project (2012-2017)
4	<p><b>[436] Implementation of national accounts methodology</b>            Description: Operation of the Directors of Macroeconomic Statistics and National Accounts Working Group.            Output(s): • Improved strategic guidelines and national accounts coordination. • Coordination of ESA (European System of Accounts) methodology and other accounting standards between Eurostat NA (National Accounts) and GFS (Government Finance Statistics) directorates.</p>	Process
4	<p><b>[473] Modernisation of price statistics</b>            Description: Support and guide the use of scanner data and web scraping.            Output(s): • Methodological guidance; significant extension of the use of scanner data and web scraping in Member States.</p>	Project (2016-2018)
4	<p><b>[BoP] Balance of Payments</b>            Description: Processing, validation and dissemination of BPM6 BOP/IIP data, contribution to publications. (BPM6=Balance of Payments and International Investment Position Manual, Washington, D.C.: International Monetary Fund, 2009. 6th edition, BoP=Balance of Payments, IIP=international investment position).            Product(s): • [BoP] Balance of payments and international investment positions.            Other output(s): • Draft legal acts; Balance of Payments (BoP) Vademecum; BoP Working Group; Quality reports; Commission working document to the EP on data quality.</p>	Process
4	<p><b>[EURONA] Eurostat Review of National Accounts and Macro-Economic Indicators</b>            Description: Editor's work for the biannual publication of EURONA.            Output(s): • Two editions of EURONA per year.</p>	Process
4	<p><b>[FIGARO] Full International and Global Accounts for Research in Input-Output Analysis</b>            Description: Establishing an annual production of EU Multi-country Input-Output Tables (EU-MC IOT) and a five-yearly production of EU Multi-country Supply, Use and Input-Output Tables (EU-MC SUIOT).            Product(s): • [NAIO] Supply, use and Input-Output tables.            Other output(s): • Project reports.</p>	Project (2015-2017)
4	<p><b>[FPMT] Food Price Monitoring Tool</b>            Description: Further development of statistical information on food supply chains and continued updating of the monitoring tool.            Product(s): • [Price-FSCM] Food Price Monitoring Tool.            Other output(s): • Monitoring tool.</p>	Process
4	<p><b>[GPA] Growth and Productivity Accounts; statistics on competitiveness</b>            Description: Extension of the coverage of data on growth and productivity and competitiveness available to users.            Product(s): • [GPA] Growth, productivity and competitiveness.</p>	Project (2000-2017)

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/Process
4	<p><b>[HICP] Processing Harmonised Indices of Consumer Prices</b>            Description: Production and dissemination of monthly HICPs (euro area flash estimate, mid-month estimates, HICP sub-indices and special aggregates, HICP at constant tax rates, HICP administered prices); further development of HICP methodology and guidance; compliance monitoring.            Product(s): • [Price-HICP] Harmonised Indices of Consumer Prices.            Other output(s): • HICP methodological guidance and recommendations; compliance monitoring reports; Manuals.</p>	Process
4	<p><b>[HICP_ImplDel] Harmonised Indices of Consumer Prices implementing/delegated acts</b>            Description: Preparation of Harmonised Indices of Consumer Prices implementing/delegated acts under the new framework regulation.            Output(s): • Draft implementing/delegated acts.</p>	Project (2016-2018)
4	<p><b>[HICP_Modern] Modernisation of Eurostat's Harmonised Indices of Consumer Prices production system</b>            Description: Re-engineering of the HICP production environment to establish a production system that meets state-of-the-art standards (the decision on the project will be taken once the project HIXG has been ended in spring 2016).            Output(s): • Intermediate stage reports.</p>	Project (2016-2018)
4	<p><b>[HPS] Housing Price Statistics</b>            Description: Compilation of the house price index and the owner occupied housing price index.            Product(s): • [Price-HPS] Housing price indices.            Other output(s): • Methodological guidance.</p>	Process
4	<p><b>[IGA] Integrated Global Accounts and Global Production</b>            Description: This project applies to national accounts and balance of payments statistics. It deals with the issues of integrated global accounts and global production and their implications to the accounting frameworks at European and national levels. The project relates to initiatives at international level, namely to the work on the system of extended international and global accounts coordinated by the UNSD and on global production conducted by UNECE.            Output(s): • Preparing papers, analysis reports, feasibility study.</p>	Project (2016-2018)
4	<p><b>[IND] Coordinating indicator work and developing conceptual approaches *NEW*</b>            Description: The Unit has the responsibility for coordinating indicator work in Eurostat, through the CGI group and in areas such as conceptual approaches and policy use of indicators.            Output(s): • Well-coordinated Eurostat approach to indicators and accompanying conceptual approaches developed as necessary.</p>	Process
4	<p><b>[MNY] Monetary and other finance statistics</b>            Description: Publication of monetary and financial statistics on the Eurostat web site.            Output(s): • Monetary and other financial indicators (including Euro yield curves, interest rates, exchange rates).</p>	Process
4	<p><b>[NA] National Accounts - quarterly and annual</b>            Description: Processing, validation and dissemination of European System of Accounts (ESA) 2010 quarterly and annual accounts data, contribution to publications.            Product(s): • [NAMA] Annual national accounts. • [NAMQ] Quarterly national accounts.</p>	Process
4	<p><b>[NAIO] Input/Output and supply/use tables</b>            Description: Processing and validation of SUT IOT (supply/use tables and input/output tables) data. Estimation of national data and their aggregation to Euro Area and EU supply/use tables and input/output tables data.            Product(s): • [NAIO] Supply, use and Input-Output tables.</p>	Process
4	<p><b>[NA-Reg] Regional Accounts</b>            Description: Processing, validation and dissemination of European System of Accounts (ESA) 2010 regional accounts data, contribution to publications.            Product(s): • [NA-Reg] Regional accounts.</p>	Process
4	<p><b>[NASA] Non-financial sector accounts</b>            Description: Publication of quarterly and annual sector accounts.            Product(s): • [NASA] Annual Sector Accounts - non-financial flows and stocks. • [NASQ] Quarterly Sector Accounts.            Other output(s): • Development of concepts and indicators on income and wealth.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/Process
4	<p><b>[NASA-F] Annual Financial Accounts (financial flows and stocks)</b>            Description: Update of dissemination website and database.            Product(s): • [NASA-F] Annual Sector Accounts - financial flows and stocks.</p>	Process
4	<p><b>[NCPI] National Consumer Price Indices</b>            Description: National Consumer Price Indices of G20 countries.            Output(s): • National Consumer Price Indices of G20 countries.</p>	Process
4	<p><b>[PEEIs(IT)] Principal European Economic Indicators (vintage database)</b>            Description: Maintenance of a vintage database for the Principal European Economic Indicators (PEEIs).            Output(s): • Principal European Economic Indicators (PEEIs) vintage database.</p>	Process
4	<p><b>[PEEIs] Principal European Economic Indicators</b>            Description: Supply of Principal European Economic Indicators (PEEIs) including publication, quality assessment statistical improvements and analysis of PEEIs with expected monthly or quarterly output. Methodological handbooks and guidelines to enhance harmonization of PEEIs.            Product(s): • [PEEIs] Principal European Economic Indicators.            Other output(s): • European Financial Committee status report on information requirements in the Economic and Monetary Union. • Horizontal methodological activities related to PEEIs, revision analysis, methodological papers. • Innovative dissemination tools for PEEIs.</p>	Process
4	<p><b>[PPP(IT)] Purchasing Power Parities - IT part</b>            Description: Maintenance and development of PPP database and tools.            Output(s): • Improved and maintained PPP IT tools.</p>	Process
4	<p><b>[PPP] Purchasing Power Parities</b>            Description: Production and dissemination of purchasing power parities; supervision of price surveys; methodological work; compliance monitoring; ICP (International Comparison Programme) activities.            Product(s): • [PPP] Purchasing Power Parities.            Other output(s): • Methodological developments; compliance monitoring reports; contribution to the ICP process.</p>	Process
4	<p><b>[PPPP] Development of production Purchasing Power Parities</b>            Description: Development of production purchasing power parities.            Product(s): • [PPPP] Production Purchasing Power Parities.</p>	Project (2014-2017)
4	<p><b>[SDI] Sustainable development indicators</b>            Description: Contribute to the development of indicators to measure the Sustainable Development Goals (SDGs) at global level. Develop the set of indicators to monitor sustainable development in the EU taking the SDGs into account in cooperation with other services and Member States. Prepare analyses and dissemination products for the main users. Maintain the set of sustainable development indicators (SDI) on the Eurostat website. Contribute to the implementation of the 'GDP and beyond' roadmap. (GDP=Gross Domestic Product).            Product(s): • [SDI] Sustainable development indicators.            Other output(s): • SDI dedicated section. • Publication of a monitoring report on sustainable development indicators in Europe. • Methodological work (publications and working papers) on indicators. • Development of indicators for the Sustainable Development Goals (SDGs). • 'GDP and beyond' work.</p>	Process
4	<p><b>[TFLand] Drafting a guide on measurement of land and other non-financial assets</b>            Description: Following the development of a compilation guide on how to measure land the mandate of the Task Force was extended to continue the work in 2015 and 2016 with the study of other non-financial assets. Joint task force with OECD and 17 Member States.            Output(s): • Production of a guidance manual.</p>	Project (2013-2017)
5	<p><b>[EnvClimCh] Climate change related statistics</b>            Description: Development of climate change related statistics.            Product(s): • [ClimChange] Climate change.            Other output(s): • Contribution to FIGARO project. • Support the CES initiative on climate change related statistics.</p>	Project (2009-2017)

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
5	<p><b>[EnvKIP] Assistance on ecosystems / natural capital accounts</b>            Description: Assistance to DG Environment on ecosystems / natural capital accounts.            Product(s): • [BioDivInd] Biodiversity indicators.            Other output(s): • Service offered to DG Environment: assistance on ecosystems / natural capital accounts (type=Service to other). • Service to DG ENV: advice on the statistical needs and options for monitoring the 2020 Biodiversity Strategy (type=Service to other).</p>	Process
5	<p><b>[EnvLegBase] Further develop environmental economic accounts</b>            Description: Implement Regulation 691/2011 on European environmental economic accounts and develop new modules in line with the European Strategy for Environmental Accounts, 2014-2018.            Product(s): • [ResManExpAcc] Resource management expenditure accounts. • [EnvTraSimSub] Environmental transfers and similar subsidies accounts.            Other output(s): • Refine methodology, handbooks, etc. to assist implementation of new modules. • Develop and test new methodologies.</p>	Project (2011-2020)
5	<p><b>[EnvMonAcc] Monetary environmental accounts</b>            Description: Collect and disseminate environmental goods and services sector accounts, environmental taxes and environmental protection expenditure accounts including estimates for the main EU aggregates.            Product(s): • [EGSS] Environmental goods and services sector accounts. • [EnvTax] Environmental taxes. • [EPEA] Environmental protection expenditure accounts.            Other output(s): • Service to DG TAXUD: coordination on environmental taxes.</p>	Process
5	<p><b>[EnvPhysAcc] Physical environmental accounts</b>            Description: Collect and disseminate air emissions accounts, physical energy flow accounts and material flow accounts data including estimates for the main EU aggregates. It includes indicators on greenhouse gases and air pollution and footprints as well as estimates of raw material consumption.            Product(s): • [AirEmAcc] Air emissions accounts. • [EnerAcc] Physical energy flow accounts. • [MFA] Material flows accounts.            Other output(s): • Service to DG ENV: technical advice on material flow accounts.</p>	Process
5	<p><b>[EnvWat] Water statistics and accounts</b>            Description: Collect and disseminate water statistics and accounts.            Product(s): • [Water] Water statistics and accounts. • [RegEnv] Regional environment.</p>	Process
6	<p><b>[567] Co-ordination of Statistical Units and Profiling</b>            Description: Co-ordinate and monitor the implementation of Statistical Units Regulation, assist the Member States in their profiling activities.            Output(s): • Assistance for and monitoring of the implementation of the definition of statistical units. • Assistance for and promotion of the use of Profiling as method for delineating enterprises and improving business statistics. • Promotion of Profiling in workshops, ESTP courses. • ESTAT activities to support profiling activities. • Enhanced integration of profiling results into the EGR.</p>	Process
6	<p><b>[569] Accounting and statistics</b>            Description: Follow-up of developments in accounting, IFRS (International Financial Reporting Standard) desk, accounting and statistics.            Output(s): • Co-ordination of Accounting and Statistics, International Financial Reporting Standard (IFRS) desk.</p>	Process
6	<p><b>[573] Coordination of European business statistics</b>            Description: Coordination of European business statistics, including the BSDG Secretariat. (BSDG=Business Statistics Directors' Group).            Output(s): • BSDG and BSDG-SDG meetings organised. • work of the Directorate co-ordinated.</p>	Process
6	<p><b>[575] Integrating Business registers into the improved ESS business statistics</b>            Description: The legal package (including the technical provisions) of Business Registers needs to be drafted and implemented.            Output(s): • Updated legal framework for European statistical Business Registers as the backbone for integrated business statistics and promotion of its implementation.</p>	Project (2013-2020)

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
6	<p><b>[581] Integration of tourism statistics in business and social statistics</b></p> <p>Description: Tourism statistics to be streamlined and integrated in business statistics and in social statistics, taking into account the orientations decided at Directors' level; methodological work on better integrating the tourism registers and the business registers as well as on re-using existing business statistics to carry out economic analysis of the tourism industries; continuation of work on producing tourism statistics with big data.</p> <p>Output(s): • After the decisions on the integration, concrete roadmaps/actions on the integration into social and business statistics. • Methodological work to better describe the economic importance of the tourism industries. • Methodological work on the integration of the tourism registers and the business registers. • Experimental tourism statistics produced with big data sources.</p>	Project (2012-2017)
6	<p><b>[583] Integration of the Short-Term Statistics (STS) legislation and data structures into improved ESS business statistics</b></p> <p>Description: The Short Term Business Statistics contribution (STS package) needs to be integrated into to the improved framework of ESS business statistics (FRIBS). More concretely this means e.g.: putting in place of an Index of Services Production; defining an eventual alignment with labour variables produced by enterprise based social statistics.</p> <p>Output(s): • Consolidation of the technical short-term statistics proposals ("STS package") within FRIBS; Alignment of the STS labour variables with enterprise based labour variables. Methodological deliverables accompanying the abovementioned integration and consolidation.</p>	Project (2011-2017)
6	<p><b>[585] Classifications for international trade statistics</b></p> <p>Description: Updating and maintenance of the Combined Nomenclature and co-ordination with the classification unit on the Geonomenclature for trade in goods.</p> <p>Output(s): • Classifications for international trade statistics up to date.</p>	Process
6	<p><b>[586] Regulatory Framework Integrating European Business Statistics (FRIBS)</b></p> <p>Description: Development of integrated legal framework and implementation requirements (definitions, data structure, data quality, etc.) for European business statistics.</p> <p>Output(s): • A coherent set of definitions for statistical variables. • Integrated data requirements. • Standards for quality reporting and data transmission. • Finalisation of the European Business Statistics Manual. • FRIBS Impact Assessment report. • Legislative drafting of basic Regulation and additional legal instruments as well as inter-institutional process.</p>	Project (2009-2020)
6	<p><b>[654] Modernisation of Prodcom statistics (methodology and statistical tools)</b></p> <p>Description: Modernisation initiatives carried out in the in the context of the FRIBS project as well as in the context of the European Commission administrative burden initiatives (REFIT) in order to promote. • further harmonisation and enhancement of the existing statistical methodologies; • improvements of the national statistical production processes via advanced statistical tools for data collection, processing, validation and dissemination.</p> <p>Output(s): • Availability of a more harmonised statistical methodology. • New or improved methods and tools for data collection, processing and dissemination in the Member States.</p>	Project (2015-2017)
6	<p><b>[682] Redevelopment of Eurostat ICT production environment</b></p> <p>Description: There is a need to migrate the existing ICT (Information and Communication Technologies) application to a corporate production tool. The planning foresees that the project will be finalized by end of 2017. The project covers both to the Household survey (microdata) and the Enterprise survey (aggregated data).</p> <p>Output(s): • New ICT production system tested and put fully into production.</p>	Project (2015-2017)
6	<p><b>[805] Eurostat Flagship publication on Digital Agenda/Digital Single Market</b> *NEW*</p> <p>Description: Preparation of Eurostat Flagship publication on Digital Agenda/Digital Single Market.</p> <p>Output(s): • Release of Eurostat Flagship on Digital Agenda/Digital Single Market.</p>	Project (2016-2017)
6	<p><b>[BD] Statistics on Business Demography</b></p> <p>Description: Validation and processing of annual Business Demography (BD) data received from Member States and other reporting countries based on the Annex IX of the Structural Business Statistics (SBS) Regulation. Dissemination of national data and EU aggregates on Eurostat website. Quality reporting and methodological development ensured. Collection of primary data on high-level growth enterprises (10%) to feed the calculation of the innovation indicator as foreseen by Commission implementing regulation (EU) No 439/2014.</p> <p>Product(s): • [BD] Business demography.</p>	Process
6	<p><b>[CIS] Community Innovation Survey statistics</b></p> <p>Description: Ensure the regular production, dissemination and development of biennial Community Innovation Surveys and the related metadata for EU2020 (DG RTD), European Research Area (DG RTD) and European Innovation Scoreboards (DG RTD, GROW) monitoring and for Research and Innovation Observatory (DG JRC) with their envisaged extensions.</p> <p>Product(s): • [CIS] Innovation.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
6	<p><b>[CIS-Manual] Revision of Oslo Manual</b>            Description: The Eurostat/OECD Oslo manual on methodology for measuring Innovation will be revised. The project concerns the following statistical product: [CIS] Community Innovation Survey.            Output(s): • The Oslo manual will be updated and possibly extended to cover innovation in the Government (public) sector.</p>	Project (2015-2017)
6	<p><b>[Comext(IT)] Comext Database – IT part</b>            Description: (1) IT Maintenance of the three Comext Databases (Confidential, on-line Comext, public Comext). (3) Comext IT user support for Commission services, Member States and users in general.            Output(s): • IT Maintenance of the Comext databases. • Further enhancement of the interfaces and functionalities of the different Comext applications (e.g. Comext Loader, Metadata Editor, Nomenclature Production System, Easy Comext Metadata organiser) for both production and dissemination purposes.</p>	Process
6	<p><b>[Comext] Comext Database management</b>            Description: (1) Preparation and management of the three Comext Databases (Confidential, on-line Comext, public Comext). (2) Free electronic data dissemination of European statistics, in particular international trade in goods, TEC, TIC, Prodcum and other statistical domains. (3) Comext statistical user support for Commission services, Member States and users in general.            Output(s): • Maintenance of the Comext databases enabling availability of European statistics, in particular international trade in goods, TEC, TIC, Prodcum and other statistical domains. • Timely user support to meet the needs of the policy DGs, the institutional and public users.</p>	Process
6	<p><b>[ESI] Development of entrepreneurship indicators</b>            Description: Integration of employer business demography and high growth enterprise statistics into regular data production. Contribution to the Entrepreneurship Indicator Programme (EIP) programme. Further work on quarterly and regional indicators related to business demography.            Product(s): • [ESI] Entrepreneurship.</p>	Project (2010-2019)
6	<p><b>[HRST+HTec] Human Resources and High Tech in Science and Technology statistics</b>            Description: Ensure the regular production, dissemination and development of High-Tech statistics and Human Resources in Science and Technology statistics and the related metadata for EU2020 (DG RTD), European Research Area (DG RTD) and Innovation Union (DG RTD, ENTR) monitoring and for Research and Innovation Observatory (DG JRC) with their envisaged extensions.            Product(s): • [HRST] Human Resources in Science &amp; Technology. • [HTec] High-tech industry and knowledge-intensive services.</p>	Process
6	<p><b>[ICTManual] A methodological framework for ICT *NEW*</b>            Description: There is a need to develop a stronger statistical framework for ICT statistics.            Output(s): • Draft manual providing a stronger framework for ICT statistics.</p>	Project (2017-2018)
6	<p><b>[ISoc] Information Society - Information and Communication Technologies usage Statistics</b>            Description: Further development and management of the production and dissemination of statistics on the information society: • ICT usage in households and by individuals, • ICT usage and e-commerce in enterprises. (ICT=Information and Communication Technologies).            Product(s): • [DAE] Digital Agenda for Europe. • [ISocEnt] Information society - enterprises. • [ISocHI] Information society - households and individuals.            Other output(s): • Adoption of a Commission regulation implementing regulation (EC) 808/2004 of the European Parliament and of the Council concerning statistics on the information society. • Development of two model questionnaires for the use of ICT in enterprises and in households and by individuals. • Pretesting of new elements for two ICT model questionnaires.</p>	Process
6	<p><b>[ISocICT] Information Society - Information and Communication Technologies sector statistics</b>            Description: Compilation, processing and dissemination of secondary statistics related to the supply and demand of ICT, i.e. output of ICT producing industries, employment in the ICT sector, demand and employment of ICT skilled personnel, etc. (ICT=Information and Communication Technologies).            Product(s): • [ISocICT] ICT sector.</p>	Process
6	<p><b>[ITGS] International Trade in Goods Statistics</b>            Description: Development (methodology), production (collection, processing, validation, analysis, quality and compliance control) and timely dissemination of international trade in goods statistics.            Product(s): • [IntGood] International trade in goods. • [TEC] Trade in goods by enterprise characteristics. • [TIC] Trade in goods by invoicing currency.            Other output(s): • Regular high quality ITGS statistics produced and disseminated. • Production processes further improved. • Up to date methodological framework available.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
6	<b>[ITSS] Statistics on International Trade in Services</b> Description: Data production, compilation and dissemination of statistics on International Trade in Services (ITSS). Quality reporting and methodological development ensured. Product(s): • [IntServ] International trade in services.	Process
6	<b>[PRODCOM] Statistics on industrial production</b> Description: Development (methodology), production (collection, processing, validation, analysis, quality and compliance control) and timely dissemination of the annual Prodcom statistics, including the annual preparation of the Prodcom list. Product(s): • [PRODCOM] Production of manufactured goods. Other output(s): • Regular high quality Prodcom statistics produced and disseminated. • Publication in the OJ of the Prodcom list n+1. • Production processes further improved. • Up to date methodological framework available.	Process
6	<b>[R&amp;D] Research and Development statistics</b> Description: Ensure the regular production, dissemination and development of R&D statistics and the related metadata for EU2020 (DG RTD), European Research Area (DG RTD) and Innovation Union (DG RTD, ENTR) monitoring and for Research and Innovation Observatory (DG JRC) with their envisaged extensions. Product(s): • [GBOARD] Government budget appropriations or outlays on R&D. • [R&D] Research and Development.	Process
6	<b>[R&amp;D_Frascati] Implementation of the 2015 Frascati and revised Oslo manuals *NEW*</b> Description: The implementation of the 2015 Frascati manual and linking with CIS will set new standards for the compilation of reliable and comparable data. The implementation of relevant quality measures may require amendments of the data collection in some Member States. Output(s): • Implementation of new methodology and appropriate quality measures in Member States in the area of R&D and Innovation statistics.	Project (2017-2017)
6	<b>[R&amp;D-ICT-Imp] Impact of ICT and R&amp;D on employment and growth</b> Description: Examine how R&D, Innovation and ICT statistics can better support policy making. The project concerns the following statistical products: [CIS] Community Innovation Survey. [GBOARD] Government budget appropriations or outlays on R&D. [HRST] Human Resources in Science & Technology. [HTec] High-tech industry and knowledge-intensive services. [IPR] Intellectual property rights. [ISocEnt] Information society: Enterprises. [ISocHI] Information society: Households and individuals. [ISocICT] ICT sector. [Patents] Patents. Output(s): • Report on the strengths and weaknesses of the current R&D, Innovation and ICT statistics data collection in relation to the priorities of the Juncker Commission paving the way for more relevant and better statistics.	Project (2016-2017)
6	<b>[SBS] Structural Business Statistics</b> Description: Validation and processing of annual Structural Business Statistics (SBS) data received from Member States and other reporting countries on the Annex I - IV and VIII. Dissemination of national data and EU aggregates on Eurostat website. Quality reporting and methodological development ensured. Product(s): • [SBS] Structural Business Statistics.	Process
6	<b>[SBS2020] Structural Business Statistics development</b> Description: Develop and implement a strategy for structural business statistics (SBS) for the next decade. Here the questions of the statistical units and the geographical reference for SBS play a crucial role. Product(s): • [SBS2020] SBS main indicators.	Project (2015-2020)
6	<b>[STS] Short Term business Statistics</b> Description: Development, production (collection, processing, validation, quality and compliance control) and timely dissemination of short term business statistics, including 8 Principal European Economic Indicators (PEEIs). Product(s): • [STS-Co] Short term business statistics - construction. • [STS-In] Short term business statistics - industry. • [STS-TS] Short term business statistics - trade and services. Other output(s): • Regular high quality STS statistics produced and disseminated; production processes further improved.	Process
6	<b>[TOUR] Tourism statistics</b> Description: Development, production (collection, processing, validation, quality and compliance control) and timely dissemination of tourism statistics. Product(s): • [TourAcc] Tourism industry - accommodations. • [TourEco] Tourism industry - economic dimension. • [TourTrip] Trips of EU residents. Other output(s): • Regular high quality statistics on tourism produced and disseminated; production processes further improved.	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
7	<p><b>[128] Developing statistics on health</b>            Description: Assessing the feasibility of collecting morbidity statistics which are referred to in the framework regulation 1338/2008 on health statistics and of providing data on expenditure per disease.            Output(s): • Morbidity statistics: assessment of the conditions for collecting on a pilot basis some morbidity data.</p>	Project (2013-2017)
7	<p><b>[552] Review of the Labour Force Survey</b>            Description: Based on pilot studies, comprehensive review of the EU Labour Force Survey including flows (quarterly and annual) on the labour market and system of regular and ad-hoc modules.            Output(s): • Proposals for all elements of the review. • New estimates of quarterly and annual flows.</p>	Project (2011-2018)
7	<p><b>[556] Re design and development of SILC, including improved timeliness</b>            Description: Methodological, practical and legal developments are required in the context of the modernisation of social statistics, of the mid-term review of the Europe 2020 strategy in the upgrading of social statistics and of the increased demands on SILC (Statistics on Income and Living Conditions), in particular demands of regional estimates, valuation of non-cash social transfers and data on poverty dynamics, information on access to social services and needs for dramatically improve the timeliness, and effectiveness of data on poverty and social inclusion. Encompass better information on income, consumption and health.            Output(s): • Gradual improvement in timeliness, regional coverage and effectiveness: change in production chain, support to MS, development on a revised material deprivation and work on improved low work intensity household indicators. Study of the methodologies suited for advanced estimations of risk of poverty.            Other financing DG(s): EMPL, REGIO.</p>	Project (2012-2021)
7	<p><b>[AL] Adult Learning</b>            Description: Collection, validation and dissemination of every 5 year surveys data on education and adult learning (AES and CVTS). Use of LFS education for annual dissemination. Methodological work. (AES=Adult Education Survey, CVTS=Continuing Vocational Training Survey, LFS=Labour Force Survey).            Product(s): • [Educ-CVTS] Continuing Vocational Training Survey. • [Educ-LFS] Education policy indicators. • [Educ-AES] Adult education.            Other output(s): • Methodological support to countries for the implementation of next Continuing Vocational Training Survey &amp; Adult Education Survey (2016).</p>	Process
7	<p><b>[Crime] Crime and criminal justice</b>            Description: Police-recorded crime, prosecution, court and prison statistics, police numbers: joint collection with UNODC, validation and dissemination of data (and associated meta-data), including data on victims of violent crime broken down by sex. Technical advice to policy DG as required, including technical advice on improving statistics on European judicial training. Improvement of data quality; extension of the data collection, where possible, to other areas of crime (in particular to trafficking in human beings) and to the different stages of proceedings (in contact with police - investigation - prosecution - conviction - prison sentence; pre- and post-conviction phase) with disaggregation by relevant demographic characteristics; statistics on the number of convicted third country nationals. Methodological development for a survey on gender-based violence supported by DG JUST. Promotion of the ICCS (UN international crime classification for statistical purpose). Experimental developments towards a gender based violence data collection. (UNODC=United Nations Office on Drugs and Crime).            Product(s): • [Crime] Crime and criminal justice.            Other output(s): • Technical advice to policy DG, if required.            Other financing DG(s): HOME, JUST.</p>	Process
7	<p><b>[Culture] Culture statistics</b>            Description: • Production and dissemination of culture statistics on the basis of existing data collections. • Support to development of culture satellite accounts.            Product(s): • [Culture] Culture.            Other financing DG(s): EAC.</p>	Process
7	<p><b>[DemoMigr] Demography &amp; Migration</b>            Description: Data collections: 1. URESPOP - (Usual Residence Population Data Collection) total population at national level for the purposes of Qualified Majority Voting following the usual residence population definition. 2. DEMOBAL - Demographic Balance - Population (31 Dec T-1); Births (T-1); Deaths (T-1). 3. NOWCAST - Births (T); Deaths (T). 4. UNIDEMO - Population (31 Dec T-1); Births (T-1); Deaths (T-1); Immigrants (T-1); Emigrants (T-1).            Product(s): • [DemoMigr] Demography and migration.            Other output(s): • Improvement of the methodology, harmonisation and expanding the use of administrative data.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/Process
7	<p><b>[EDUCATION] Education statistics</b>            Description: Collection, validation and dissemination of annual education data based on administrative sources (UOE data collection). Methodological work. (UOE=The administrative data collection on education systems, jointly managed by the UNESCO Institute for Statistics, the OECD and Eurostat).            Product(s): • [Educ-UOE] Education.            Other output(s): • Support to DG EAC activities on the development of a University Register.</p>	Process
7	<p><b>[EHIS] European Health interview survey</b>            Description: Preparation of the EHIS methodology. Management of the required legal basis. Collection of data from Member States. Editing and validation. Dissemination and publication.            Product(s): • [Health-EHIS] Health .</p>	Process
7	<p><b>[ESSPROS] Social protection statistics</b>            Description: Collection, validation and dissemination of annual data on social protection. Methodological work on better coverage of pensioners and inclusion of other beneficiaries and on links with National Accounts.            Product(s): • [ESSPROS] Social protection.            Other financing DG(s): EMPL.</p>	Process
7	<p><b>[EU-SILC(IT)] Income and living conditions statistics, including ad hoc modules - IT maintenance</b>            Description: Contribution to the IT maintenance of the data production chain.            Output(s): • IT maintenance of the data production chain.</p>	Process
7	<p><b>[EU-SILC] Income and living conditions statistics, including ad hoc modules</b>            Description: Methodological development, collection, validation and dissemination of micro data on living conditions. Development and production of aggregated datasets and indicators. Production of synthesis quality report. Dissemination of micro data for research purpose. Analysis and publications. Producer's and users' support. Annual development of the secondary variables (ad hoc modules), including the legal basis. Answer to interservice consultations and EP questions. (EU-SILC = Statistics on Income and Living Conditions).            Product(s): • [EU-SILC] Income and living conditions.            Other output(s): • SILC data extraction and calculations.</p>	Process
7	<p><b>[Gender] Gender and discrimination statistics</b>            Description: Provision and dissemination of gender and discrimination statistics as well as analysis on gender related aspects. Gender and discrimination statistics do not necessarily entail the collection of additional statistics from existing surveys but rather make full use of existing data to illustrate possible gaps e.g. between men and women. The main purpose of the activity is to extend the visibility of equality statistics available in the European Statistical System. The sets of gender and age equality indicators which are published by Eurostat use data from the following surveys: EU SILC (Community statistics on income and living conditions), LFS (Labour Force Survey), SES (Structure of Earnings Survey) and EHIS (European Health Interview Survey).            Product(s): • [Gender] Gender and discrimination.</p>	Process
7	<p><b>[HBS] Household Budget Survey</b>            Description: Methodological development (including preparation of the next wave and quality reports), data collection, validation and dissemination of data on households expenditure. Development and production of indicators.            Product(s): • [HBS] Household consumption expenditure.</p>	Process
7	<p><b>[HEALTH] Health statistics</b>            Description: Collection, validation and dissemination of data. It includes annual data based on administrative sources (Public Health Care and Causes Of Death data). It also includes annual data collection on accidents at work (ESAW) and other work-related health problems. Methodological work on EODS (European Occupational Diseases Statistics).            Product(s): • [COD] Causes of death. • [Health-ESAW] Health and safety at work. • [Health-CARE] Health care. • [Health-SILC] Health policy indicators.            Other output(s): • Work towards a new Commission Regulation on Health care non-expenditure data. • Work towards a simplified data collection on occupational diseases.            Other financing DG(s): EMPL.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
7	<p><b>[IESS] Regulatory framework for social statistics</b>            Description: Development of a framework for a modernised system of European social statistics that is capable of integrating the ongoing modernisation activities, that accommodates different situations in Member States and that supports the management of change.            Output(s): • Ongoing co-decision procedure for the framework regulation on social microdata collections (IESS - Integrated European Social Statistics). • Preparation of delegated and implementing acts related to IESS. • Preparation of two more framework regulations for social statistics.</p>	Project (2014-2019)
7	<p><b>[Labour] Statistics on labour costs (labour cost survey and labour cost index) and earnings; job vacancies; minimum wages</b>            Description: Collection, processing, dissemination and quality assurance. Collection of quarterly JVS by regions and occupation on voluntary basis. Regulation 450/2003 requires the Commission to report to the EP and the Council on the implementation of the regulation on the labour cost index every two years. The latest report was adopted in February 2015.            Product(s): • [Earn] Earnings. • [JVS] Job vacancy. • [LC] Labour costs.            Other output(s): • Report to the EP and the Council on the Labour Cost Index (LCI).</p>	Process
7	<p><b>[LFS+Unempl(IT)] Labour Force Survey and monthly unemployment rates - IT maintenance</b>            Description: Contribution to the IT maintenance of the data production chain.            Output(s): • IT maintenance of the data production chain.</p>	Process
7	<p><b>[LFS+Unempl] Labour Force Survey and monthly unemployment rates</b>            Description: Collection, processing, dissemination and quality-assurance; including transmission of data to the ECB. There will be no EU legal obligation to deliver monthly unemployment data in 2017.            Product(s): • [EmplUnempl] Employment and unemployment. • [Une] Unemployment rates.            Other output(s): • Seasonally adjusted key employment indicators. • EU LFS special tabulations on request from other DGs (incl. EMPL) and Agencies, including transmission to ECB. • Legal work and lump sums calculations for future ad hoc modules system LFS ad hoc modules. • Labour market dynamics and transitions. • Variance estimation for scoreboard indicators.</p>	Process
7	<p><b>[LFS-Mod] Statistics from the Labour Force Survey ad hoc modules</b>            Description: • 2016 module on young people on the labour market: output available in 2017/2018. • 2017 module on self-employment: implementation in 2017; output available in 2018/2019. • 2018 module on reconciliation between work and family life: preparatory work in 2017.            Product(s): • [LFS14Migr] Migrants' employment. • [LFS16Young] Young people on the labour market. • [LFS17Self] Self-employment. • [LFS18Rec] Reconciliation between family and working life. • [LFS-Acc] Accidents at work.            Other financing DG(s): EMPL.</p>	Project (2014-2020)
7	<p><b>[MngdMigr] Asylum, Managed Migration &amp; Migrant Integration</b>            Description: 1. Asylum. 2. Enforcement of immigration legislation. 3. Residence permits. 4. Indicators on migrants integration. 5. Follow-up of the national implementation of the LFS 2014 ad-hoc module on migration. 6. Technical assistance to policy DG responsible for data collection on short stay visas.            Product(s): • [MngdMigr] Asylum &amp; Managed Migration. • [LFS14Migr] Migrants' employment.            Other output(s): • Methodological advice in support of population data collections: definitions and data. • Support to the European Migration Network (EMN) and Migrant Integration. • Improvement of the methodology, harmonisation and expanding the use of administrative data.            Other financing DG(s): HOME.</p>	Process
7	<p><b>[Net-SILC3] Network on Income and Living Conditions Statistics</b>            Description: Support to in-depth methodological developments and analysis of EU-SILC, scientific coordination of international conferences, preparation of publications, methodological guidelines and studies. SILC = Survey on Income and Living Conditions.            Output(s): • NET-SILC 3 conference.</p>	Project (2016-2019)

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
7	<p><b>[PopCens] Census 2021 and beyond</b>            Description: 1. Prepare with ESS implementing legislation for 2021 census. Based on the European Parliament and Council regulation 763/2008 on population and housing censuses, propose the content of the implementing regulations defining the technical specifications for census topics (variables) and their breakdowns, list and structure of tables, accompanying metadata and quality reporting. And based on INSPIRE Specifications of Geographical grid systems and their implementation in the EU propose a set of topics (variables) to be coded at 1 sq. km spatial grid resolution. 2. Prepare with ESS organisation of Censuses beyond 2021 including the following: i. To review the changing needs and opportunities for the production of European census-type statistics. ii. To develop and assess possible options and scenarios regarding the frequency of the data collection, statistical topics, levels of disaggregation and geographical coding.            Product(s): • [PopCens] Population and Housing Census.            Other output(s): • Methodological advice. • Support of preparatory actions in MSs.</p>	Process
7	<p><b>[PopMeth] Population statistics production system</b>            Description: Developing automated (i.e. minimising human intervention and thus resources and based on a robust methodology) data collection, processing and dissemination system for population statistics (demography, migration) based on standards.            Product(s): • [DemoMigr] Demography and migration.</p>	Project (2013-2019)
7	<p><b>[PopProj] Population projections</b>            Description: 1. Population Projections on national level (ESSPOP 2016) to be disseminated in the first half of 2017. 2. Population Projections on regional level (ESSPOP 2016) to be disseminated in 2018.            Product(s): • [PopProj] Population projections.</p>	Process
7	<p><b>[QoL] Indicators on Quality of Life</b>            Description: Finalisation of the framework for indicators on quality of life. Publications and analysis based on existing data. Integration in the regular production.            Product(s): • [QoL] Quality of life.</p>	Project (2012-2017)
7	<p><b>[RRSI] Reinforced Role of Social Indicators</b>            Description: The Reinforced Role of Social Indicators (RRSI) project aims at achieving a sustainable upgrading and modernisation of European social statistics in key areas in support of the Commission's key priorities: growth and job creation, the reduction of poverty and social exclusion, skills and mobility. The Reinforced Role of Social Indicators (RRSI) thus aims at reinforcing the development, production and dissemination of Social Statistics by Eurostat particularly in the domains of income, poverty and social exclusion timeliness, labour market, skills and mobility, better links between income, consumption and wealth and between micro and macro data on ICW. This will allow Eurostat to make substantial, measurable advancements in these key areas of social statistics in response to direct policy needs and with a view to bringing key social indicators up to a level considered to be on an equal footing with macroeconomic indicators. To ensure this, a suite of new and improved statistical indicators will be created in a way that, when taken together, will represent a coherent upgrading of key social statistics. This will require the project to be managed as a set of interrelated work packages that will fall under the overarching RRSI heading and which will ultimately deliver a set of indicators that will demonstrably improve key attributes of social statistics including with respect to statistical quality as defined in Article 12 of the Statistical Regulation ((EC) No.223/2009) and also with reference to the ESS Code of Practice. This project will incorporate the project "[ICW] Methodological and development work for better integration of income consumption and wealth", the flash estimates aspects of the SILC redesign and work on labour mobility and skills. This project concerns the following statistical products: Demography and migration, Employment and unemployment, Income and living conditions, Household consumption expenditure, Education.            Output(s): • Methodological documents. • Experimental statistics.</p>	Project (2015-2020)
7	<p><b>[SocMod] Modernisation programme for social statistics</b>            Description: The modernisation programme for social statistics covers projects aimed at: • Making social statistics more responsive to user needs, in particular to the requirements coming from the development and implementation of EU policies. • Increasing efficiency. • Increasing quality. • Standardisation of common variables. Note: the modernisation programme includes cross-cutting projects. The following projects are included: SocVIPstream - VIP streamlining social surveys. SocCenExSurv - Centre of Excellence on household and individual surveys using mixed modes.            Output(s): This heading includes the following outputs in 2017: • Progress in developing and supporting multimode data collections. • Experiments in MS for streamlining social surveys. • Further implementation of the ESeG (European Socio-economic Groups) classification developed in the ESSnet-ESeG. • Standardised definitions and implementation guidelines for the set of Core Social Variables and some other variables common to multiple data collections as well as for common definitions.</p>	Project (2012-2020)

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
7	<p><b>[SPHE] Developing links with National Accounts in the area of Social Protection, Health and Education</b>            Description: On the basis of existing experiences in the area of social protection (ESSPROS) and health (SHA), the project aims at developing the links with National Accounts for education, health and social protection. The availability of satellite accounts is planned in the long term perspective.            Output(s): • Initial methodological development as regards the links between ESSPROS and national accounts. • Initial methodological development as regards the links between UOE data (education expenditure) and national accounts. (UOE=The administrative data collection on education systems, jointly managed by the UNESCO Institute for Statistics, the OECD and Eurostat). • Initial methodological development as regards the links between Health care financing data and national accounts.            Other financing DG(s): EMPL.</p>	Project (2014-2018)
7	<p><b>[Sport] Sport statistics</b>            Description: • Production and dissemination of sport statistics on the basis of existing data collections. • Support to development of sport satellite accounts.            Product(s): • [Sport] Sport.            Other financing DG(s): EAC.</p>	Process
7	<p><b>[TUS] Time Use Survey</b>            Description: Collection and dissemination of the 2010 wave. Methodological development needed for the next round.            Product(s): • [TUS] Time use.</p>	Process
7	<p><b>[Youth] Youth statistics</b>            Description: • Production and dissemination of youth statistics on the basis of existing data collections. • 2016 ad hoc module in Labour Force Survey on young people in the labour market. • Development of new indicators for EU policies for young people.            Product(s): • [Youth] Youth.</p>	Process
8	<p><b>[511] Strategy for agricultural statistics towards 2020 and beyond</b>            Description: • Set-up of the legal basis for the European Agricultural Statistical System 2020 and beyond. • Pilot projects towards supply balance sheets for cereals. • Adapt data collections under regulations handled by DG AGRI to legal updates. • Improve dissemination and methodological aspects for AEI including assessing the impact of nutrient flows. • Eurofarm2020: Information system to support the production of integrated farm statistics.            Output(s): • Framework Regulation for micro data in EP/Council. • First draft of Framework Regulation for tabular data.            Other financing DG(s): AGRI.</p>	Project (2010-2021)
8	<p><b>[529] Integration of statistical and geospatial information</b>            Description: Series of projects in cooperation with Member States to advance the integration of statistical and geospatial information within NSI (Merging Statistics and Geospatial Information), and at European level (ESSnets GEOSTAT). Participation in working groups of UN-GGIM (United Nations Global Geospatial Information Management).            Output(s): • Blue print for a spatial reference framework for statistics (GEOSTAT). • Closer cooperation within Member States between NSI and NMCAs (National Mapping and Cadastre Agencies), improved production systems and enhanced information. • High visibility for statistical matters in UN-GGIM.</p>	Project (2009-2018)
8	<p><b>[531] Coordination of geospatial information in the Commission within the European Statistical System and on international level</b>            Description: Coordination within the Commission via the Inter-service Group (COGI), the related technical committee (UTC) and within the European Statistical System via a Member States Working Group. Key aspects are: • the link between geospatial information and statistics. • INSPIRE (Infrastructure for Spatial Information in Europe), particularly its implementation in the Commission. • Active participation in the United Nations initiated UN-GGIM and its European branch UN-GGIM: Europe. (COGI=Commission interservice group for geographical information, UTC=User and Technical Committee, UN-GGIM=United Nations Global Geospatial Information Management).            Output(s): • Coordination of geographic information in the Commission, operation of the COGI Interservice Group and the GISCO (Geographical Information System of the Commission). User and Technical Committee. • Services to assist Commission DGs and Eurostat units in GIS (Geographical Information System) work, such as via framework contracts. • Capacity building and exchange of best practices within the European Statistical System and on international level. • Improving data quality of geospatial data through better specifications and guidelines.</p>	Process
8	<p><b>[537] Maintenance of the Energy Statistics IT components</b>            Description: Maintenance of the current database and IT tools used for energy statistics caused by changes in the annual and monthly questionnaires, new requirements or changes following Directorate B policy actions in IT, metadata or dissemination.            Output(s): • Maintenance of the database.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
8	<b>[540] Methodological manuals on energy statistics</b> Description: Development work on detailed description of energy statistics methodology for data compilers at a national and EU level and for analysts of energy statistics data. Output(s): • Outline of the methodological work established - tendering procedure to be initiated - creation of manuals internal & external work.	Project (2014-2017)
8	<b>[636] Regulation of the European Parliament and of the Council on European statistics on natural gas and electricity prices</b> Description: Proposal for a Regulation of the European Parliament and of the Council on European statistics on natural gas and electricity prices and repealing Council Directive 2008/92/EC; the new legal act will cover prices both for households and non-households end-users and will add a few more indicators to address details on taxes and network costs. Output(s): • Regulation of the European Parliament and of the Council on European statistics on natural gas and electricity prices.	Project (2014-2017)
8	<b>[667] Development of a long-term strategy for the future surveys on Land Use and Land Cover statistics</b> Description: Definition of a an approach for Land Use and Land Cover statistics. (LUCAS) Survey 2018 and beyond that satisfies the requirements of policy DGs of the Commission and Member States. Output(s): • Detailed concept of the longer-term strategy for LUCAS Surveys for 2018 and beyond agreed with Member States. • Contribution to Commission initiatives, such as ecosystems accounting (KIP: knowledge innovation project) or the Copernicus programme. • Draft Regulation for LUCAS Surveys.	Project (2010-2017)
8	<b>[674] Sankey diagrams for energy balances</b> Description: Production of Sankey diagrams for energy balances as Eurostat used to produce in the past in the paper form under the name Energy Flow Charts. There are possibilities to add additional features to the paper form and to utilise modern technologies, for the improvement of user-friendliness of the dissemination for complicated energy flows. Output(s): • Improvement of the web tool to produce Sankey diagrams for energy balances in order to add additional features, provide a more user-friendly navigation experience in various devices (tablets and smartphones), incorporate better visualisation possibilities, more dynamic functionalities and more powerful and flexible data extraction capabilities.	Project (2015-2017)
8	<b>[695] The Future Energy Information System</b> Description: A renewed information system for energy statistics based on a functional and technical optimisation/review of the collection / validation / production / dissemination processes and systems for energy statistics and taking into account SDMX and VIP validation requirements. (SDMX=Statistical Data and Metadata Exchange, VIP=Vision Implementation Project). Output(s): • Redesigned database. • Improved validation tools and optimised data production and calculation of indicators. • SDMX artefacts for energy statistics.	Project (2015-2018)
8	<b>[716] Update of energy questionnaires</b> Description: Prepare and implements the update and revision of various energy questionnaires in joint work with other Commission services, IEA and Member States; update of the Energy Statistics Regulation; implement new questionnaires in the production. (IEA=International Energy Agency, UNECE=United Nations Economic Commission for Europe). Output(s): • Update of energy questionnaires. • Manuals and reporting instructions. • Update of the Energy Statistics Regulation.	Project (2015-2018)
8	<b>[748] Reporting instruction manual on natural gas and electricity prices</b> Description: A proposal for a Regulation of the European Parliament and of the Council on electricity and natural gas price statistics repealing Council Directive 2008/92/EC will cover prices both for households and non-households end-users. In order to implement the new Regulation and collect harmonised data a manual including reporting instructions for countries should be drafted. Output(s): • Manual on electricity and natural gas prices available for countries.	Project (2015-2017)
8	<b>[751] Contribution to the Energy Union</b> Description: Data compilation and service provision: contribute to the Energy Country Fiches as announced by the "Energy Union" Vice-President, Mr Maros SEVCOVIC. Follow-up and contribution to the creation, evaluation and review of the energy security legal acts (on electricity, natural gas and oil & petroleum products stocks); also, of other energy and energy statistical reporting related legal acts (e.g. energy efficiency directive). Contribution to conceptual and methodological developments and support as concerns the establishment of statistical data for the design and monitoring of energy policies. Dissemination of the statistical information related to the Energy Union, including through high visibility publications. Output(s): • Contribution to DG ENER's country fiches. • Input to creation, evaluation and review of DG ENER's legal acts on energy. • Conceptual and methodological developments as concerns the establishment of statistical data for the design and monitoring of energy policies. • Dissemination of the statistical information related to the Energy Union.	Project (2016-2021)

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
8	<p><b>[781] Further disaggregation of the statistics on final energy consumption *NEW*</b>            Description: Development of more detailed statistics on energy consumption by establishing breakdown keys for final energies by sector and main energy uses and integrating the resulting elements into the statistics (in order to comply with Article 9 of the Regulation (EC) No. 1099/2008 on energy statistics).            Output(s): • Propose breakdown keys for further disaggregation of the final energy consumption in the Industry sector; develop dedicated reporting template; • Organize pilot exercise on new data collection; organize training for reporting countries; • Amend the Regulation (EC) No. 1099/2008 on energy statistics.</p>	Project (2016-2018)
8	<p><b>[AAct] Economic Accounts for Agriculture</b>            Description: Collection, validation, production and dissemination of data and metadata.            Product(s): • [AAct] Economic accounts for agriculture.</p>	Process
8	<p><b>[AActMod] Modernisation Economic Accounts for Agriculture *NEW*</b>            Description: Modernisation of the legal basis for Economic Accounts for Agriculture and streamlining of the production process. This project concerns the statistical product "Economic accounts for agriculture".            Output(s): First draft deliverables of the project: • Evaluation of the legal basis. • First draft of updated manual.</p>	Project (2017-2021)
8	<p><b>[AEI] Agro-Environmental Statistics</b>            Description: Collection, validation, production, dissemination of data and metadata.            Product(s): • [AEI] Agro-environment. • [OrgFarm] Organic farming.            Other output(s): Coordination role according to specific MoU on AEI (EC services involved: Eurostat, DG AGRI, DG CLIMA, DG ENV, DG SANTE, JRC and EEA).</p>	Process
8	<p><b>[APri] Agricultural Prices and Indices</b>            Description: Collection, validation, production and dissemination of data and metadata.            Product(s): • [APri] Agricultural prices. • [APriInd] Agricultural price indices.</p>	Process
8	<p><b>[APro] Animal production statistics</b>            Description: Collection, validation, production and dissemination of data and metadata.            Product(s): • [AProMe] Animal production - meat. • [AProPo] Animal production - poultry. • [AProMi] Milk, milk products and dairies structure.</p>	Process
8	<p><b>[Avia] Air transport statistics</b>            Description: Annual/quarterly/monthly data collection on the carriage of passengers, freight and mail by commercial air services as well as on civil aircraft movements to or from Community airports, based on Regulation (EC) No 437/2003 of the European Parliament and of the Council, including regional and infrastructure statistics.            Product(s): • [Tran-Avia] Air transport.</p>	Process
8	<p><b>[CHP] Improving reporting of Combined Heat and Power (CHP) data starting a new reporting process on District Heating (DH) *NEW*</b>            Description: Development of a more detailed CHP questionnaire and a new questionnaire for DH in order to comply with Directive 2012/27/EU.            Output(s): • New CHP and DH questionnaire.</p>	Project (2015-2017)
8	<p><b>[CO2] Early CO2 emission estimates</b>            Description: Preparation of CO2 emission estimates on the basis of monthly and other energy statistics using a methodology developed in an earlier study. Analysing the quality of monthly data by evaluating the coherence of monthly and other energy statistics and describing clearly the process to be followed to improve this quality if necessary.            Product(s): • [CO2] CO2 emission from fuel combustion.</p>	Process
8	<p><b>[Crop] Crop statistics</b>            Description: Collection, validation, production and dissemination of data and metadata.            Product(s): • [Crop] Crop production. • [PermCrop] Permanent crops. • [WSBS] Wine Supply Balances Sheets.            Other output(s): • Preparatory work on supply balance sheets for main grain products (GSBS).            Other financing DG(s): AGRI.</p>	Process
8	<p><b>[EA-BA-ES] Early estimates of energy balances *NEW*</b>            Description: Eurostat will investigate the options and possibilities for the development, implementation, production and dissemination of early estimates of energy balances.            Output(s): • Methodology description of estimates.</p>	Project (2016-2021)

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
8	<b>[ENERGY-BALANCES] Update of the energy balances methodology *NEW*</b> Description: Analyse and document in depth the existing energy balances produced by Eurostat and other international and national organisations. Develop, document, implement and publish the new methodology for energy balances and the energy balances themselves. Output(s): • New methodology for energy balances. • Other methodological documents.	Project (2016-2018)
8	<b>[EnerPollInd] Monitoring of 2020 strategy energy indicators</b> Description: Develop indicator methodology and produce their values in order to monitor energy efficiency targets arising from Commission legislative acts and Europe 2020 strategy. Product(s): • [NRG-DE] Energy dependence and efficiency. • [NRG-RES] Share of energy from renewable sources.	Process
8	<b>[EnvDataCentr] Environmental data centres on waste and on natural resources</b> Description: Manage, operate and further develop the data centre on waste and the data centre on natural resources. Output(s): • Data centre on waste (dedicated section). • Data centre on natural resources (dedicated section).	Process
8	<b>[EnvDirCoord] DIMESA secretariat, coordination and cooperation activities at Eurostat, EU and international level</b> Description: Secretariat of the directors group on sectoral and environmental statistics and accounts (DIMESA). Contribute to the environmental knowledge community, involving several Commission DGs and the European Environment Agency. Coordinate the annual statistical book on energy, transport and environment indicators. Contribute to international handbooks related to the System of Environmental Economic Accounts (SEEA). Output(s): • DIMESA planning and follow up (secretariat). • Assistance to DG Environment in the context of the environmental knowledge community. • Annual statistical book on energy, transport and environment indicators. • International handbooks related to the System of Environmental Economic Accounts (SEEA).	Process
8	<b>[EnvResEffic] Resource efficiency indicators</b> Description: Maintain the resource efficiency scoreboard and its metadata (ESMSIPs) to support the Europe 2020 flagship initiative for resource efficiency. Contribute to conceptual and methodological developments and support the establishment of statistical data for the design and monitoring of policies on circular economy. (ESMSIP=Euro SDMX Metadata Structure - Indicator Profile). Product(s): • [REI] Resource efficiency. Other output(s): • Resource efficiency scoreboard (dedicated section). • Support the design and monitoring of policies on circular economy.	Process
8	<b>[EnvWaste] Waste statistics</b> Description: Collect and disseminate data on: generation and treatment of waste (Regulation EC No 2150/2002); municipal waste; transboundary waste shipments (Regulation (EC) No 1013/2006); waste electrical and electronic equipment; packaging waste; end-of-life vehicles; batteries and accumulators. Maintain indicators on waste management and recycling. Maintain the set of indicators to monitor the effectiveness of the EU chemicals policy. Product(s): • [Waste] Waste statistics. • [RegEnv] Regional environment. Other output(s): • Service offered to DG Environment: collect, validate and disseminate data on transboundary shipment of waste. • Service offered to DG Environment: collect, validate and disseminate data on generation and management of different waste streams.	Process
8	<b>[Fish] Fishery statistics</b> Description: Collection, validation, production and dissemination of data, metadata and of indicators. Product(s): • [Fish] Fishery. • [FishFleet] Fishing fleet. • [Aqua] Aquaculture. Other output(s): • 3rd evaluation report on the "aquaculture regulation" to Council and EP.	Process
8	<b>[FishSimpl] Streamlining and simplification of European fishery statistics *NEW*</b> Description: This project concerns the statistical products "Fishery", "Fishing fleet" and "Aquaculture". Output(s): • Evaluation of the legal basis.	Project (2017-2021)
8	<b>[ForStAcc] Forestry statistics and accounts</b> Description: Collect and disseminate forestry statistics and accounts. Product(s): • [Forest] Forestry statistics and accounts.	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/Process
8	<p><b>[FSS] Farm Structure Survey</b>            Description: Collection, validation, production and dissemination of data and metadata.            Product(s): • [FSS] Structure of agricultural holdings.            Other output(s): • Ad hoc extractions from farm structure surveys for data not available from the online database for other DGs/Agencies.            Other financing DG(s): AGRI.</p>	Process
8	<p><b>[GISCO(IT)] GISCO geographical information system - IT part</b>            Description: IT part of the operation and maintenance of the GISCO (Geographic Information System for the Commission) in terms of further development of the technical system and related tools in Eurostat and the Commission Data Centre: - Provision of GIS (Geographical Information System) tools. Development of ad-hoc IT programs for the different GISCO services.            Output(s): • Technically improved tools for the operation and further development of GISCO services. • Maintenance of the Commission internal Geoportal. • Design and evolutive maintenance of the distance calculation tool for transport statistics. • Design and evolutive Maintenance of the tool for the creation of statistical and thematic maps.</p>	Process
8	<p><b>[GISCO] GISCO geographical information system</b>            Description: Operation and evolutive maintenance of the GISCO (Geographic Information System for the Commission) system as well as related tools and services in Eurostat and the Commission Data Centre: - Procurement, processing and dissemination of reference geographic datasets for Eurostat and the Commission. - Production of statistical and thematic maps in paper and electronic format based on extractions from statistical databases. - Design and provision of GIS (Geographical Information System) tools.            Product(s): • [GISCO] Demographic data at geospatial grid level.            Other output(s): • Geospatial reference spatial datasets and services for Eurostat and Commission DGs. • Generalised reference datasets for the general public. • Statistical maps in electronic and paper format. • Data and services for the Commission internal Geoportal. • Spatial analyses for statistical or policy relevant issues.            Other financing DG(s): REGIO.</p>	Process
8	<p><b>[HDD+CDD] Indicators Heating Degree Days and Cooling Degree Days</b>            Description: Initiation actions for re-launching the "Heating and Cooling Degree Days"-Project. The project aims at the development and the implementation of a common method for the calculation and dissemination of Heating Degree Days (HDD) and Cooling Degree Days (CDD).            Product(s): • [HDD+CDD] Heating degree days and Cooling degree days.</p>	Process
8	<p><b>[IWW] Inland WaterWay freight transport statistics</b>            Description: Annual/quarterly data collection (goods transported by type, transport by nationality and type of vessels, vessel traffic) on inland waterway freight transport, based on Regulation (EU) 2016/1954 of the European Parliament and of the Council of 26 October 2016 amending Regulation (EC) No 1365/2006 on statistics of goods transport by inland waterways, including infrastructure and regional data statistics. Methodological work to develop passenger statistics.            Product(s): • [Tran-IWW] Inland waterway transport.</p>	Process
8	<p><b>[LUCAS] Land use and land cover statistics</b>            Description: Preparation and carrying out of the regular Land use and land cover statistics (LUCAS) Survey. Collecting, processing and dissemination of European data on land use and land cover; by assessing and collecting available data in countries and by taking into account the need for harmonisation of these data and by co-operating with Commission DG, the European Economic Area, other international bodies and Member States.            Product(s): • [LUCAS] Land cover and use, landscape.            Other output(s): • LUCAS In-situ micro data on land-cover/land use.            Other financing DG(s): AGRI, CLIMA, ENV, GROW.</p>	Process
8	<p><b>[Mar] Maritime transport statistics</b>            Description: Annual/quarterly data collection (carriage of goods and passengers by sea) on maritime transport statistics, based on Directive 2009/42/EC of the European Parliament and of the Council and Regulation (EU) 1090/2010, including regional statistics Besides the currently produced statistics, Eurostat will continue the collaboration with DG MOVE through the Working Group on Maritime Transport Statistics, so as to develop a methodology for the production of more detailed statistics on Short Sea Shipping.            Product(s): • [Tran-Mar] Maritime transport.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/Process
8	<p><b>[NRG-A] Annual energy statistics</b>            Description: Update of Eurobase with annual energy statistics data, preparation of energy balance sheets, publications, reports on compliance monitoring and quality assurance, databases regular maintenance and support, user support output, answers to interservice consultations and EP questions.            Product(s): • [NRG] Energy. • [NRG-BS] Energy balance sheets. • [NRG-DE] Energy dependence and efficiency.            Other output(s): • Evaluation of the new Revision policy. • IPA 2015 - to provide assistance to Beneficiary Countries (BCs) in building or strengthening different aspects of their current and future energy statistics systems.</p>	Process
8	<p><b>[NRG-M] Monthly energy statistics</b>            Description: Collect monthly statistics (short-term trends) on solid fuels, oil and natural gas, electricity and certain renewable energy sources, in accordance with the Energy Statistics Regulation (EC) No 1099/2008. Including detailed statistics on security of supply.            Product(s): • [NRG] Energy.            Other output(s): • Evaluation of the new Revision policy. • IPA 2015 - to provide assistance to Beneficiary Countries (BCs) in building or strengthening different aspects of their current and future energy statistics systems.</p>	Process
8	<p><b>[NRG-Price] Natural gas and electricity prices and energy market statistics</b>            Description: Natural gas and electricity prices and energy market statistics dataset including: bi-annual publications in Statistics Explained, Updates of Eurobase, User support output, answers to interservice consultations and EP questions.            Product(s): • [NRG-Price] Energy prices.            Other output(s): • Evaluation of the new Revision policy. • IPA 2015 - to provide assistance to Beneficiary Countries (BCs) in building or strengthening different aspects of their current and future energy statistics systems.</p>	Process
8	<p><b>[NRG-QR] Quality reporting in Energy Statistics</b>            Description: Development of quality reporting framework for annual and monthly Energy Statistics as provided in Regulation (EC) No 1099/2008.            Output(s): • Produce the second Quality report of EU energy statistics.</p>	Project (2014-2017)
8	<p><b>[NUTS] Maintenance of the Nomenclature of Territorial Units for Statistics Classification and related Regulations</b>            Description: Preparing a draft Regulation on a territorial classification as amendment of the NUTS classification. Coordination of the Nomenclature of Territorial Units for Statistics (NUTS) classification and regular revision via amendment regulations as well as Implementing Regulations in order to coordinate the adaptation of statistics to the NUTS changes. The process includes annual collection of Local Administrative Unit 2 (LAU 2, commune level) as basis for definition of NUTS boundaries as well as dissemination.            Output(s): • Draft Regulation on a territorial classification as amendment of the NUTS classification. • Implementation Regulation for Nomenclature of Territorial Units for Statistics (NUTS) 2013. Preparation of the NUTS 2016 update.</p>	Process
8	<p><b>[Rail] Rail transport statistic</b>            Description: Quinquennial/annual/quarterly data collection (goods and passengers) on rail transport, based on Regulation (EU) 2016/2032 of the European Parliament and of the Council of 26 October 2016 amending Regulation (EC) No 91/2003 of the European Parliament and of the Council, including regional and infrastructure statistics.            Product(s): • [Tran-Rail] Rail transport.</p>	Process
8	<p><b>[Reg] Coordination of Regional Statistics</b>            Description: Cooperation with Eurostat thematic units on regional statistics data collection in all phases of the statistical production cycle, the further evolution of indicators, metadata maintenance and their methodological basis as well as dissemination issues including the Eurostat Regional Yearbook and Statistical Atlas. Coordination with policy DGs of the Commission on regional, maritime, rural and urban statistics. Cooperation with ESS on regional, maritime, rural and urban statistics related issues. The process includes the actions related to the revision and maintenance of the thematic classifications, such as urban-rural typology.            Product(s): • [Reg] EU regions and regions' typology. • [DegUrb] Regions' degree of urbanisation.            Other output(s): • System of regional typologies and its maintenance, such as urban-rural and degree of urbanisation. • Geographic and statistical analyses for defining functional regions as well as other regional boundaries and characteristics for other DGs.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/Process
8	<p><b>[Road] Road transport statistics</b>            Description: Freight transport: quarterly data collection (vehicle, journey and goods-related data) on road freight transport, based on Regulation (EU) 70/2012 of the European Parliament and of the Council. Road traffic volumes and Passenger mobility: annual voluntary data collection on the volume of road transport measured in VKm (Vehicle Kilometre); produce guidelines for harmonisation of national travel surveys for monitoring the targets of the White Paper, including regional and infrastructure statistics.            Product(s): • [Tran-Road] Road transport.</p>	Process
8	<p><b>[SubN] Sub-National statistics</b>            Description: The process covers: • regional labour market statistics both at NUTS 2 and NUTS 3 level, including the calculation of structural indicators. • rural development data collection. • compilation of indicators important for maritime policy. • compilation of aggregates based on regional typologies (metropolitan/urban/rural). (NUTS=Nomenclature of Territorial Units for Statistics).            Product(s): • [Reg] EU regions and regions' typology. • [DegUrb] Regions' degree of urbanisation.</p>	Process
8	<p><b>[TranInd] Indicators derived from Transport statistics</b>            Description: Transport safety: data collection on transport safety statistics, having as data suppliers DG MOVE, European Rail Agency, European Maritime Safety and European Aviation Safety Agency. Modal split indicators represent the relative share of each individual transport mode in the overall transport performance and are obtained from datasets of various transport modes using the same measurement unit. Intermodal transport statistics, including logistics indicators. In-depth analysis of methodology to produce intermodal transport statistics.            Product(s): • [Tran-Ind] Transport indicators.</p>	Process
8	<p><b>[TRIS] Modernisation and integration of Transport Information System</b>            Description: TRIS (TRansport Information System) is an Information System Framework implementing/integrating/documenting the Transport Statistics IT systems as sub-systems (Road, Rail, Aviation, Maritime, Inland Water Ways, Regional Transport, Common Questionnaire and Modal Split Indicators).            Output(s): • Evolutive maintenance of all TRIS subsystems; Production of a feasibility study on the integration of TRIS with IS4STAT (Information System for Statistics).</p>	Project (2009-2020)
8	<p><b>[Urb] Urban statistics</b>            Description: Urban Statistics cover a range of statistical indicators for European cities. A smaller set of indicators are produced on an annual basis and a larger one on a multi-annual basis complemented by methodological work using small area statistics harvesting big data sources and open data sources.            Product(s): • [Urb] Key indicators on European cities.            Other output(s): Inventory of novel methods for obtaining small scale statistics making use of advanced techniques and taking into account national experiences in the area.            Other financing DG(s): REGIO.</p>	Process
9	<p><b>[368] Maintaining and promoting, as well as contribution to the further enhancement, implementation and monitoring of the Common Quality Framework and the Quality Assurance Framework in Eurostat and the European Statistical System</b>            Description: Work on maintaining and promoting, as well as the further enhancement, implementation and monitoring of the Common Quality Framework and the Quality Assurance Framework (QAF) in Eurostat and the European Statistical System (ESS).            Output(s): • Prepare the next revision of the ESS Code of Practice • Prepare and follow-up reports of the Quality Reviews in Eurostat • Monitor the Improvement Actions identified in the second round of ESS peer reviews • Follow-up the Inventory of national guidelines (according to Art. 5. 2g of amended Reg 223) and the issue of regionalised and decentralised statistical systems (ESGAB recommendation) • Implement and follow-up the updated error management procedure within Eurostat.</p>	Process
9	<p><b>[375] Exchange of views and experiences, co-operation and coordination of quality work in Eurostat, the European Statistical System and beyond</b>            Description: Support, facilitate and assure the coordination of quality work in Eurostat, the European Statistical System and beyond; work on co-operation on quality issues.            Output(s): • Assure coordination of quality work within Eurostat by e.g. organising regular meetings of the internal coordination group (CGQ). • Keep regular contact with the main stakeholders, i.e. Working Group on Quality in Statistics, DIME/ITDG, users of statistics, ESGAB). • Prepare, award and monitor the implementation of the grant agreement for the organisation of the biennial quality conferences. • Provide (internal and external) training courses and presentations on quality issues, in accordance with the priorities identified • Contribute to internal and international cooperation on quality issues, in accordance with the priorities identified • Keep the web pages up-to-date, enrich them continuously with the latest information and developments • Carry out the supporting / administrative activities of the team.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/Process
9	<p><b>[666] Development and promotion of European Statistical System (ESS) quality standards, quality guidelines and positions, providing advice on quality issues</b>            Description: Work on the development and promotion of European Statistical System (ESS) quality standards, quality guidelines and positions, providing advice on quality issues.            Output(s): • Prepare and publish the second revision of the ESS Handbook for Quality Reports • Follow-up the ESTP training course on quality reporting, organise new course as appropriate • Follow-up the implementation of the standardised quality and metadata reporting in the ESS • Give advice, prepare positions on quality issues and publish them, as appropriate • Give advice and prepare positions on the ESS quality reporting standards and guidelines and promote them as appropriate.</p>	Process
9	<p><b>[680] QUAL@ESS Vision 2020 Supporting Framework - Develop and implement enhancements to quality management in the European Statistical System</b>            Description: Work in close cooperation with Member States on enhancing quality management in the European Statistical System.            Output(s): • Quality actions under the umbrella of the ESS Vision 2020 being developed and implemented in cooperation with Member States.</p>	Project (2014-2020)
9	<p><b>[MonPRactions] Monitoring of ESS improvement actions</b>            Description: Monitoring of European Statistical System improvement actions in response to peer reviewers' recommendations.            Output(s): • European Statistical System Committee documents.</p>	Process
10	<p><b>[COSTS] Cost assessment - production of statistics in Eurostat and the ESS</b>            Description: Support cost-benefit analysis of projects and products in Eurostat and Member States.            Output(s): • European statistics in Eurostat and the ESS for 2016: Results of the cost assessment in the ESS and in Eurostat.</p>	Project (2015-2017)
10	<p><b>[FinalESPeval] Final evaluation of the ESP 2013-20 *NEW*</b>            Description: Final evaluation of the implementation of the European statistical programme 2013-20. This project depends on the approval of the extension of the ESP to 2018-20.            Output(s): • Evaluation roadmap, contractor selected via a call for tender.</p>	Project (2017-2021)
11	<p><b>[372] Enterprise Architecture</b>            Description: Integration and standardisation of EU statistics production processes including information models and data warehousing.            Output(s): • Progress in the integration and standardisation of EU statistics production processes, incl. running of EG on Standardisation. • Reference architecture for Eurostat and related implementation roadmaps (validation, data integration ...). • EA reviews of ESTAT IT projects for the IT Design Board.</p>	Process
11	<p><b>[379] IT Coordination and Management</b>            Description: Information technology Resource Manager (IRM) roles and responsibilities: relations DIGIT, organise IT Advisory Committee (ITAC), ensure ESTAT participation to Digital Stakeholders Forum (DSF), review and approval of IT expenditure in line with ESTAT IT master plan.            Output(s): • Governance of IT services across DIGIT and Local IT, overall Service level management across IT providers.</p>	Process
11	<p><b>[381] Workplace services - HW/SW management</b>            Description: Manage hardware (HW) and software (SW) of Eurostat internal IT end-users.            Output(s): • Management of licenses for software (which is) used on end-user devices. This includes the timely extension of maintenance contracts. • Proper management of hardware used by end-users. This includes the timely provisioning of PCs/laptops to ESTAT staff and the correct inventarisation of equipment.</p>	Process
11	<p><b>[401] Renovation of Eurostat's dissemination chain for reference data</b>            Description: The Eurostat dissemination chain for reference data composed of several databases and software components will be renovated, i.e. redeveloped based on an integrated new architecture. The legacy dissemination chain will be progressively phased out. A dissemination chain for reuse by other Commission Directorates General (DGs) will be produced by the project as well.            Output(s): • Renovation - Delivery of an ALPHA release of all renovated Eurostat dissemination chain components, allowing the start of User's Acceptance Testing. • Reuse 1 - Delivery of an ALPHA release for the whole reusable dissemination chain, allowing the start of User's Acceptance. Testing by 3 DGs. • Reuse 2 - Delivery of a BETA release for the whole reusable dissemination chain, allowing the completion of User's Acceptance. Testing by 3 DGs.</p>	Project (2014-2018)
11	<p><b>[404] Improve the EDC; contribute to EDC renovation; make EDC available to other Commission DGs</b>            Description: Actively contribute to the renovation of the Eurostat Dissemination Chain (EDC), participate to task forces to analyse requirements and solutions. Coordinate and supply statistical support for the use of the EDC by other Commission DGs.            Output(s): • Central data and metadata support services provided to other DGs of the European Commission. • Central data and metadata support services provided to the Eurostat/ESS data and metadata producer.</p>	Project (n.a.-2020)

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/Process
11	<p><b>[405] Implement the SDMX standards in European Statistical System and beyond</b>            Description: Implement the Statistical Data and Metadata Exchange (SDMX) standards in statistical domains, support the harmonisation and integration of the underlying statistical business processes.            Output(s): • SDMX standardisation services provided for statistical domains.</p>	Process
11	<p><b>[406] Provide user services for European Statistical System data validation and eDAMIS</b>            Description: Provide first level eDAMIS (electronic Data files Administration and Management Information System) user services to Eurostat and ESS users; provide first level user services related to data validation services to Eurostat and ESS users.            Output(s): • User services provided for eDAMIS and ESS data validation. • eDAMIS and Validation Services User Group (EVUG).</p>	Process
11	<p><b>[408] Support the legislation of European Statistical System standards</b>            Description: Support the legislation of statistical and technical standards in statistical domains; monitor and evaluate the ESS vision implementation grants.            Output(s): • Legal advice services related to ESS standards provided.</p>	Process
11	<p><b>[409] Management and support of ESS classifications (including legislation)</b>            Description: Produce, update and disseminate ESS horizontal classifications and related metadata in RAMON; produce, update and disseminate harmonised ESS structural metadata (code lists) and other metadata (e.g. CODED - Concepts and Definitions Database); ensure the user support for ESS classifications and other metadata to the ESS and professional associations.            Output(s): • Standardisation services related to ESS classifications and structural metadata provided. • Standards working group. • Statistical classification Task Force.</p>	Process
11	<p><b>[410] Provide input to the international work for statistical standards and metadata (UNECE, UNSD, SDMX)</b>            Description: Provide input and support to international work for statistical standards and metadata. This includes collaboration with UNECE Modernisation Committee on Standards, active participation in UNSD Expert Group on international statistical classifications and cooperation with SDMX constituency, including support of SDMX secretariat and SDMX sponsors.            Output(s): • Activities and services supporting international work on statistical standards and metadata. • Services provided to the SDMX secretariat.</p>	Process
11	<p><b>[619] Big Data Privacy Issues</b>            Description: Many of the big data sources are held by third parties and contain personal data. Access and use of such data raise several issues regarding the protection of privacy. This work will examine in detail the adequacy of the provisions of the current EU data protection legislative reforms in the age of Big Data.            Output(s): • Inception report on review of legal situation related to access and use of selected big data sources. • Legal review: country report Belgium. • Inception report related to ethical review. • Report review of ethical issues related to big data usage.</p>	Project (2014-2017)
11	<p><b>[621] IT for dissemination of data and metadata</b>            Description: Maintenance and support of Information Systems for the dissemination of data and metadata - for Eurostat, and for potential sharing in the European Statistical System.            Output(s): • Dissemination chain for reference data: support, and corrective and evolutionary maintenance. • COMEXT (Eurostat reference database for external trade statistics production, dissemination and energy statistics).</p>	Process
11	<p><b>[622] IT for data exchange</b>            Description: Maintenance and support of Information Systems for the exchange of data and metadata in the European Statistical System.            Output(s): • eDAMIS (Electronic Data files Administration and Management Information System): support, and corrective and evolutionary maintenance. • SIMSTAT (Single Market Statistics): support for the SIMSTAT IT system after the trial data collection. • Census HUB: support, and corrective and evolutionary maintenance, and information of Member States. • ESS-MH (Metadata Handler): support, and corrective and evolutionary maintenance.</p>	Process
11	<p><b>[623] IT for statistical production</b>            Description: Maintenance and support for production chains, implementation of new production chains using corporate IT tools.            Output(s): • Implementation of production chains for new data collections. • Information systems for statistical production: support, and corrective and evolutionary maintenance. • Migration of "local" production chains towards corporate solutions.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
11	<p><b>[624] IT for standardisation of data and processes</b>            Description: Maintenance, support and development of tools and services for standardisation of data and processes.            Output(s): • SDMX (Statistical Data and Metadata Exchange) tools: support, and corrective and evolutionary maintenance. • Standard data collection tool based on Excel and SDMX: support, and corrective and evolutionary maintenance. • Participation in international activities related to SDMX, in particular representing Eurostat in the SDMX. Technical Working Group. • SDMX.tools Task Force. • VTL design and implementation.</p>	Process
11	<p><b>[625] IT governance</b>            Description: IT strategy, IT governance (reaches across several units in the Directorate).            Output(s): • IT strategy: regular update and progress reporting. • Product management and product family management. • IT rationalisation: reduce the number of IT applications. • SISAI (Statistical Information Systems Architecture and Integration) / IT Working Group. • Framework contract(s). • UNECE (Economic Commission for Europe of the United Nations) Modernisation Committee Production &amp; Methods.</p>	Process
11	<p><b>[704] Local Data Centre Consolidation</b>            Description: Continue during 2017 to migrate Infrastructure towards DIGIT Data Centre - under DIGIT governance and execution. This internal project is to ensure support from ESTAT on this migration.            Output(s): • Transition Local Servers from BECH Local Server Unit and JMO to future Data Centre selected by DIGIT as long term solution for JMO Exit.</p>	Project (2016-2018)
11	<p><b>[707] Standardisation of ESS structural metadata (code lists) and alignment with the SDMX code lists</b>            Description: This process contains standardisation of code lists and their alignment with the Statistical Data and Metadata Exchange (SDMX) code lists.            Output(s): • Provision of service "Metadata: harmonisation, maintenance and dissemination".</p>	Process
11	<p><b>[711] IT tools for data processing</b>            Description: Maintenance and development of tools for data processing.            Output(s): • Information System for Statistics (IS4STAT), Multi-dimensional tables (MDT), FAME (Statistical production system specialised in processing time series) interfaces, Eurocube interfaces. • Jdemetra+ connection to FAME. • Validation implementations.</p>	Process
11	<p><b>[744] Implementing a common validation approach</b>            Description: The project will focus on (1) Piloting and implementation of the ESS methodological handbook produced by the ESS.VIP Validation, (2) Pilot implementation and further development of VTL (Validation and Transformation Language), with the ultimate objective of adopting it as a standard ESS syntax for the description of validation rules, (3) Towards a validation policy that details the links between validation and compliance.            Output(s): • Evaluation of VTL version 1.1. • Steps towards an ESS validation policy. • Piloting of the implementation of VTL.</p>	Project (2016-2019)
11	<p><b>[794] Methodological Support Big Data *NEW*</b>            Description: The use of big data for official statistics is a very new topic for statistical services. Skills related to computer science, statistics and domain specific knowledge are required to successfully perform projects in this domain. New methods for data analysis, processing and management have to be applied. There is a lack of data scientists in statistical offices. This lack should be compensated using contracts on methodological support for Big Data projects internal to Eurostat.            Output(s): • Methodological Reports and scientific papers on different aspects of the Big Data Roadmap and Action Plan: Ethics, Privacy and Confidentiality, Statistical Methodology, Quality, Big Data Sources.</p>	Project (2017-2017)
11	<p><b>[795] IT Client Engagement *NEW*</b>            Description: Coordinate IT engagement with all units and ensure business plans are correctly reflected in IT plans.            Output(s): • User satisfaction feedback on overall IT services. • Alignment of Business projects with IT Projects. • Regular engagement with Units to collect their feedback on quality of IT services and to collect additional business requirements that need IT support.</p>	Process
11	<p><b>[796] Coordination of IT Design Board *NEW*</b>            Description: Coordination of the activities of the IT Design board established in 2015 by the new IT Governance.            Output(s): • Organize technical reviews for all new projects in ESTAT and confirm compliancy with IT strategy and IT principles outlined in IT Strategy/Governance documents.</p>	Process
11	<p><b>[798] Coordination of the Project Management activities in the Directorate *NEW*</b>            Description: Provide PMO like support inside the Directorate including the maintenance of the project repository.            Output(s): • Provide support for project managers inside the Directorate for IT projects. • Harmonise the use of project document by providing templates and repository.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
11	<p><b>[ADMIN] ESS.VIP on administrative data sources (ESS.VIP.BUS.ADMIN)</b></p> <p>Description: The ADMIN project is a coordinated set of actions aiming to support Member States in using administrative data sources without compromising output quality.</p> <p>Output(s): • Access to and development of data sources (reports, best practices and recommendations, preparation of long-term EU actions on improving access). • ESSnet on quality of multisource statistics. • combining administrative sources and surveys using modelling and estimation methods. • Development of quality standards for statistical frames for social statistics. • Pilot and implementing actions in Member States.</p>	Project (2012-2019)
11	<p><b>[BIGD] ESS.VIP BIGD</b></p> <p>Description: In the Scheveningen Memorandum (27/09/2013), the DGINS called for a Big Data Action Plan and Roadmap (BDAR) to follow up its implementation. The BDAR 1.0 was adopted by the European Statistical System Committee on 26/09/2014 and contains a list of actions for achieving the long-term goal of integrating big data sources into official statistics' production.</p> <p>Output(s): • Proposal for a data strategy for Big Data and Official Statistics. • Launch of pilots on big data and official statistics. The following data sources/domains are being envisaged: Web-scraping from internet websites for job vacancies, Smart electricity meters for energy consumption and other applications (use of buildings/apartments for different purposes), Automatic vessel identification system as frame for improving maritime transport statistics, estimates of fuel consumption and identification of activities on sea, e.g. fishery. • Combination of various data sources for tourism statistics. • Conditions of access and use of mobile phone data / Analysis of portfolio of statistical outputs from mobile phone data. • Cross-sectional work on methodology, quality, IT infrastructure and dissemination. • Ethical review and guidelines on big Data and Code of practice/principles of official statistics of the UN as input to discussions on updating European statistics code of practice. • Definition of communication strategy for big data and official statistics. • Review of legal conditions on using big data for official statistics. Statistical laws at European and national level, data protection and privacy laws as well as sectoral legislation will be examined considering selected big data sources (mobile communication, websites and social media, smart meters). Final output will be available in 2017. First outputs on EU laws in 2016. • Training strategy to bridge the big data skills gap within the ESS. • Workshop on Big Data. • Run tests and pilots on Sandbox (= a server environment run by the Irish Centre for High End Computing for supporting international collaboration projects on analysing big data for official statistics).</p>	Project (2014-2020)
11	<p><b>[CollEconPlatf] Collecting Data and Compiling Statistics on the Collaborative Economy *NEW*</b></p> <p>Description: The aim of the project is to start a regular production of statistics on the collaborative economy and to improve the quality of existing data collections. The aim is also to tackle several long term strategic issues related to the production of official statistics in an increasingly digitised world: An efficient collection of basic data from owners of private data (Collaborative Economy Platforms) and exploring new ways of collaboration with NSIs. The statistical domains affected include national accounts, business- and labour market statistics. Some attention will be paid to tourism statistics.</p> <p>Product(s): • [NAMA] Annual national accounts. • [Tran-Ind] Transport indicators. • [EmplUnempl] Employment and unemployment. • [LMP] Labour market policy. • [GVC-Ind] Globalisation indicators. • [SBS] Structural Business Statistics. • [TourAcc] Tourism industry - accommodations. • [DAE] Digital Agenda for Europe. • [ISocEnt] Information society - enterprises. • [ISocHI] Information society - households and individuals.</p> <p>Other output(s): • Defining new statistics to be produced. • Agreeing on statistical methodology. • Setting up new data collection systems in corporation with NSIs. • Developing new IT infrastructure.</p>	Project (2017-2019)
11	<p><b>[DARA] Infrastructure for the release of confidential data for scientific purposes - decentralised and remote access to confidential data in the ESS</b></p> <p>Description: To set up a network of national safe centres in the ESS providing access to EU secure use files; data should be accessible remotely from the safe centres to the central node in Eurostat. (linked with its IT component developed as part of project 705).</p> <p>Output(s): • Pilot of remote access system connecting safe centres in national statistical institutes to the central node where the data are stored.</p>	Project (2014-2017)
11	<p><b>[DWH(CoE)] Centre of Excellence on Data Warehousing</b></p> <p>Description: Main goal of the Centre of Excellence on Data Warehousing (DWH) is to support member states implementing the results of the ESSnet on DWH. The Centre offers (ad-hoc) support and consultancy to European Statistical System members on specific subjects and projects as requested.</p> <p>Output(s): • Support to ESS in DWH implementation. • Orientation of DWH work in ESS towards sharing services, taking into account new technological opportunities (data virtualisation). • Maintenance of conceptual framework for data warehousing infrastructural architecture.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
11	<p><b>[EA] Framework - Enterprise Architecture</b>            Description: Support to and review of ESS Vision 2020 implementation portfolio and project. Coordination and coherence of the development of cross cutting solution architectures supporting the integration of EU statistics production processes. Development and maintenance of ESS Reference Architecture for improving efficiency and quality of statistical production. Development, maintenance and promotion of standards aiming at higher integration of ESS processes.            Output(s): • Architectural principles and framework for Vision implementation and process integration updated. • Review and assessment of cross cutting architecture developments. • Up to date and comprehensive ESS EA Reference Framework. • Gradual development and use of shared components. • Communication and capacity building. • Coordination and coherence with other developments (UNECE, technological innovation, ...). • Architecture roadmaps for ESS Vision 2020 implementation projects.</p>	Project (2013-2020)
11	<p><b>[EGR(IT)] EuroGroup Register (EGR) - testing</b>            Description: The EGR applications are tested.            Output(s): • EGR applications tested.</p>	Project (n.a.-2019)
11	<p><b>[EGR] Business registers - coordination and monitoring; EuroGroup Register (EGR) - production and dissemination</b>            Description: Business register coordination and monitoring; EGR data production and dissemination.            Product(s): • [EGR] Aggregated statistics based on EGR.            Other output(s): • National business register coordinated and monitored; regular EGR data produced and disseminated.</p>	Process
11	<p><b>[ESBRs(IT)] European System of Interoperable Business Registers (ESS.VIP Business Project ESBRs) - IT part</b>            Description: IT developments in Interoperable Business Registers (ESBRs) including EGR (EuroGroups Register) 2.0 and IPT tool (for Profiling).            Output(s): • EGR 2.0 development. • IPT development and integration into EGR.</p>	Project (2013-2018)
11	<p><b>[ESBRs] European System of Interoperable Business Registers (ESS.VIP Business Project ESBRs)</b>            Description: Development of the Business Architecture, and implementation of interoperability framework.            Output(s): • Interoperability Framework business model established. • Pilot implementation by some Member States of a subset of the agreed set of rules (interoperability framework) for the system of SBRs (Statistical Business Registers). • Proposal of selected statistical services. • Workshops for dissemination of the ESBRs results.</p>	Project (2013-2018)
11	<p><b>[ESDEN] European Statistical Data Exchange (ESS.VIP Cross-cutting infrastructure ESDEN)</b>            Description: Modernisation of the services offered to the European Statistical System for data exchange in order to increase the capacity and improve the interoperability and security to cope with the increasing needs of the ESS.            Output(s): • Execution of the second phase of the ESDEN project including the following activities: • Connection of countries to secure network for the exchange of confidential data. • Development of the new interfaces for exchanging of data (Web services). • Modernisation of the current Single Entry Point (EDAMIS).</p>	Project (2013-2018)
11	<p><b>[ESP] European Statistical Programme extension 2018-20</b>            Description: Preparatory work for an extension of the European Statistical Programme (ESP) covering the period 2018-2020, on the basis of the intermediate progress report of the ESP. The Commission proposal may be submitted to EP and Council by December 2016.            Output(s): • Adoption by the EP and the Council.</p>	Project (2014-2017)
11	<p><b>[ESPbeyond2020] European Statistical Programme beyond 2020 *NEW*</b>            Description: Preparatory work for a new European Statistical Programme (ESP) to cover the New Multiannual Financial Framework (MFF) period beyond 2020.            Output(s): • Business case for a new programme.</p>	Project (2017-2020)
11	<p><b>[ESS.VIP.PGM] ESS Vision 2020 Portfolio management</b>            Description: ESS Vision 2020 portfolio governance, responsibilities, resources, administrative mechanisms, communication, monitoring.            Output(s): • Assess VIP, ESSnet, ESS.VIP projects impacts. • Implementation of ESS Vision 2020. • Communication actions.</p>	Process
11	<p><b>[ESS-ITSEC-ASS] Implementation of the European Statistical System IT Security Assurance mechanism *NEW*</b>            Description: Implement and manage the IT security assurance mechanism in the European Statistical System (ESS) and report annually to the European Statistical System Committee (ESSC).            Output(s): • IT security certification for ESS members - audit reports - annual reporting to ESSC on certification mechanism.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
11	<p><b>[ESS-ITSEC-SUPP] Support to ESS members on IT security improvement *NEW*</b></p> <p>Description: Implement and manage supporting mechanism to ESS members for improving their IT security framework in order to support the exchange of microdata (VISION 2020).</p> <p>Output(s): • Grants provided to ESS members. • List of supported ESS members. • Report on achievement of IT security in ESS members.</p>	Project (2017-2019)
11	<p><b>[FIMS] Framework for Information Models and Standards</b></p> <p>Description: Develop, maintain and build capabilities for information models and related standards for European Statistical System data and metadata.</p> <p>Output(s): • Maintenance and enhancement of information standards (Statistical Data and Metadata Exchange (SDMX), Validation and Transformation Language (VTL), Data Documentation Initiative (DDI), Data Catalogue Vocabulary (DCAT), etc.) and related capacity-building actions. • Guidelines for describing and handling aggregated and micro-data in the corporate information system. • Analysis of needs and requirements for metadata repositories and registry. • Support to other projects in the area of information models and standards.</p>	Process
11	<p><b>[INTRASTAT] Implementation of a redesigned and modernised Intrastat system following the ESSC orientation on the results of the ESS.VIP REDESIGN and the ESS.VIP SIMSTAT *NEW*</b></p> <p>Description: This project will implement the redesign of the Intrastat system in accordance with the orientation taken by the ESSC in May 2016, which includes setting up the following enabling measures (themes): new legal provisions in the context of FRIBS, enhancement of innovative compilation methods and of the quality monitoring, implementation of a new data source (of the Intra-EU micro data exchange ) in the statistical production process with the necessary accompanying measures on confidentiality and security, Administrative Burden Reduction initiatives, communication at European and national level, globalisation and evaluation.</p> <p>Output(s): • FRIBS (Framework Regulation Integrating Business Statistics) basic act incorporating new legal provisions on the modernised Intrastat system, draft implementing and delegated acts, progress reports on the work carried out under the various themes.</p>	Project (2017-2020)
11	<p><b>[ITSEC-GOV] Put in place a security governance in Eurostat and in the European Statistical System</b></p> <p>Description: Define and put in place with ESS members IT security standards in order to ensure secure and reliable exchange of confidential information. Put in place a decision body related to IT security related issues within the ESS. Ensure IT security governance in Eurostat.</p> <p>Output(s): • Implementation and communication about the common IT security standards for Information Exchange. Documentation of ESS hardware and software architectures for security purposes in order to cope with the diversity of the ESS environments. • Management of the Expert Group on ESS IT security for elaborating and monitoring security aspects of information (data, email, micro-data, documentation) exchange in the ESS. • Security governance aligned with ESS security strategy, ESTAT IT Strategy, ESTAT Information Security Policy, Enterprise Architecture (EA) governance and project portfolio management (PPM).</p>	Process
11	<p><b>[ITSEC-PROT] Protection of information systems</b></p> <p>Description: Detection of intrusion, penetration test on ESTAT IT systems, liaison with DIGIT CSIRC (Computer Security Incident Response Capability) for detection of vulnerabilities, reporting on security incident, monitoring, follow-up and provision of recommendations for improving security of Information Systems.</p> <p>Output(s): • Receipt and analysis of logs coming from all ESTAT IT systems with Splunk. Penetration tests.</p>	Process
11	<p><b>[METHODOLOGY] Methodology in official statistics</b></p> <p>Description: Provide within Eurostat and to other DGs methodological expertise, user support and training to improve statistical production processes and quality of output, incl. through the methodological helpdesk and the methodological framework contract. Organisation of and secretariat to DIME/ITDG meetings.</p> <p>Output(s): • Methodological support provided within Eurostat, incl. to ESS VIP 2020 ADMIN. • Methodological support provided to other Commission DGs. • DIME/ITDG plenary and SG, WG Methodology meetings organised. • METAC, Eurostat methodological network organised.</p>	Process
11	<p><b>[NAPS-S] National Accounts service oriented architecture &amp; production system</b></p> <p>Description: Follow-up project of the VIP NAPS that will move the harmonised and consolidated ESTAT National Accounts Production System into a Service Oriented Architecture (SOA) and incorporate 1-2 services to be shared with the Member States.</p> <p>Output(s): • Eurostat National Accounts Production System offering 1-2 shared services to the Member States in an Service Oriented Architecture (SOA).</p>	Project (2015-2017)
11	<p><b>[SA(CoE)] Centre of Excellence on Seasonal Adjustment</b></p> <p>Description: Activities supporting the testing and the promotion of JDemetra+ (seasonal adjustment software). Support, training and coaching of Seasonal Adjustment practitioners.</p> <p>Output(s): • Co-ordination of seasonal adjustment in the ESS and with the ESCB. • Development specifications, testing and support for JDemetra+. • Organisation of hackathon on seasonal adjustment. • Seasonal Adjustment Expert Group.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
11	<p><b>[SERV] Sharing SERVICES (ESS.VIP Cross-cutting infrastructure SERV)</b>            Description: SERV aims at creating the conditions for sharing statistical services and supporting their integration in statistical production processes at national, European Statistical System and Commission level.            Output(s): • Prototype for a platform to share services in the European Statistical System (part of ESS.VIP programme; SERV activity). • Participate in international activities related to CSPA (Common Statistical Production Architecture). • Data Validation Service that can be shared in the European Statistical System. • The ESSnet Sharing common functionalities in the ESS will be operational. • Task Force shared SERVICES. • CSPA service catalogue: maintenance &amp; support.</p>	Project (2013-2018)
11	<p><b>[SmartStatistics] Smart Statistics *NEW*</b>            Description: The aim of this project is to analyse the technological foundations of the statistical and information system of 2025 which will operate within an enlarged digitisation of our societies and greater interactions between the web, the web of data and a multitude of smart environments (Internet of Things (IoT), smart cities, industry 4.0, etc.). The project should analyse latest developments and future perspectives in various domains that will be affected by the IoT and other smart environments, such as energy, transport, employment, health, population, economics, consumption, etc.). Particular attention will be paid to the blending of traditional core survey instruments and sources (LFS, SILC, Health, etc.) with big data, and the development of competence centres capable of delivering comprehensive data and visual analytics and dissemination services for EU policies.            Output(s): • A proof of concept of the implications of the Internet of Things on Official Statistics. • Proposal of use cases that could be followed up in future projects; they will be mapped against the 10 priorities of the European Commission and the potential for providing near real time policy relevant information.</p>	Project (2017-2018)
12	<p><b>[402] Manage and improve the Reference environment for dissemination.</b>            Description: Daily management of the Reference environment for dissemination including: • Improve the quality of data presentation. • Maintain and monitor the data navigation tree (EN, FR, DE). • Create and maintain the derived tables, including EU policy indicators. • Implement and maintain code lists (EN, FR, DE). • Contribute to the definition of data structures and standard code lists.            Output(s): • Central data production and dissemination services provided for European and other statistics.</p>	Process
12	<p><b>[403] Manage the production, dissemination and standardisation of European Statistical System reference metadata</b>            Description: Manage the production, dissemination and standardisation of ESS reference metadata using ESMS (Euro SDMX Metadata Structure), ESQRS (ESS Standard for Quality Reports Structure) and EPMS (Euro Process Metadata Structure); maintain and improve the ESS Metadata Handler; manage the content of the Euro SDMX (Statistical Data and Metadata Exchange) Registry; provide reference metadata services to other DGs of the European Commission.            Output(s): • Central ESS metadata production and dissemination services provided (including SDMX Registry services). • Standards Working Group. • Metadata Task Force.</p>	Process
12	<p><b>[412] Eurostat website</b>            Description: The website provides a stable access to Eurostat products and services, with enhancements for users. Evolutionary maintenance and quality assurance of the website, including purchases of hardware and software.            Output(s): • Make of our website an attractive and easy source of information on European statistics for citizens. Ensure high availability, performance and continuous improvements of functionality, usability and web content.</p>	Process
12	<p><b>[413] Statistics Explained</b>            Description: Maintenance, further development and content management (including translation) of the on-line dissemination system "Statistics Explained".            Output(s): • Wide range of explanatory information and analysis is continuously updated and delivered to users through an on-line dissemination system. • A new section of Statistics Explained will be dedicated to basic users. This section will aim at making statistics understandable for people having limited knowledge in the domain (such as students at secondary school). It will be developed in the frame of the DIGICOM project on statistical literacy after consultation of the ESS members in order for them to possibly re-use it.</p>	Process
12	<p><b>[416] Enhance reusability</b>            Description: Facilitation of the re-use of Eurostat data, metadata and tools by external organisations, including NSIs, companies and the open data community in the framework of the renovation of the dissemination chain.            Output(s): • Information and promotion towards users, to achieve the widest possible re-use of statistical information produced by the European Statistical System (ESS), to implement the common ESS policy on free access to and re-use of data.</p>	Project (2014-2017)

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/Process
12	<b>[421] Publications</b> Description: Widespread dissemination of Eurostat's value-added output through electronic and paper publications. Production, dissemination and archiving of statistical publications, including the implementation of the annual publications programme. Output(s): • Full range of publications oriented to users' needs, all available via the website. Small number of printed and cross-cutting publications, including two flagship publications. Editorial services offered to the production units.	Process
12	<b>[501] European Statistical System report</b> Description: Preparation of the annual report of the European Statistical System. Output(s): • Publication of the annual report of the ESS.	Process
12	<b>[502] Internal communication to Eurostat staff</b> Description: Internal communication to Eurostat staff using a variety of channels, such as the intranet, Eurostat Infos or meetings; relations with the internal communication network. Output(s): • Intranet up-to-date. • Publication of several news items each day. • Publication of several issues of Eurostat-Infos, the Eurostat newsletter.	Process
12	<b>[504] Media relations and related activities</b> Description: Press office activities such as preparation and dissemination of news releases, factsheets and info graphs, preparation and organisation of press briefings, preparation of LTTs (lines to take) on sensitive issues, preparation and validation of interviews with top management, relations with the spokesperson service and the external communications network. Output(s): • Publication of around 200 news releases, fact sheets or info graphs in three languages. • Press briefings and interviews, if and when appropriate. • LTTs upon request.	Process
12	<b>[611] Rationalise the purchases of external databases</b> Description: This process contains: to rationalise the purchases of external databases within the European Commission. Output(s): • Coordination services provided with regard to the purchases of external databases for the European Commission.	Project (2014-2017)
12	<b>[612] Management of external users support network</b> Description: Management of contracts for all external users support centres; coordination of the network and participation in the quality control. Output(s): • Management of contracts for all external users support centres; coordination of the network and participation in the quality control.	Process
12	<b>[613] Promotion of European statistics</b> Description: Production and development of different communication and promotional tools about Eurostat and European statistics. Output(s): • Production and dissemination of communication tools (posters, postcards, calendars ...). • Organisation of joint (Eurostat/NSI) events to promote European statistics to users.	Process
12	<b>[614] Media, institutional and user support</b> Description: Support for users from the media, the institutions and the general public. Output(s): • Answering user requests from media, EU institutions and the general public.	Process
12	<b>[697] Regular update and enrichment of Basext</b> Description: This process includes maintenance, improvement and further development of data and metadata disseminated in Basext (Statistical portal of International data and metadata). Output(s): • Provision of service "Dissemination of other statistics through Basext".	Process
12	<b>[745] Continuous adaptation of dissemination products and services to user needs</b> Description: Engage with users of European statistics in order to better identify their needs. Production of (shareable) visualisation tools/info graphics strengthening the user-orientation of Eurostat website. Development of dissemination products which enable users to obtain statistics on a range of mobile devices, including smartphones, tablets and e-readers. Output(s): • In the frame of the DIGICOM project, conduct a user profiling exercise and set-up a social network platform for communicating with users of European statistics. • Innovative shareable visualisation tools/info graphics on Eurostat website and dissemination products for mobile devices. • Release of a new ESS multi-media product on the EU.	Process
12	<b>[802] Social media</b> Description: Dissemination of Eurostat output via social media; relations with the Commission social media network. Output(s): • Regular dissemination of latest statistics via Twitter and Facebook (the latter pending approval by DM).	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/Process
12	<b>[803] Vision newsletter</b> Description: Preparation of the quarterly vision newsletter. Output(s): • Publication of 4 editions of the vision newsletter.	Process
12	<b>[CoE-SDC] Centre of Excellence on Statistical Disclosure Control (ESSnet)</b> Description: Development and maintenance of methodology for statistical disclosure control, incl. tools and methods for tabular and micro-data protection. Output(s): • Recommendations for the protection of 2021 census data and grid data. • User group for SDC tools. • Inventory of SDC tools functionalities.	Project (2014-2018)
12	<b>[DIGICOM] ESS.VIP DIGICOM</b> Description: Execution of DIGICOM project in line with project plan. Output(s): • Social network platform. • High-level conference, preceded by roundtables. • steps towards ESS open data gateway, incl. ESS workshop on open data. • Development of statistical literacy products.	Project (2015-2019)
12	<b>[ITSEC-MGT] Information Security management</b> Description: Follow-up of Eurostat Information Security Policy. Use of secure emailing, access rights, protection of information, implementation of security standards, liaise with DG HR/DS and DIGIT. Output(s): • Communication on security aspects. Information and awareness of security matters to ESTAT staff. • Management and update of ESTAT Information Security Policy. Report on security standards implementation. Development of security notices for the policy implementation. • Management of access rights, encryption mechanisms and passwords for the following applications: SECEM, RUE, LANCRYPT, NOAH, WINPT/WINPG, security conventions, tokens, specific access rights. • Monitoring and improvement of security of IT systems, screening and checking of BIA (business impact assessment) and Security plans. • Follow-up of security of ESTAT environment hosted in DIGIT.	Process
12	<b>[ITSEC-REC] Making confidential data available to researchers for scientific purposes</b> Description: Ensure access to confidential data for researchers either through the Eurostat Safe Centre or through the development of a secured remote access facility. Output(s): • Availability of the ESTAT environment for remote access to confidential data for researchers. • Management of Eurostat Safe Centre: Usage report.	Process
12	<b>[SDC(CoE)] Centre of Excellence on Statistical Disclosure Control</b> Description: Development and maintenance of methodology for statistical disclosure control, incl. tools and methods for tabular and micro-data protection. Output(s): • Support, development and maintenance of statistical disclosure control tools. • Development of a harmonised approach to the protection of 2020 census data. • Development/refinement of methodology for public use files.	Process
12	<b>[SDCMA] Statistical confidentiality and microdata access</b> Description: (1) Management and coordination of statistical confidentiality in Eurostat and within the ESS. (2) Methodological support on statistical disclosure control (3) Ensure smooth provision of access to confidential data for scientific purposes. Output(s): • Co-ordination of statistical confidentiality, incl. promotion of confidentiality charters. • Support on statistical disclosure control provided. • Access to microdata for researchers and provision of PUFs.	Process
13	<b>[EMOS] VIP - European Master in Official Statistics</b> Description: Implementation of European Master in Official Statistics (EMOS) in university Master programmes in collaboration with national statistical offices. Output(s): • Implementation of EMOS labelling and development of the EMOS network: secretariat to the EMOS Board meetings, EMOS Workshop, cross-border learning activities, and evaluation of EMOS.	Project (2009-2019)
13	<b>[ESTP] European Statistical Training Programme</b> Description: Design and implementation of the European Statistical Training Programme (ESTP) in Member States, including programme coordination, contract management and follow-up of courses. Output(s): • Around 45 courses organised in Member States, European Free Trade Association (EFTA) and Eurostat for European Statistical System (ESS) staff.	Process
13	<b>[RESEARCH] Research and innovation in official statistics</b> Description: (1) Support and promote research in official statistics. (2) Develop/support the research lines related to Official Statistics in the Horizon 2020 work programmes. (3) Dissemination modernisation and research project results. (4) Support to collaboration between researchers and official statisticians. Output(s): • NTTS (New Techniques and Technologies for Statistics) 2017 conference: organisation, execution and follow-up. • Research lines related to Official Statistics in the Horizon 2020 work programme. • Piloting of knowledge repository and other CROS developments. • Support to research projects on official statistics.	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
14	<p><b>[212] Commitments on Confidence in Statistics</b>            Description: Support Member States towards the establishment of Commitments on Confidence in Statistics to maintain confidence in European statistics and to maintain or improve the implementation of the European Statistics Code of Practice as laid down, from June 2015, in Regulation (EC) No 223/2009 on European Statistics. The aim of this project is to ensure establishment of the Commitments by Member States, or their submission of progress reports on efforts undertaken toward the establishment, in accordance with Article 11 of Regulation (EC) No 223/2009, with a view to the implementation of the enhanced ESS governance framework.            Output(s): • Commitments on Confidence signed by all Member States as well as EEA/EFTA states.</p>	Project (n.a.-2017)
14	<p><b>[228] Support the development of the statistical system in Greece through the provision of technical assistance in selected areas of statistics</b>            Description: Support the development of the statistical system in Greece through the organisation and management of technical assistance activities in the areas of public finance statistics, project management and selected statistical domains.            Output(s): • Quality of Greek statistical data improved.</p>	Project (2010-2020)
14	<p><b>[230] Coordinate, design, contract, implement and follow-up cooperation programmes for the Enlargement countries</b>            Description: Coordinate, design, contract, implement and follow-up cooperation programmes for the Enlargement countries to assist the alignment of their statistical production with the EU acquis.            Output(s): • 2017 IPA (Instrument for Pre-Accession Assistance) statistical cooperation programme - action fiche designed and approved. • Contributions to the National IPA (Instrument for Pre-Accession Assistance) programmes provided to ensure that the programmes address relevant EU acquis and are well coordinated with regional cooperation programmes. • Objectives of the IPA (Instrument for Pre-Accession Assistance) 2014 cooperation programme achieved and availability of data increased. • Implementation of the 2015 IPA programme started and follow-up ensured. • Memorandum of Understanding and corresponding annexed Service Level Agreement (SLA) with DG NEAR updated when necessary; Semi-annual IPA (Instrument for Pre-Accession Assistance) activity reports drafted and submitted to DG NEAR. • Semi-annual and end year reports on the SLA provided to DG NEAR in the framework of the AAR.            Other financing DG(s): NEAR.</p>	Process
14	<p><b>[233] Assess and monitor the statistical systems in the enlargement and ENP countries</b>            Description: Monitor the statistical systems in the Enlargement and European Neighbourhood Policy (ENP) countries using different assessment instruments (global assessments, peer reviews, sector reviews, compliance monitoring database, Eurostat annual programming missions).            Output(s): • A yearly monitoring report on the implementation of the Global Assessments (GAs) and peer reviews (LPRs) recommendations is available. • Assessment reports from Global Assessments (GA) and peer reviews (PR) and are available for selected enlargement and ENP countries. • Mission reports available for the visited countries. • Sector assessment reports for selected statistical domains are available for some enlargement and ENP countries. • 2017 compliance monitoring round conducted and Statistical Management Information System/SMIS(+) (acquis compliance) reports available for the enlargement countries. • New methodology for global assessments in the EECCA countries and for peer reviews in the enlargement countries implemented.</p>	Process
14	<p><b>[234] Coordination of statistical cooperation</b>            Description: Support and promote coordination of statistical cooperation activities for the enlargement and European Neighbourhood Policy (ENP) and Central Asia countries through donor coordination, organisation of meetings on statistical cooperation and a newsletter on cooperation news.            Output(s): • Annual donor coordination survey for the enlargement, European Neighbourhood Policy East and South and Central Asia countries implemented and results presented to the Management Group on Statistical Cooperation. • Working group meeting on statistical cooperation (MGSC) successfully held and key decisions on cooperation taken. • Quarterly newsletter on statistical cooperation published.</p>	Process
14	<p><b>[236] Support the EU enlargement policy</b>            Description: Support the EU enlargement policy through participation in sub-committee meetings under the Stabilisation and Association / European Agreements, following-up on commitments on chapter 18 from the negotiation process, contributing to the annual EU reports on the enlargement countries.            Output(s): • Input to sub-committees provided and meetings attended. • Input to the annual EU reports on the enlargement countries including the statistical annex provided to DG NEAR. • Negotiations on the statistics chapter with Montenegro pursued.</p>	Process
14	<p><b>[238] Cooperation programme to improve statistics in the ENP East countries</b>            Description: Transform the long-term strategy to improve statistics in the European Neighbourhood Policy (ENP) East region into a cooperation programme as a basis for Financing Decision, taking into account available funds.            Output(s): • Proposal for a regional programme for statistical cooperation available for discussion with DG NEAR.</p>	Project (2013-2019)

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/Process
14	<p><b>[250] Support the implementation of the European Neighbourhood Policy</b>            Description: Support the implementation of the European Neighbourhood Policy through input to EU progress reporting, to the Association Agendas/Association Agreements/other political agreements, to sub-committee meetings and through promoting the importance of statistics for evidence-based decision making for European policies (monitoring and design).            Output(s): • A section on statistics included in each political agreement negotiated. • Input to sub-committee meetings provided and meetings attended. • Input to the reporting on the ENP provided to the European External Action Service (EEAS) including the statistical annex. • Input to the Association Agendas provided to the European External Action Service (EEAS). • Provision of statistical data for policy purposes ensured.</p>	Process
14	<p><b>[251] Support to other Commission services in the design and implementation of ENP cooperation programmes with relevance for statistics</b>            Description: Support other Commission services in the implementation of technical assistance programmes in the European Neighbourhood Policy (ENP) - Medstat IV, SEIS, INOGATE- region through advice on statistical issues in technical assistance programmes of different kinds (regional or national) with a view of obtaining statistical data in these areas.            Output(s): • Advice provided on the implementation of the Medstat IV programme. • Advice provided on other assistance programmes (e.g. INOGATE) for the ENP countries resulting in new statistical data. • Technical assistance provided to the ENP East countries on the Shared Environment Information System (SEIS) programme with a particular emphasis on waste statistics. • Contribution to assistance programmes provided in the ENP countries, such as on twinning projects and others resulting in improved availability and quality of data.            Other financing DG(s): NEAR.</p>	Process
14	<p><b>[252] Support to other Commission services in the design and implementation of cooperation programmes with relevance for statistics in non-EU countries</b>            Description: Support the design and implementation of cooperation programmes through provision of technical advice on statistical matters.            Output(s): • Technical advice to the EC, European External Action Service and EU Delegations on statistical cooperation with Africa, Asia, Latin America and Caribbean countries provided. • Statistics included in the agenda of EU political dialogues with third countries and regions (e. ASEAN (Association of Southeast Asian Nations), ASEM (Asia-Europe Meeting), India, Africa, etc.).            Other financing DG(s): DEVCO.</p>	Process
14	<p><b>[256(IT)] Support to production and dissemination of statistics - IT part</b>            Description: IT tools and support for production and dissemination of statistics on non-EU third countries and regions.            Output(s): • Tools for statistical production (ERETES, EUROTRACE) maintained. • Helpdesk function maintained.</p>	Process
14	<p><b>[256] Support to production and dissemination of statistics</b>            Description: Support the increased utilisation of statistical and cooperation tools by NSIs and organisations providing technical assistance (donors) through promotion, training, user-friendly dissemination and the visibility of statistics on non-EU third countries and regions through the website and publications.            Output(s): • Training on Eurostat cooperation tools implemented. • Publications produced (e.g. EU-AU (European Union-African Union) Yearbook, leaflets and statistical books. • Training on Eurostat IT tools implemented.</p>	Process
14	<p><b>[263] Support third countries and their regional organisations to implement their policies and strategies</b>            Description: Support the strengthening of the statistical systems in third countries and their regional organisations (including countries and regions with a Memorandum of Understanding (MoU) with Eurostat) through capacity building measures, provision of advice and the promotion of regional models of working like the European Statistical System (ESS).            Output(s): • Regional cooperation promoted and facilitated, by sharing experiences of the ESS model of working. • Statistical capacity building of ASEANstat (Statistical Office of the ASEAN secretariat) supported through provision of advice. • Statistical capacity of the African Union Statistics Division strengthened. • ESS values and initiatives promoted during visits and the study week at Eurostat. • Follow-up of existing MoU ensured and extensions prepared as appropriate.</p>	Process
14	<p><b>[660(IT)] Information on European standards in statistics - IT part</b>            Description: • Maintenance and development of the SMIS+ compliance monitoring tool. • SMIS+ evaluation reports produced.            Output(s): • Functioning and further development, as necessary, of SMIS+ ensured.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/Process
14	<p><b>[660] Information on European standards in statistics</b></p> <p>Description: Collect information on legal acts, data requirements and methodology for the entire statistical acquis. Prepare for launching, processing, finalising and monitoring the compliance of the statistical systems of enlargement countries with EU statistical acquis.</p> <p>Output(s): • Statistical Requirements Compendium updated.</p>	Process
14	<p><b>[661] Implementation of cooperation strategies</b></p> <p>Description: Support the implementation of statistical cooperation strategies for the different European Neighbourhood Policy (ENP) regions through the panel on statistics for the ENP East countries, the implementation of training courses and meetings on European Statistical System values.</p> <p>Output(s): • Regional programmes for the ENP countries promoted. • A workshop/working group meeting on quality for the ENP South countries successfully organised and the European Statistical System quality framework promoted. • Annual meeting of the Principal National Coordinators of the ENP South countries organised and FORUM meeting prepared. • Meetings of the panel on statistics organised for the ENP East countries. • New schedules for ENP East panels and workshops designed. • New schedule for seminars and workshops for the ENP South countries designed. • New training programme for the ENP South countries designed. • Seminars and workshops on EU statistical acquis successfully held, knowledge transferred and more and better quality data available. • Three training courses on key statistical issues held for the ENP South countries. • Two training courses on key statistical issues held for the ENP East countries.</p>	Process
14	<p><b>[662] Management of high level seminars and meetings with the enlargement and ENP countries to promote strategic discussions</b></p> <p>Description: Organisation and management of high level meetings and seminars for the enlargement and European Neighbourhood Policy (ENP) countries to stimulate strategic discussions, promotion of European Statistical System initiatives and increased availability of good quality data.</p> <p>Output(s): • FORUM meeting for the ENP South countries successfully held with key management and cooperation issues decided. • High level seminars for the ENP East and Central Asia countries successfully held with key management and cooperation issues decided. • Key documents from the high level meetings and seminars as well as other methodology documents and guidelines available in Russian and if necessary, in other EU languages. • Policy Group meeting (PGSC) organised and strategic conclusions defined for the enlargement countries. • Strategic information meeting held for the DGs of the NSIs of the enlargement countries.</p>	Process
14	<p><b>[663] Management of high level seminars and meetings with the countries of Africa, Asia, Latin America and Caribbean to promote European Statistical System values</b></p> <p>Description: Organisation and management of seminars and high level meetings for African, Asian and Latin American countries to promote the regional cooperation model such as the European Statistical System (ESS), to facilitate regional cooperation and to encourage the application of ESS values such as the CoP (Code of Practice) and quality management systems.</p> <p>Output(s): • A High level seminar for African countries successfully held and ESS values on quality promoted. • High level seminar for Asian countries successfully held and ESS values on quality promoted. • New schedule for high level seminars with African/Asian and Latin American countries designed.</p>	Process
