

Brussels, 19.12.2017
C(2017) 8555 final

ANNEX 3

ANNEX

to the

COMMISSION DECISION of 19.12.2017

**on the adoption of the work programme and financing decision for 2018 for the
implementation of the European statistical programme 2013-2020**

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
01	<p>[EU2020] Europe 2020 indicators Description: Maintain the set of Europe 2020 indicators and related metadata. Contribute to further development of the set of indicators. Prepare analyses and dissemination products for the main users. Product(s): • [EU2020] Europe 2020 indicators. Other output(s): • Publication of an analytical statistical book about progress towards Europe 2020 targets ('Smarter, greener, more inclusive?'). • Europe 2020 scoreboard (dedicated section).</p>	Process
02	<p>[MIP] Scoreboard of indicators of the Macroeconomic Imbalance Procedure Description: Development, improvements, and regular publication of data and news releases concerning the scoreboard of indicators in the context of the Macroeconomic Imbalance Procedure (MIP). Follow up of quality management of MIP indicators (Level 1 report). Product(s): • [MIP] MIP scoreboard.</p>	Process
02	<p>[NA-EMP-Flash] Feasibility study of employment flash estimate *NEW* Description: The lack of early national accounts' employment data has been outlined repetitively in the Economic and Financial Committee (EFC) reports on the Principle European Economic Indicators (PEEI). This project will develop methodology and test flash estimates at around T+45 (and even t+30) and assess the feasibility of a regular production of an early employment flash. Output(s): • Draft methodology. • First flash estimates.</p>	Project (2017-2019)
02	<p>[457] Monitoring Own Resources GNI Description: Verification of Gross National Income (GNI) data with Member States and GNI Committee, replies to European Court of Auditors reports, support to DG BUDG. Output(s): • Opinion of GNI Committee on the appropriateness of GNI data for use as input into DG BUDG's Own Resources calculations.</p>	Process
02	<p>[458] Monitoring Own Resources VAT Description: Verification of the Member States' annual statements of their Value Added Tax (VAT) own resource bases, in particular the calculation of the correction for the special flat-rate scheme for farmers and of the Weighted Average Rate. Output(s): • Technical advice to DG BUDG on the use of VAT statistics for Own Resources purposes.</p>	Process
02	<p>[459] Support in National Accounts to Enlargement Countries Description: Advice to Enlargement Countries concerning their future legal obligations regarding National Accounts. Output(s): • Advice to Enlargement Countries concerning their future legal obligations regarding National Accounts.</p>	Process
02	<p>[460] Remunerations of EU Staff Description: Calculation of the statistics needed for the annual and intermediate adaptation of EU officials' salaries and pensions, correction coefficients, mission allowances; Article 64/5 Working Group. Output(s): • Annual adjustment of remuneration of EU officials and correction coefficients (intra-EU and extra-EU) - for Commission and other EU institutions, non-EU bodies; mission allowances. Annual report on remunerations and appendices.</p>	Process
02	<p>[461] Pension Scheme European Officials - assessment Description: Assessment of the Pension Scheme European Officials (PSEO) actuarial balance in accordance with Annex XII of the Staff Regulations; Article 83 Working Group. Annual report on pensions and appendices. Output(s): • Contribution rate of members of staff to the PSEO, coefficients for pension transfer.</p>	Process
02	<p>[462] Liabilities related to social benefit schemes of the personnel of the European Institutions Description: Calculation of liabilities related to social benefits of personnel of the European Institutions (Pension Scheme European Officials (PSEO) + Pension Scheme of Members of the EU Institutions (PSMI) + Pension Scheme of Members of the European Parliament (PSMEP) + Joint Sickness Insurance Scheme (JSIS). Output(s): • Liabilities of PSEO, PSMI, PSMEP, JSIS.</p>	Process
02	<p>[EPSAS] European Public Sector Accounting Standards Description: Harmonisation of public sector accounting standards under the accruals basis of accounting. Output(s): • European Public Sector Accounting Standards (EPSAS).</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
02	<p>[487] Identifying, assessing and monitoring risks in the context of EDP statistics</p> <p>Description: Organisation of the annual country risk assessment in the framework of Excessive Deficit Procedure (EDP). Identifying, assessing and monitoring risks or problems from upstream data sources with a view to initiating corrective action at the earliest possible point (Early Warning System (EWS)).</p> <p>Output(s): • Annual country risk assessment (confidential).</p>	Process
02	<p>[EDP] Verification of EDP statistics</p> <p>Description: Maintaining on-going direct contacts with Member States and selected candidate countries to ensure a preventive approach for the quality of statistics used for the Excessive Deficit Procedure (EDP), including dialogue visits, and where appropriate, methodological visits. Monitoring of the appropriateness, exhaustiveness and timeliness of the upstream public finance data by reference to European System of Accounts (ESA) requirements, within an Excessive Deficit Procedure, as part of the dialogue visits. Provide timely ex-ante and ex-post methodological advice.</p> <p>Output(s): • Excessive Deficit Procedure (e.g. EDP notification tables + "Maastricht debt" + Financial crisis). Mission reports including conclusions and recommendations. Report to the Economic and Financial Committee.</p>	Process
02	<p>[EDPn] Validation of EDP notification</p> <p>Description: Verifying the quality of the bi-annual Excessive Deficit Procedure (EDP) notifications sent by Member States, preparing the bi-annual EDP press release, and associated documentation, and examining notifications of selected Candidate Countries.</p> <p>Output(s): • Bi-annual EDP press release and associated documentation.</p>	Process
02	<p>[GovMeth(1/2)] Coordination of methodological tasks for GFS (1/2)</p> <p>Description: (1) Update of European System of Accounts (ESA) on government sector, of Manual of General Government deficit and debt according to ESA 2010. (2) Preparation of Eurostat decisions and guidance notes. (3) Organisation of the Excessive Deficit Procedure (EDP) Statistics Working Group. Coordination of the implementation of manuals in all Member States. (4) Organisation of training on Government Finance Statistics (GFS). (5) Coordination of methodology with the National Accounts Directorate in Eurostat and other accounting standards.</p> <p>Output(s): • New version of the Manual. • Task force and Working Group meetings. • Greater knowledge of Government Finance Statistics in countries, leading to higher and more harmonised GFS data.</p>	Process
02	<p>[569] Accounting and statistics</p> <p>Description: Follow-up of developments in accounting, International Financial Reporting Standard (IFRS) desk, accounting and statistics.</p> <p>Output(s): • Co-ordination of Accounting and Statistics, International Financial Reporting Standard (IFRS) desk.</p>	Process
02	<p>[Gov(IT)] IT for EDP and GFS statistical production</p> <p>Description: Contribute to continuity of administration, maintenance and technical support for applications and databases used in the EDP (Excessive deficit procedure) and GFS (Government statistics - Financial and non-Financial) related National Accounts statistical production. Continuous support for EDP/GFS related National Accounts Statistical Production Systems and data. Administration and developments related to FAME (Forecasting Analytical Modelling Environment) database domains in the unit in charge and technical support for the related units.</p> <p>Output(s): • Technical support for GFS related National Accounts Statistical Production Systems. • Corrective and evolutionary maintenance for GFS related National Accounts Statistical Production Systems.</p>	Process
02	<p>[Gov] Quarterly and Annual Government statistics - Financial and non-Financial Accounts for general government</p> <p>Description: Collection, validation and dissemination in Eurobase, in press releases and publications on government finance statistics, for example in Statistical Books and on Statistics Explained. Maintenance of Government Finance Statistics (GFS) web site. Improvement of the quality of GFS data transmitted by Member States. Presentation of regular progress reports to the Excessive Deficit Procedure (EDP) Statistics Working Group meetings, Classification of the Functions of Government (COFOG) and GFS Task Forces. Promotion of the quality and relevance of General Government quarterly accounts. It includes statistics on the annual Structure of Government Debt, European Financial Stability Facility (EFSF) lending and bilateral Intergovernmental lending. Transmission Reports and follow-up.</p> <p>Product(s): • [GovA] Annual government finance. • [GovQ] Quarterly government accounts. • [GovD&D] Government deficit and debt. • [CL&NPL] Contingent liabilities and non-performing loans.</p> <p>Other output(s): • Progress report on quarterly GFS data transmission and quality issues integrated and regularly presented in EDP Statistics Working Group meetings, in the GFS Task Force and in the COFOG Task Force.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
02	<p>[GovMeth(2/2)] Coordination of methodological tasks for GFS (2/2) Description: (1) Update of relevant Government Finance Statistics (GFS) manuals according to European System of Accounts (ESA) 2010 (2) Coordination of GFS methodological issues with Member States where appropriate, in coordination with Excessive Deficit Procedure (EDP) methodological developments (3) Timely organisation of Classification of the Functions of Government (COFOG) Task Force and GFS Task Force, dealing with transmission and methodological issues related to GFS. (4) Provision of advice to Member States. (5) Contribution to GFS training courses. Output(s): • Methodological issues addressed in GFS Task Force and EDPS Working Group meetings and raised in transmission reports, correspondence with Member States. • Organisation of COFOG and GFS Task Forces. • Contribution to the methodology regarding GFS. • Guidance related to GFS produced, discussed and published where appropriate. • Update and production of methodological manuals. • Contribution to GFS training.</p>	Process
03	<p>[FATS] Statistics on foreign affiliates Description: Validation and processing of annual Statistics on foreign affiliates (FATS) data received from Member States and other reporting countries. Dissemination of national data and EU aggregates on Eurostat website. Quality reporting and methodological development ensured. Product(s): • [FATS] Foreign affiliates of EU enterprises.</p>	Process
03	<p>[FDI] Statistics on Foreign Direct Investment Description: Data production, compilation and dissemination of statistics. Maintenance and development of methodology as well as data quality issues. Maintenance and development of the Foreign Direct Investment (FDI) Network. Quality reporting and methodological development ensured. Product(s): • [FDI] Foreign direct investments.</p>	Process
03	<p>[GVC] Developing the area of Global Value Chains Description: Developing the area of Global Value Chains, following the work of the ESSnet (European Statistical System collaboration networks) on Global Value Chains and taking into accounts the follow-up of the recommendations of the Sturgeon Report on Global Value Chains and production of improved indicators on economic globalisation. All the work should be coordinated at international level. Development includes also an attempt to an extension to a representative group of Member States for every resulting data set. Product(s): • [GVC-Ind] Globalisation indicators. • [GVC-IS] International sourcing. • [STEC] Services trade by enterprise characteristics. • [IntServ] International trade in services. Other output(s): • Micro-data linking of Structural Business Statistics (SBS) and other business related statistics.</p>	Project (2010-2019)
04	<p>[434] Improvement of national accounts methodology Description: Development of methodology and methodological advice at Eurostat, EU and international level, with respect to System of National Accounts (SNA) 2008 and European System of Accounts (ESA) 2010. Output(s): • Methodological guidance and manuals.</p>	Process
04	<p>[436] Implementation of national accounts methodology Description: Operation of the Directors of Macroeconomic Statistics and National Accounts Working Group. Output(s): • Improved strategic guidelines and national accounts coordination. • Coordination of ESA (European System of Accounts) methodology and other accounting standards between Eurostat NA (National Accounts), GFS (Government Finance Statistics) and other statistical domains.</p>	Process
04	<p>[EURONA] Eurostat Review of National Accounts and Macro-Economic Indicators Description: Editor's work for the biannual publication of EURONA. Output(s): • Two editions of EURONA per year.</p>	Process
04	<p>[IND] Coordinating indicator work and developing conceptual approaches Description: The Unit has the responsibility for coordinating indicator work in Eurostat, through the CGI group and in areas such as conceptual approaches and policy use of indicators (CGI = Coordination Group on Indicators and sustainable development). Output(s): • Well-coordinated Eurostat approach to indicators and accompanying conceptual approaches developed as necessary.</p>	Process
04	<p>[PEEIs] Principal European Economic Indicators Description: Supply of Principal European Economic Indicators (PEEIs) including publication, quality assessment statistical improvements and analysis of PEEIs with expected monthly or quarterly output. Methodological handbooks and guidelines to enhance harmonization of PEEIs. Product(s): • [PEEIs] Principal European Economic Indicators. Other output(s): • European Financial Committee status report on information requirements in the Economic and Monetary Union. • Horizontal methodological activities related to PEEIs, revision analysis, methodological papers. • Innovative dissemination tools for PEEIs.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
04	[GPA] Growth and Productivity Accounts Description: Extension of the coverage of data on growth, productivity and competitiveness. Product(s): • [GPA] Growth, productivity and competitiveness.	Project (2000-2020)
04	[MNY] Monetary and other finance statistics Description: Publication of monetary and financial statistics on the Eurostat web site. Output(s): • Monetary and other financial indicators (including Euro yield curves, interest rates, exchange rates).	Process
04	[NA-MA] National Accounts - quarterly and annual Description: Processing, validation and dissemination of European System of Accounts (ESA) 2010 quarterly and annual accounts data, regular estimation of European aggregates and contribution to publications. Product(s): • [NAMA] Annual national accounts. • [NAMQ] Quarterly national accounts.	Process
04	[NA-Pen] Pension entitlements in social insurance *NEW* Description: Processing, validation and dissemination of data on pensions as defined by the European System of Accounts (ESA) 2010. Product(s): • [NA-Pen] Pension entitlements in social insurance. Other output(s): • First release of mandatory data. • Methodological and other information materials.	Process
04	[NAPS-III] Extension of the National Accounts Production System *NEW* Description: This project represents the third development phase of the Eurostat's national accounts production system. Product(s): • [NAMA] Annual national accounts. • [NAMQ] Quarterly national accounts. • [NA-Pen] Pension entitlements in social insurance. • [NA-Reg] Regional accounts. • [NASA] Annual Sector Accounts - non-financial flows and stocks. • [NASA-F] Annual Sector Accounts - financial flows and stocks. • [NASQ] Quarterly Sector Accounts. • [NAIO] Supply, use and Input-Output tables. Other output(s): • Automated estimation procedures (test results). • Integration of regional accounts into the production environment for main aggregates. • Vintage database (design and tests). • Other rationalisation, integration and consolidation actions.	Project (2017-2019)
04	[NA-Reg] Regional Accounts Description: Processing, validation and dissemination of European System of Accounts (ESA) 2010 regional accounts data, contribution to publications. Product(s): • [NA-Reg] Regional accounts.	Process
04	[NASA] Non-financial sector accounts Description: Processing, validation and dissemination of European System of Accounts (ESA) 2010 quarterly and annual non-financial sector accounts data, contribution to publications. Product(s): • [NASA] Annual Sector Accounts - non-financial flows and stocks. • [NASQ] Quarterly Sector Accounts. Other output(s): • Development of concepts and indicators on income and wealth.	Process
04	[NASA-F] Financial Accounts (financial flows and stocks) Description: Processing, validation and dissemination of European System of Accounts (ESA) 2010 annual financial accounts data, dissemination of quarterly financial accounts data, contribution to publications. Product(s): • [NASA-F] Annual Sector Accounts - financial flows and stocks. Other output(s): • MIP indicators of financial accounts. • Quarterly financial accounts.	Process
04	[473] Modernisation of price statistics Description: Support and guide the use of scanner data and web scraping. Output(s): • Methodological guidance; significant extension of the use of scanner data and web scraping in Member States.	Project (2016-2018)
04	[FPMT] Food Price Monitoring Tool Description: Further development of statistical information on food supply chains and continued updating of the monitoring tool. Product(s): • [Price-FSCM] Food Price Monitoring Tool. Other output(s): • Monitoring tool.	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
04	<p>[HICP] Harmonised Indices of Consumer Prices Description: Production and dissemination of monthly HICPs (euro area flash estimate, mid-month estimates, HICP sub-indices and special aggregates, HICP at constant tax rates, HICP administered prices); further development of HICP methodology and guidance; compliance monitoring. Product(s): • [Price-HICP] Harmonised Indices of Consumer Prices. Other output(s): • HICP methodological guidance and recommendations; compliance monitoring reports; Manuals.</p>	Process
04	<p>[HICP_ImplDel] Harmonised Indices of Consumer Prices implementing/delegated acts Description: Preparation of Harmonised Indices of Consumer Prices implementing/delegated acts under the new framework regulation. Output(s): • Draft implementing/delegated acts.</p>	Project (2016-2018)
04	<p>[HICP_Modern] Re-engineering of the HICP production environment Description: Re-engineering of the HICP production environment to establish a production system that meets state-of-the-art standards. Output(s): • Phase I results.</p>	Project (2017-2019)
04	<p>[HPS] Housing Price Statistics Description: Compilation of the house price index and the owner occupied housing price index. Exploratory work on commercial property price indicators. Product(s): • [Price-HPS] Housing price indices. Other output(s): • Methodological guidance.</p>	Process
04	<p>[NCPI] National Consumer Price Indices Description: National Consumer Price Indices of G20 countries. Output(s): • National Consumer Price Indices of G20 countries.</p>	Process
04	<p>[PPP(IT)] Purchasing Power Parities - IT part Description: Maintenance and development of Purchasing Power Parities (PPP) database and tools. Output(s): • Improved and maintained PPP IT tools.</p>	Process
04	<p>[PPP] Purchasing Power Parities Description: Production and dissemination of purchasing power parities; supervision of price surveys; methodological work; compliance monitoring; ICP (International Comparison Programme) activities. Product(s): • [PPP] Purchasing Power Parities. Other output(s): • Methodological developments; compliance monitoring reports; contribution to the ICP process.</p>	Process
04	<p>[BoP] Balance of Payments Description: Processing, validation and dissemination of BPM6 BOP/IIP data, contribution to publications. (BPM6=Balance of Payments and International Investment Position Manual, Washington, D.C.: International Monetary Fund, 2009. 6th edition, BoP=Balance of Payments, IIP=international investment position). Product(s): • [BoP] Balance of payments and international investment positions. Other output(s): • Draft legal acts; Balance of Payments (BoP) Vademecum; BoP Working Group; Quality reports; Commission working document to the EP on data quality.</p>	Process
04	<p>[FIGARO] Full International and Global Accounts for Research in Input-Output Analysis Description: Establishing an annual production of EU Multi-country Input-Output Tables (EU-MC IOT) and a five-yearly production of EU Multi-country Supply, Use and Input-Output Tables (EU-MC SUIOT). Product(s): • [NAIO] Supply, use and Input-Output tables. Other output(s): • Project reports.</p>	Project (2015-2020)
04	<p>[IGA] Integrated Global Accounts and Global Production Description: This project applies to national accounts and balance of payments statistics. It deals with the issues of integrated global accounts and global production and their implications to the accounting frameworks at European and national levels. The project relates to initiatives at international level, namely to the work on the system of extended international and global accounts coordinated by the United Nations Statistics Division (UNSD) and on global production conducted by UNECE (Economic Commission for Europe of the United Nations). Output(s): • Preparing papers, analysis reports, feasibility study.</p>	Project (2016-2020)

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
04	<p>[NAIO] Input/Output and supply/use tables Description: Processing and validation of SUT IOT (supply/use tables and input/output tables) data. Estimation of national data and their aggregation to Euro Area and EU supply/use tables and input/output tables data. Product(s): • [NAIO] Supply, use and Input-Output tables.</p>	Process
04	<p>[SDI] Sustainable development indicators Description: Contribute to the development of indicators to measure the Sustainable Development Goals (SDGs) at global level. Maintain and further develop the set of indicators to monitor sustainable development in the EU taking the SDGs into account in cooperation with other services and Member States. Prepare analyses and dissemination products for the main users. Maintain the set of sustainable development indicators (SDI) on the Eurostat website. Contribute to the implementation of the 'GDP and beyond' roadmap. Product(s): • [SDI] Sustainable development indicators. Other output(s): • SDI dedicated section. • Publication of a monitoring report on sustainable development indicators in Europe. • Methodological work (publications and working papers) on indicators. • Further development of indicators for the Sustainable Development Goals (SDGs). • 'GDP and beyond' work.</p>	Process
05	<p>[EnvClimChange] Climate change related statistics and indicators *NEW* Description: Promoting the use of official statistics for climate change information purposes. Product(s): • [ClimChange] Climate change. Other output(s): • Development and maintenance of a data hub with links to relevant statistics and indicators. • Regular updating of the climate change Statistics Explained article. • Support the CES (Conference of European Statisticians) initiative on climate change related statistics.</p>	Process
05	<p>[EnvKIP] Assistance on ecosystems / natural capital accounts Description: Assistance to DG ENV on ecosystems / natural capital accounts. Product(s): • [BioDivInd] Biodiversity indicators. Other output(s): • Service to DG ENV: assistance on ecosystems / natural capital accounts. • Service to DG ENV: advice on the statistical needs and options for monitoring the 2020 Biodiversity Strategy.</p>	Process
05	<p>[EnvLegBase] Further develop environmental economic accounts Description: Implement Regulation 691/2011 on European environmental economic accounts and develop new modules in line with the European Strategy for Environmental Accounts, 2014-2018. Product(s): • [ResManExpAcc] Resource management expenditure accounts. • [EnvSubSimTra] Environmental subsidies and similar transfers accounts. Other output(s): • Refine methodology, handbooks, etc. to assist implementation of new modules. • Develop and test new methodologies.</p>	Project (2011-2020)
05	<p>[EnvMonAcc] Monetary environmental accounts Description: Collect and disseminate environmental goods and services sector accounts, environmental taxes and environmental protection expenditure accounts including estimates for the main EU aggregates. Product(s): • [EGSS] Environmental goods and services sector accounts. • [EnvTax] Environmental taxes. • [EPEA] Environmental protection expenditure accounts. Other output(s): • Service to DG TAXUD: coordination on environmental taxes.</p>	Process
05	<p>[EnvPhysAcc] Physical environmental accounts Description: Collect and disseminate air emissions accounts, physical energy flow accounts and material flow accounts data including estimates for the main EU aggregates. It includes indicators on greenhouse gases and air pollution and footprints as well as estimates of raw material consumption. Product(s): • [AirEmAcc] Air emissions accounts. • [EnerAcc] Physical energy flow accounts. • [MFA] Material flow accounts. Other output(s): • Service to DG ENV: technical advice on material flow accounts.</p>	Process
05	<p>[EnvWat] Water statistics and accounts Description: Collect and disseminate water statistics and accounts. Product(s): • [Water] Water statistics and accounts. • [RegEnv] Regional environment.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
06	<p>[567] Co-ordination of Statistical Units and Profiling activities</p> <p>Description: Co-ordinate and monitor the implementation of Statistical Units Regulation, assist the Member States in their profiling activities.</p> <p>Output(s): • Assistance for and monitoring of the implementation of the definition of statistical units. • Assistance for and promotion of the use of Profiling as method for delineating enterprises, for better understanding the Multinational Enterprise (MNE) activities and their impact on business statistics and for improving business statistics. • Promotion of Profiling in workshops, European Statistical Training System. (ESTP) courses. • Eurostat activities to support profiling activities. • Enhanced integration of profiling results into the EuroGroups Register (EGR).</p>	Process
06	<p>[573] Coordination of European business statistics</p> <p>Description: Coordination of European business statistics, including the BSDG Secretariat. (BSDG=Business Statistics Directors' Group).</p> <p>Output(s): • BSDG and BSDG-SDG meetings organised. • Work of the Directorate co-ordinated. • Coordination of the updating the Directorate's methodological manuals. • Facilitating the Directorate's use of modern dissemination tools.</p>	Process
06	<p>[585] Classifications for international trade statistics</p> <p>Description: Updating and maintenance of the Combined Nomenclature and co-ordination with the classification unit on the Geonomenclature for trade in goods.</p> <p>Output(s): • Classifications for international trade statistics up to date.</p>	Process
06	<p>[FRIBS] Regulatory Framework Integrating European Business Statistics</p> <p>Description: Development of integrated legal framework and implementation requirements (definitions, data structure, data quality, etc.) for European business statistics.</p> <p>Output(s): • Managing the co-legislative process of the basic act. • Legislative drafting of the other necessary legal instruments. • Preparation of release of the updated version of the European Business Statistics Manual (EBS).</p>	Project (2009-2020)
06	<p>[BD] Statistics on Business Demography</p> <p>Description: Validation and processing of annual Business Demography (BD) data received from Member States and other reporting countries based on the Annex IX of the Structural Business Statistics (SBS) Regulation. Dissemination of national data and EU aggregates on Eurostat website. Quality reporting and methodological development ensured. Collection of primary data on high-growth enterprises (10%) to feed the calculation of the innovation indicator as foreseen by Commission implementing regulation (EU) No 439/2014.</p> <p>Product(s): • [BD] Business demography.</p>	Process
06	<p>[ESI] Development of entrepreneurship indicators</p> <p>Description: Integration of employer business demography and high growth enterprise statistics into regular data production. Contribution to the Entrepreneurship Indicator Programme (EIP) programme. Further work on quarterly and regional indicators related to business demography.</p> <p>Product(s): • [ESI] Entrepreneurship.</p>	Project (2010-2019)
06	<p>[ITSS] Statistics on International Trade in Services</p> <p>Description: Data production, compilation and dissemination of statistics on International Trade in Services (ITSS). Quality reporting and methodological development ensured.</p> <p>Product(s): • [IntServ] International trade in services.</p>	Process
06	<p>[SBS] Structural Business Statistics</p> <p>Description: Validation and processing of annual Structural Business Statistics (SBS) data received from Member States and other reporting countries on the Annex I - IV and VIII. Dissemination of national data and EU aggregates on Eurostat website. Quality reporting and methodological development ensured.</p> <p>Product(s): • [SBS] Structural Business Statistics.</p>	Process
06	<p>[SBS2020] Structural Business Statistics development</p> <p>Description: Develop and implement a strategy for structural business statistics (SBS) for the next decade. Here the questions of the statistical units and the geographical reference for SBS play a crucial role.</p> <p>Product(s): • [SBS2020] SBS main indicators.</p>	Project (2015-2020)
06	<p>[575] Business registers as part of the improved ESS business statistics</p> <p>Description: The legal package of Business Registers needs to be finalised and implemented.</p> <p>Product(s): • [EGR] Aggregated statistics based on EGR.</p> <p>Other output(s): Finalised legal framework for Statistical Business Registers and implementation of these provisions (including business process improvements).</p>	Project (2013-2020)

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
06	<p>[583] Short-Term Statistics (STS) as part of the improved ESS business statistics</p> <p>Description: The Short Term Business Statistics legal provisions need to be finalised and implemented. This work includes business process improvements and an assessment of the STS production system. This assessment could lead to an improvement or replacement of the STS production system.</p> <p>Product(s): • [STS-Co] Short term business statistics - construction. • [STS-In] Short term business statistics - industry. • [STS-TS] Short term business statistics - trade and services.</p> <p>Other output(s): • Finalisation of the STS legislation within FRIBS; • Implementation of the STS legal provisions; - Assessment/upgrading of the STS production system; • Updated methodology on STS statistics.</p>	Project (2011-2020)
06	<p>[654] Prodcom statistics as part of the improved ESS business statistics</p> <p>Description: Finalisation of the Prodcom legislation and implementation of this legislation; this includes business process improvements based on an improved production system according to FRIBS.</p> <p>Product(s): • [PRODCOM] Production of manufactured goods.</p> <p>Other output(s): • Finalised Prodcom legislation. • Implementation of this improved legislation. • Improved production and dissemination processes using a new production system.</p>	Project (2015-2020)
06	<p>[PRODCOM] Statistics on industrial production</p> <p>Description: Development (methodology), production (collection, processing, validation, analysis, quality and compliance control) and timely dissemination of Prodcom statistics; regular preparation of the Prodcom list.</p> <p>Product(s): • [PRODCOM] Production of manufactured goods.</p> <p>Other output(s): • Regular high quality Prodcom statistics produced and disseminated. • Prodcom list 2018. • New production system according to FRIBS implemented. • Up-to-date Prodcom methodology available.</p>	Process
06	<p>[STS] Short Term business Statistics</p> <p>Description: Development, production (collection, processing, validation, quality and compliance control) and timely dissemination of short term business statistics.</p> <p>Product(s): • [STS-Co] Short term business statistics - construction. • [STS-In] Short term business statistics - industry. • [STS-TS] Short term business statistics - trade and services.</p> <p>Other output(s): • Regular high quality STS statistics produced and disseminated. • Press releases disseminated as planned. • Production processes further improved.</p>	Process
06	<p>[TOUR] Tourism statistics</p> <p>Description: Development, production (collection, processing, validation, quality and compliance control) and timely dissemination of tourism statistics.</p> <p>Product(s): • [TourAcc] Tourism industry - accommodations. • [TourEco] Tourism industry - economic dimension. • [TourTrip] Trips of EU residents.</p> <p>Other output(s): • Regular annual high quality statistics on tourism produced and disseminated. • Regular monthly high quality statistics on tourism produced and disseminated. • Production processes further improved. • Big data sources integrated into the production and dissemination.</p>	Process
06	<p>[CIS] Community Innovation Survey statistics</p> <p>Description: Ensure the regular production, dissemination and development of biennial Community Innovation Surveys and the related metadata for EU2020 (DG RTD), European Research Area (DG RTD) and European Innovation Scoreboards (DG RTD, GROW) monitoring and for Research and Innovation Observatory (DG JRC) with their envisaged extensions.</p> <p>Product(s): • [CIS] Innovation *.</p>	Process
06	<p>[HRST+HTec] Human Resources and High Tech in Science and Technology statistics</p> <p>Description: Ensure the regular production, dissemination and development of High-Tech statistics and Human Resources in Science and Technology statistics and the related metadata for EU2020 (DG RTD), European Research Area (DG RTD) and Innovation Union (DG RTD, GROW) monitoring and for Research and Innovation Observatory (DG JRC) with their envisaged extensions.</p> <p>Product(s): • [HRST+HTec] High-tech industry, knowledge-intensive services and HR in S&T.</p>	Process
06	<p>[ICTManual] A methodological framework for ICT</p> <p>Description: There is a need to develop a stronger statistical framework for ICT statistics (ICT = Information and Communication Technologies). This project supports the policies under the Digital Agenda and the Digital Single Market.</p> <p>Output(s): • Draft manual providing a stronger framework for ICT statistics.</p>	Project (2017-2018)

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
06	<p>[ISoc] Information Society - Information and Communication Technologies usage Statistics</p> <p>Description: Further development and management of the production and dissemination of statistics on the information society: • ICT usage in households and by individuals, • ICT usage and e-commerce in enterprises. (ICT=Information and Communication Technologies). This process supports the policies under the Digital Agenda and the Digital Single Market.</p> <p>Product(s): • [ISocEnt] Information society - enterprises. • [ISocHI] Information society - households and individuals *.</p> <p>Other output(s): • Adoption of a Commission regulation implementing regulation (EC) 808/2004 of the European Parliament and of the Council concerning statistics on the information society. • Development of two model questionnaires for the use of ICT in enterprises and in households and by individuals. • Pretesting of new elements for two ICT model questionnaires.</p>	Process
06	<p>[ISocICT] Information and Communication Technologies - ICT sector and ICT skills statistics</p> <p>Description: Compilation, processing and dissemination of secondary statistics related to the supply and demand of ICT, i.e. output of ICT producing industries, employment in the ICT sector, demand and employment of ICT skilled personnel, etc. (ICT=Information and Communication Technologies). This process supports the policies under the Digital Agenda and the Digital Single Market.</p> <p>Product(s): • [ISocICT] ICT sector and ICT skills. • [HRST+HTec] High-tech industry, knowledge-intensive services and HR in S&T.</p>	Process
06	<p>[R&D] Research and Development statistics</p> <p>Description: Ensure the regular production, dissemination and development of R&D statistics and the related metadata for EU2020 (DG RTD), European Research Area (DG RTD) and Innovation Union (DG RTD, GROW) monitoring and for Research and Innovation Observatory (DG JRC) with their envisaged extensions.</p> <p>Product(s): • [R&D] Research and Development.</p>	Process
06	<p>[R&D_Frascati] Implementation of the 2015 Frascati and revised Oslo manuals</p> <p>Description: The implementation of the 2015 Frascati (R&D) and Oslo (Innovation) manuals will set new standards for the compilation of reliable and comparable data. The implementation of relevant quality measures may require amendments of the data collection in Member States.</p> <p>Output(s): • Implementation of new methodology and appropriate quality measures in Member States in the area of R&D and Innovation statistics.</p>	Project (2017-2019)
06	<p>[Comext(IT)] Comext Database – IT part</p> <p>Description: (1) IT Maintenance of the three Comext Databases (Confidential, on-line Comext, public Comext). (2) Comext IT user support for Commission services, Member States and users in general.</p> <p>Output(s): • IT Maintenance of the Comext databases. • Further enhancement of the interfaces and functionalities of the different Comext applications (e.g. Comext Loader, Metadata Editor, Nomenclature Production System, Easy Comext Metadata organiser) for both production and dissemination purposes.</p>	Process
06	<p>[Comext] Comext Database management</p> <p>Description: (1) Preparation and management of the three Comext Databases (Confidential, on-line Comext, public Comext). (2) Free electronic data dissemination of European statistics, in particular international trade in goods, TEC, TIC, Prodcom and other statistical domains. (3) Comext statistical user support for Commission services, Member States and users in general. (TEC = Trade by enterprise characteristics, TIC = Trade by invoicing currency).</p> <p>Output(s): • Maintenance of the Comext databases enabling availability of European statistics, in particular international trade in goods, TEC, TIC, Prodcom and other statistical domains. • Timely user support to meet the needs of the policy DGs, the institutional and public users.</p>	Process
06	<p>[ITGS] International Trade in Goods Statistics</p> <p>Description: Development (methodology), production (collection, processing, validation, analysis, quality and compliance control) and timely dissemination of international trade in goods statistics.</p> <p>Product(s): • [IntGood] International trade in goods. • [TEC] Trade in goods by enterprise characteristics. • [TIC] Trade in goods by invoicing currency.</p> <p>Other output(s): • Regular high quality ITGS statistics produced and disseminated. • Production processes further improved. • Up to date methodological framework available.</p>	Process
07	<p>[Culture] Culture statistics</p> <p>Description: • Production and dissemination of culture statistics on the basis of existing data collections. • Support to further development of culture statistics.</p> <p>Product(s): • [Culture] Culture.</p> <p>Other financing DG(s): EAC.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
07	<p>[EPSRI] European Pillar of Social Rights indicators *NEW* Description: Maintain the set of indicators for Social Scoreboard. Product(s): • [SocRights] European Pillar of Social Rights. Other financing DG(s): EMPL.</p>	Process
07	<p>[IESS] Regulatory framework for social statistics Description: Development of a framework for a modernised system of European social statistics that is capable of integrating the ongoing modernisation activities, that accommodates different situations in Member States and that supports the management of change. Output(s): • Ongoing co-decision procedure for the framework regulation on social microdata collections (IESS - Integrated European Social Statistics). • Preparation of delegated and implementing acts related to IESS. • Preparation of two more framework regulations for social statistics.</p>	Project (2014-2020)
07	<p>[RRSI] Reinforced Role of Social Indicators Description: The Reinforced Role of Social Indicators (RRSI) project aims at achieving a sustainable upgrading and modernisation of European social statistics in key areas in support of the Commission's priorities: growth and job creation, the reduction of poverty and social exclusion, skills and mobility. The RRSI thus aims at reinforcing the development, production and dissemination of Social Statistics by Eurostat particularly in the domains of income, poverty and social exclusion timeliness, labour market, skills (including links with national accounts) and mobility, better links between income, consumption and wealth and between micro and macro data on income, consumption and wealth. This will allow Eurostat to make substantial, measurable advancements in these areas of social statistics in response to direct policy needs and with a view to bringing key social indicators up to a level considered to be on an equal footing with macroeconomic indicators. To ensure this, a suite of new and improved statistical indicators will be created in a way that, when taken together, will represent a coherent upgrading of key social statistics. This will require the project to be managed as a set of interrelated work packages that will fall under the overarching RRSI heading and which will ultimately deliver a set of indicators that will demonstrably improve key attributes of social statistics including with respect to statistical quality as defined in Article 12 of the Statistical Regulation ((EC) No.223/2009) and also with reference to the ESS Code of Practice. Product(s): • [ICW] Distribution of income, consumption and wealth. • [Skills] Improved data on skills. Other output(s): • Methodological documents. • Experimental statistics.</p>	Project (2015-2021)
07	<p>[SocMod] Modernisation programme for social statistics Description: The modernisation programme for social statistics covers projects aimed at: • Making social statistics more responsive to user needs, in particular to the requirements coming from the development and implementation of EU policies. • Increasing efficiency. • Increasing quality. • Standardisation of common variables and standardisation of concepts. The modernisation programme includes cross-cutting projects. • Analysing and promoting the use of mixed modes. • Indicators sets cutting across social statistics (ageing, elements of quality of life, etc.). Output(s): • Progress in developing and supporting multimode data collections. • Experiments in Member States for streamlining social surveys. • Further implementation of the ESeG (European Socio-economic Groups) classification developed in the ESSnet-ESeG. • Standardised definitions and implementation guidelines for the set of Core Social Variables and some other variables common to multiple data collections as well as for common definitions.</p>	Project (2012-2022)
07	<p>[Sport] Sport statistics Description: • Production and dissemination of sport statistics on the basis of existing data collections. • Support to further development of sport statistics. Product(s): • [Sport] Sport. Other financing DG(s): EAC.</p>	Process
07	<p>[DemoMigr] Demography & Migration Description: Data collections: 1. URESPOP - (Usual Residence Population Data Collection) total population at national level for the purposes of Qualified Majority Voting following the usual residence population definition. 2. DEMOBAL - Demographic Balance - Population (31 Dec T-1); Births (T-1); Deaths (T-1). 3. NOWCAST - Births (T); Deaths (T). 4. UNIDEMO - Population (31 Dec T-1); Births (T-1); Deaths (T-1); Immigrants (T-1); Emigrants (T-1). Product(s): • [DemoMigr] Demography and migration. Other output(s): • Improvement of the methodology, harmonisation and expanding the use of administrative data.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
07	<p>[MngdMigr] Asylum, Managed Migration & Migrant Integration</p> <p>Description: 1. Asylum. 2. Enforcement of immigration legislation. 3. Residence permits. 4. Indicators on migrants integration. 5. Follow-up of the national implementation of the LFS 2014 ad-hoc module on migration. 6. Technical assistance to policy DG responsible for data collection on short stay visas.</p> <p>Product(s): • [MngdMigr] Asylum & Managed Migration. • [LFS14Migr] Labour market situation of migrants *.</p> <p>Other output(s): • Methodological advice in support of population data collections: definitions and data. • Support to the European Migration Network (EMN) and Migrant Integration. • Improvement of the methodology, harmonisation and expanding the use of administrative data. • While following up with the MS in order to address the new statistics needs on voluntary basis, launch in parallel the work on possible revision of Regulation (EC) 862/2007.</p> <p>Other financing DG(s): HOME.</p>	Process
07	<p>[PopCens] Census 2021 and beyond</p> <p>Description: (1) Preparation for 2021 census on the basis of the implementing acts. based on the European Parliament and Council regulation 763/2008 on population and housing censuses. (2) Based on based on the European Parliament and Council regulation 763/2008 and INSPIRE Specifications of Geographical grid systems and their implementation in the EU propose a propose a Temporary Statistical Action implementing regulation for 1 sq. km grid data for the 2021 round of censuses. (3) Prepare with ESS organisation of Censuses beyond 2021 including the following: (i) To review the changing needs and opportunities for the production of European census-type statistics. (ii) To develop and assess possible options and scenarios regarding the frequency of the data collection, statistical topics, levels of disaggregation and geographical coding taking into account the indicators' overlapping's with population, migration and labour force statistics.</p> <p>Product(s): • [PopCens] Population and Housing Census.</p> <p>Other output(s): • Methodological advice. • Support of preparatory actions in Member States.</p>	Process
07	<p>[PopMeth] Population statistics production system</p> <p>Description: Developing automated (i.e. minimising human intervention and thus resources and based on a robust methodology) data collection, processing and dissemination system for population statistics (demography, migration) based on standards.</p> <p>Product(s): • [DemoMigr] Demography and migration.</p>	Project (2015-2019)
07	<p>[PopProj] Population projections</p> <p>Description: Population Projections update 2016 on national level to be disseminated. Review of procedures and methodologies for population projections including the issues of frequency and breakdowns.</p> <p>Product(s): • [PopProj] Population projections.</p>	Process
07	<p>[552] Review of the Labour Force Survey</p> <p>Description: Based on pilot studies, comprehensive review of the EU Labour Force Survey including revised list of variables, managing breaks in time series, revised definitions of employment and unemployment to be in line with the ICLS, revised system of modules, new IT production system, availability of additional flows (quarterly and annual) on the labour market data (ICLS = International Conference of Labour Statisticians).</p> <p>Product(s): • [EmplUnempl] Employment and unemployment *. • [EU2020] Europe 2020 indicators. • [SocRights] European Pillar of Social Rights.</p> <p>Other output(s): • Proposals for all elements of the review. • Pilot studies conducted with Eurostat grants. • New estimates of quarterly and annual flows and other Labour Market indicators, data for the European Pillar of Social Rights.</p>	Project (2011-2019)
07	<p>[AL] Adult Learning</p> <p>Description: Collection, validation and dissemination of every 5 year surveys data on education and adult learning (AES and CVTS). Use of LFS education for annual dissemination. Methodological work. (AES=Adult Education Survey, CVTS=Continuing Vocational Training Survey, LFS=Labour Force Survey).</p> <p>Product(s): • [Educ-CVTS] Continuing Vocational Training Survey *. • [Educ-LFS] Education policy indicators *. • [Educ-AES] Adult education *.</p> <p>Other output(s): • Methodological support to countries for the implementation of next Continuing Vocational Training Survey & Adult Education Survey.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
07	<p>[Gender] Gender and discrimination statistics</p> <p>Description: Provision and dissemination of gender and discrimination statistics as well as analysis on gender related aspects. Gender and discrimination statistics do not necessarily entail the collection of additional statistics from existing surveys but rather make full use of existing data to illustrate possible gaps e.g. between men and women. The main purpose of the activity is to extend the visibility of equality statistics available in the European Statistical System. The sets of gender and age equality indicators which are published by Eurostat use data from the following surveys: EU SILC (Community statistics on income and living conditions), LFS (Labour Force Survey), SES (Structure of Earnings Survey) and EHIS (European Health Interview Survey).</p> <p>Product(s): • [Gender] Gender and discrimination.</p>	Process
07	<p>[Labour] Statistics on labour costs (labour cost survey and labour cost index) and earnings; job vacancies; minimum wages; gender pay gap</p> <p>Description: Collection, processing, dissemination and quality assurance. Collection of quarterly Job Vacancy Survey (JVS) by regions and occupation on voluntary basis. Regulation 450/2003 requires the Commission to report to the EP and the Council on the implementation of the regulation on the labour cost index every two years. The latest report was adopted in February 2017.</p> <p>Product(s): • [Earn] Earnings. • [JVS] Job vacancy. • [LC] Labour costs.</p> <p>Other output(s): • Report to the EP and the Council on the Labour Cost Index (LCI).</p>	Process
07	<p>[LFS(IT)] Labour Force Survey and monthly unemployment rates - IT developments *NEW*</p> <p>Description: Redesign of the Labour Force Survey data transmission/validation/dissemination chain.</p> <p>Output(s): • Labour Force Survey data production chain.</p>	Project (2018-2020)
07	<p>[LFS+Unempl] Labour Force Survey and monthly unemployment rates</p> <p>Description: Collection, processing, dissemination and quality-assurance; including transmission of data to the ECB. Dissemination of micro data for research purpose. There will be no EU legal obligation to deliver monthly unemployment data in 2018.</p> <p>Product(s): • [EmplUnempl] Employment and unemployment *. • [Une] Unemployment rates *.</p> <p>Other output(s): • Seasonally adjusted key labour market indicators. • EU LFS special tabulations on request from other DGs and Agencies, including transmission to ECB. • Labour market dynamics and transitions and other labour market indicators. • Variance estimation for scoreboard indicators. • Report to the EP and the Council on the organisation of the LFS.</p>	Process
07	<p>[LFS-Mod] Statistics from the Labour Force Survey ad hoc modules</p> <p>Description: • 2016 module on young people on the labour market: output available in 2017/2018. • 2017 module on self-employment: implementation in 2017; output available in 2018/2019. • 2018 module on reconciliation between work and family life: implementation in 2018; output available in 2019/2020. • 2019 module on work organisation and working time arrangements: preparation of the implementation in 2019; grant agreements with countries.</p> <p>Product(s): • [LFS16Young] Young people on the labour market *. • [LFS17Self] Self-employment *. • [LFS18Rec] Reconciliation between family and working life *. • [LFS19Wor] Work organisation and working time arrangements *. • [LFS22Ski] Job Skills *.</p> <p>Other financing DG(s): EMPL.</p>	Project (2014-2020)
07	<p>[556] Re-design and development of SILC, including improved timeliness</p> <p>Description: Methodological, practical and legal developments are required in the context of the modernisation of social statistics, of the upgrading of social statistics and of the increased demands on SILC, in particular demands of regional estimates, information on access to social services and needs for dramatically improve the timeliness and effectiveness of data on poverty and social inclusion. It encompasses better information on income, consumption and wealth, valuation of non-cash social transfers and data on poverty dynamics, better precision requirements and more generally better integration between SILC, HBS, EHIS and TUS microdata processing (SILC = Statistics on Income and Living Conditions, HBS = Household Budget Survey, EHIS = European Health Interview Survey, TUS = Time Use Survey). It also covers more breakdowns on social benefits including for the transfer of Euromod update and maintenance in JRC as well as support to work on improvement and revision of policy indicators and other policy assessment needs.</p> <p>Product(s): • [EU2020] Europe 2020 indicators. • [EU-SILC] Income and living conditions *. • [SocRights] European Pillar of Social Rights.</p> <p>Other output(s): • Further improvement in timeliness, regional coverage and effectiveness: In depth revision of production chain using modern drafting and sharing of code, support to Member States, developments on improved low work intensity household indicators. • Study of the methodologies suited for advanced estimations of risk of poverty, data for the European Pillar of Social Rights. • Further development of indicators on material deprivation based on the new items implemented in SILC.</p> <p>Other financing DG(s): EMPL, REGIO.</p>	Project (2012-2021)

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
07	<p>[850] Innovative sources and tools for HBS and TUS *NEW*</p> <p>Description: Development of innovative sources and tools for living conditions surveys. New technologies can be used at the level of collection of survey data from households and individuals using modern IT tools, smart devices and e-technologies, to facilitate it and minimise the survey costs. The modernisation shall also relate to direct data collection directly from new sources such as administrative or Big Data including privately owned microdata. (HBS = Household Budget Survey, TUS = Time Use Survey).</p> <p>Product(s): • [HBS] Household consumption expenditure. • [TUS] Time use.</p> <p>Other output(s): • In 2018 the aim is to provide first inputs for the 2020 rounds of HBS and TUS. • The work will also be ongoing targeting the provision of sounds recommendations and proposals for a large use of innovative tools and sources for the next round of HBS in 2025, and in a longer term the 2030 round of TUS.</p>	Project (2017-2022)
07	<p>[Crime] Crime and criminal justice</p> <p>Description: Police-recorded crime, prosecution, court and prison statistics, police numbers: joint collection with UNODC, validation and dissemination of data (and associated meta-data), including data on victims of violent crime broken down by sex. Technical advice to policy DG as required, including technical advice on improving statistics on European judicial training. Improvement of data quality; extension of the data collection, where possible, to other areas of crime (in particular to migrant smuggling and analysing data from other statistics on trafficking in human beings) and to the different stages of proceedings (in contact with police - investigation - prosecution - conviction - prison sentence; pre- and post-conviction phase) with disaggregation by relevant demographic characteristics; statistics on the number of convicted third country nationals. Promotion of the ICCS (UN international crime classification for statistical purpose). (UNODC=United Nations Office on Drugs and Crime).</p> <p>Product(s): • [Crime] Crime and criminal justice.</p> <p>Other output(s): • Joint data collection with UNODC. • Implementation of the new international classification of crimes for statistics ICCS of UNODC. • Technical advice to policy DG, if required.</p> <p>Other financing DG(s): HOME.</p>	Process
07	<p>[EHIS] European Health interview survey</p> <p>Description: Preparation of the EHIS methodology. Management of the required legal basis. Collection of data from Member States. Editing and validation. Dissemination and publication.</p> <p>Product(s): • [Health-EHIS] Health *.</p> <p>Other output(s): • Finalisation of all supporting material for the EHIS Wave 3 in 2019. • Pre-testing of voluntary additional modules • Further analysis of EHIS wave 2 data.</p> <p>Other financing DG(s): SANTE.</p>	Process
07	<p>[EU-SILC(IT)] Income and living conditions statistics, including ad hoc modules - IT maintenance</p> <p>Description: Contribution to the IT maintenance of the data production chain.</p> <p>Output(s): • IT maintenance of the data production chain.</p>	Process
07	<p>[EU-SILC] Income and living conditions statistics, including ad hoc modules</p> <p>Description: Methodological development, collection, validation and dissemination of micro data on living conditions. Development and production of aggregated datasets and indicators. Production of synthesis quality report. Dissemination of micro data for research purpose. Analysis and publications. Producer's and users' support. Annual development of the secondary variables (ad hoc modules), including the legal basis. Answer to interservice consultations and EP questions. (EU-SILC = Statistics on Income and Living Conditions).</p> <p>Product(s): • [EU-SILC] Income and living conditions *. • [EU-SILC2016] Access to services. • [EU-SILC2017] Health including children. • [EU-SILC2018] Well being and housing difficulties. • [EU-SILC2019] Intergenerational transmission of disadvantages.</p> <p>Other output(s): • SILC data extraction and calculations. • Variance estimation for scoreboard indicators.</p>	Process
07	<p>[GBV] Gender based violence survey *NEW*</p> <p>Description: Develop a Gender Based Violence (GBV) survey in order to report on the situation and evolution of violence against women and domestic violence in the context of the Convention on "Preventing and Combating violence against women and domestic violence" signed in 2011 and to be ratified by the EU and its Member States.</p> <p>Product(s): • [Crime] Crime and criminal justice.</p> <p>Other output(s): • In 2018 the survey will be piloted in MS. • The work will continue later with the results of the pilots in 2019 and full scale implementation of the GBV survey in 2020-2021 (results in 2021-2022).</p> <p>Other financing DG(s): JUST.</p>	Project (2017-2022)

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/Process
07	[HBS] Household Budget Survey Description: Methodological development (including preparation of the next wave in 2020 and quality reports), data collection, validation and dissemination of data on households expenditure, in particular HBS 2015 data. Development and production of indicators. Product(s): • [HBS] Household consumption expenditure.	Process
07	[Net-SILC3] Network on Income and Living Conditions Statistics Description: Support to in-depth methodological developments and analysis of EU-SILC, scientific coordination of international conferences, preparation of publications, methodological guidelines and studies. SILC = Survey on Income and Living Conditions. Output(s): • NET-SILC 3 conference.	Project (2016-2019)
07	[QoL] Indicators on Quality of Life Description: Finalisation of the framework for indicators on quality of life. Publications and analysis based on existing data. Integration in the regular production. Product(s): • [QoL] Quality of life. Other output(s): • In 2018 further follow up of new data available for indicators included in the list but not yet implemented, following the recommendations of the EG on QoL and the ESAC.	Project (2012-2018)
07	[TUS] Time Use Survey Description: Collection and dissemination of the 2010 wave. Methodological development needed for the next round in 2020. Product(s): • [TUS] Time use.	Process
07	[Youth] Youth statistics Description: • Production and dissemination of youth statistics on the basis of existing data collections. • 2016 ad hoc module in Labour Force Survey on young people in the labour market. • Development of new indicators for EU policies for young people. Product(s): • [Youth] Youth.	Process
07	[128] Developing statistics on health Description: Developing health statistics based on administrative sources within the framework regulation 1338/2008 on public health and health and safety at work statistics. Output(s): • Health care statistics: work towards a new Commission regulation on Health care non-expenditure statistics. • Morbidity statistics: possible development of a national pilot data collection for some diseases (to be confirmed end of 2017/beginning of 2018). • Occupational diseases: development of a simplified pilot data collection at national level. Other financing DG(s): SANTE, EMPL.	Project (2013-2020)
07	[EDUCATION] Education statistics Description: Collection, validation and dissemination of annual education data based on administrative sources (UOE data collection). Methodological work. (UOE=The administrative data collection on education systems, jointly managed by the UNESCO Institute for Statistics, the OECD and Eurostat). Product(s): • [Educ-UOE] Education.	Process
07	[ESSPROS] Social protection statistics Description: Collection, validation and dissemination of annual data on social protection. Methodological work. Product(s): • [ESSPROS] Social protection.	Process
07	[HEALTH] Health statistics Description: Collection, validation and dissemination of data. It includes annual data based on administrative sources (Public Health Care and Causes Of Death data). It also includes annual data collection on accidents at work (ESAW) and other work-related health problems. Product(s): • [COD] Causes of death *. • [Health-ESAW] Health and safety at work *. • [Health-CARE] Health care.	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
07	<p>[SPHE] Developing links with National Accounts in the area of Social Protection, Health and Education</p> <p>Description: On the basis of existing experiences in the area of social protection (ESSPROS) and health (SHA), the project aims at developing the links with National Accounts for education, health and social protection. The availability of satellite accounts is planned in the long term perspective.</p> <p>Output(s): • Methodological documents on the links between ESSPROS and national accounts and pilot data for some Member States on early estimates for social protection expenditure by function. • Methodological documents related to the improvement of UOE education expenditure data (including their links to national accounts). (UOE=The administrative data collection on education systems, jointly managed by the UNESCO Institute for Statistics, the OECD and Eurostat). • Initial methodological development as regards the links between Health care financing data and national accounts.</p> <p>Other financing DG(s): EMPL.</p>	Project (2014-2021)
08	<p>[TRIS] Modernisation and integration of Transport Information System</p> <p>Description: TRIS (TRansport Information System) is an Information System Framework implementing/integrating/documenting the Transport Statistics IT systems as sub-systems (Road, Rail, Aviation, Maritime, Inland Water Ways, Regional Transport, Common Questionnaire and Modal Split Indicators).</p> <p>Output(s): • Evolutive maintenance of all TRIS subsystems; Production of an IT Roadmap of TRIS for integration/migration to corporate IT tools.</p>	Project (2009-2020)
08	<p>[511] Strategy for agricultural statistics towards 2020 and beyond</p> <p>Description: • Set-up of the legal basis for the European Agricultural Statistical System 2020 and beyond. • Pilot projects towards crop balances for cereals and oilseeds. • Adapt data collections under regulations handled by DG AGRI to legal updates. • Improve dissemination and methodological aspects for AEI (Agri-environmental indicators). • Eurofarm2020: Information system to support the production of integrated farm statistics.</p> <p>Output(s): • IFS / Framework Regulation for Integrated Farm Statistics in EP/Council. • SAIO / Proposal for Framework Regulation for Statistics on Agricultural Input and Output. • Implementing regulations.</p> <p>Other financing DG(s): AGRI.</p>	Project (2010-2021)
08	<p>[AAct] Economic Accounts for Agriculture</p> <p>Description: Collection, validation, production and dissemination of data and metadata.</p> <p>Product(s): • [AAct] Economic accounts for agriculture.</p>	Process
08	<p>[AActMod] Modernisation Economic Accounts for Agriculture</p> <p>Description: Modernisation of the legal basis for Economic Accounts for Agriculture and streamlining of the production process. This project concerns the statistical product "Economic accounts for agriculture".</p> <p>Output(s): First draft deliverables of the project: • Evaluation of the legal basis. • First draft of updated manual.</p>	Project (2017-2021)
08	<p>[AEI] Agro-Environmental Statistics</p> <p>Description: Collection, validation, production, dissemination of data and metadata.</p> <p>Product(s): • [AEI] Agro-environment. • [OrgFarm] Organic farming.</p> <p>Other output(s): Coordination role according to specific Memorandum of Understanding on agro-environmental indicators (EC services involved: Eurostat, DG AGRI, DG CLIMA, DG ENV, DG SANTE, JRC and EEA).</p>	Process
08	<p>[APri] Agricultural Prices and Indices</p> <p>Description: Collection, validation, production and dissemination of data and metadata.</p> <p>Product(s): • [APri] Agricultural prices. • [APriInd] Agricultural price indices.</p>	Process
08	<p>[APro] Animal production statistics</p> <p>Description: Collection, validation, production and dissemination of data and metadata.</p> <p>Product(s): • [AProMe] Animal production - meat. • [AProPo] Animal production - poultry. • [AProMi] Milk, milk products and dairies structure.</p>	Process
08	<p>[Crop] Crop statistics</p> <p>Description: Collection, validation, production and dissemination of data and metadata.</p> <p>Product(s): • [Crop] Crop production. • [CropBal] Crop balances. • [PermCrop] Permanent crops.</p> <p>Other financing DG(s): AGRI.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/Process
08	[Fish] Fishery statistics Description: Collection, validation, production and dissemination of data, metadata and of indicators. Product(s): • [Fish] Fishery. • [FishFleet] Fishing fleet. • [Aqua] Aquaculture. Other output(s): • 3rd evaluation report on the "aquaculture regulation" to Council and EP.	Process
08	[FishSimpl] Streamlining and simplification of European fishery statistics Description: This project concerns the statistical products "Fishery", "Fishing fleet" and "Aquaculture". Output(s): • Evaluation of the legal basis.	Project (2017-2021)
08	[FSS] Farm Structure Survey Description: Collection, validation, production and dissemination of data and metadata. Product(s): • [FSS] Structure of agricultural holdings. Other output(s): • Ad hoc extractions from farm structure surveys for data not available from the online database for other DGs/Agencies. Other financing DG(s): AGRI.	Process
08	[EnvCircEco] Circular economy indicators *NEW* Description: Develop and maintain the circular economy indicator set and its metadata to support the monitoring of policies on circular economy. Maintain the dedicated website on natural resources. Maintain the set of indicators to monitor the effectiveness of the EU chemicals policy. Product(s): • [CircEco] Circular economy indicators. Other output(s): • Dedicated section on circular economy. • Dedicated website on natural resources.	Process
08	[EnvDirCoord] DIMESA secretariat, coordination and cooperation activities at Eurostat, EU and international level Description: Secretariat of the directors group on sectoral and environmental statistics and accounts (DIMESA). Contribute to the environmental knowledge community, involving several Commission DGs and the European Environment Agency. Contribute to international handbooks related to the System of Environmental Economic Accounts (SEEA). Output(s): • DIMESA planning and follow up (secretariat). • Assistance to DG ENV in the context of the environmental knowledge community. • International handbooks related to the System of Environmental Economic Accounts (SEEA).	Process
08	[EnvResEffic] Resource efficiency indicators Description: Maintain the resource efficiency scoreboard and its metadata to support the Europe 2020 flagship initiative for resource efficiency. Product(s): • [REI] Resource efficiency. Other output(s): • Resource efficiency scoreboard (dedicated section).	Process
08	[EnvWaste] Waste statistics Description: Collect and disseminate data on: generation and treatment of waste (Regulation EC No 2150/2002); municipal waste; transboundary waste shipments (Regulation (EC) No 1013/2006); waste electrical and electronic equipment; packaging waste; end-of-life vehicles; batteries and accumulators. Maintain indicators on waste management and recycling. Maintain the dedicated website on waste statistics. Product(s): • [Waste] Waste statistics. • [RegEnv] Regional environment. Other output(s): • Service offered to DG ENV: collect, validate and disseminate data on transboundary shipment of waste. • Service offered to DG ENV: collect, validate and disseminate data on generation and management of different waste streams.	Process
08	[ForStAcc] Forestry statistics and accounts Description: Collect and disseminate forestry statistics and accounts. Product(s): • [Forest] Forestry statistics and accounts.	Process
08	[Avia] Air transport statistics Description: Annual/quarterly/monthly data collection on the carriage of passengers, freight and mail by commercial air services as well as on civil aircraft movements to or from Community airports, based on Regulation (EC) No 437/2003 of the European Parliament and of the Council, including regional and infrastructure statistics. Product(s): • [Tran-Avia] Air transport.	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
08	[EndTranEndInd] Energy, transport and environment indicators Description: Publication of the annual statistical book on energy, transport and environment indicators. Output(s): • Annual statistical book.	Process
08	[IWW] Inland WaterWay freight transport statistics Description: Annual/quarterly data collection (goods transported by type, transport by nationality and type of vessels, vessel traffic) on inland waterway freight transport, based on Regulation (EU) 2016/1954 of the European Parliament and of the Council of 26 October 2016 amending Regulation (EC) No 1365/2006 on statistics of goods transport by inland waterways, including infrastructure and regional data statistics. Methodological work to develop passengers' statistics and study on the feasibility to collect these data. Product(s): • [Tran-IWW] Inland waterway transport.	Process
08	[Mar] Maritime transport statistics Description: Annual/quarterly data collection (carriage of goods and passengers by sea) on maritime transport statistics, based on Directive 2009/42/EC of the European Parliament and of the Council and Regulation (EU) 1090/2010, including regional statistics. Besides the currently produced statistics, Eurostat will continue the exploratory work on possible use of administrative data for maritime statistics in collaboration with the Member States in the Task Force on Maritime Transport Statistics 2017-2018. Product(s): • [Tran-Mar] Maritime transport.	Process
08	[Rail] Rail transport statistic Description: Quinquennial/annual/quarterly data collection (goods and passengers) on rail transport, based on Regulation (EU) 2016/2032 of the European Parliament and of the Council of 26 October 2016 amending Regulation (EC) No 91/2003 of the European Parliament and of the Council, including regional and infrastructure statistics. Product(s): • [Tran-Rail] Rail transport.	Process
08	[Road] Road transport statistics Description: Freight transport: quarterly data collection (vehicle, journey and goods-related data) on road freight transport, based on Regulation (EU) 70/2012 of the European Parliament and of the Council, including regional and infrastructure statistics Road traffic volumes and Passenger mobility: annual voluntary data collection on the volume of road transport measured in VKm (Vehicle Kilometre); improving the guidelines for harmonisation of national travel surveys for monitoring the targets of the White Paper; grants for the countries to collect data for the 2 activities and dissemination of the data received. Product(s): • [Tran-Road] Road transport *.	Process
08	[TranInd] Indicators derived from Transport statistics Description: Modal split indicators (the relative share of each individual mode in the total transport performance measured in tonne kilometre and passenger kilometre); Development of additional transport policy relevant indicators that may be produced on the basis of Eurostat statistics (including proxies); Intermodal transport statistics, including logistic indicators (support, with grants, the development of data collection on intermodal transport); Transport safety (accidents data by transport mode). Product(s): • [Tran-Ind] Transport indicators.	Process
08	[531] Coordination of geospatial information in the Commission within the European Statistical System and on international level Description: Coordination within the Commission via the Inter-service Group (COGI), the related technical committee (UTC) and within the European Statistical System via a Member States Working Group. Key aspects are: • The link between geospatial information and statistics. • INSPIRE (Infrastructure for Spatial Information in Europe), particularly its implementation in the Commission. • Active participation in the United Nations initiated UN-GGIM and its European branch UN-GGIM: Europe. (COGI=Commission interservice group for geographical information, UTC=User and Technical Committee, UN-GGIM=United Nations Global Geospatial Information Management). Output(s): • Coordination of geographic information in the Commission, operation of the COGI Interservice Group and the GISCO (Geographical Information System of the Commission). User and Technical Committee. • Services to assist Commission DGs and Eurostat units in GIS (Geographical Information System) work, such as via framework contracts. • Capacity building and exchange of best practices within the European Statistical System and on international level. • Improving data quality of geospatial data through better specifications and guidelines.	Process
08	[GEOSTAT] Integration of statistical and geospatial information Description: Series of projects in cooperation with Member States to advance the integration of statistical and geospatial information within NSI (Merging Statistics and Geospatial Information), and at European level (ESSnets GEOSTAT). Participation in working groups of UN-GGIM (United Nations Global Geospatial Information Management). Output(s): • Blue print for a spatial reference framework for statistics (GEOSTAT). • Closer cooperation within Member States between NSI and NMCAs (National Mapping and Cadastre Agencies), improved production systems and enhanced information. • High visibility for statistical matters in UN-GGIM.	Project (2009-2021)

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
08	<p>[GISCO(IT)] GISCO geographical information system - IT part</p> <p>Description: IT part of the operation and maintenance of the GISCO (Geographic Information System for the Commission) in terms of further development of the technical system and related tools in Eurostat and the Commission Data Centre: Provision of GIS (Geographical Information System) tools. Development of ad-hoc IT programs for the different GISCO services.</p> <p>Output(s): • Technically improved tools for the operation and further development of GISCO services. • Maintenance of the Commission internal Geoportal. • Design and evolutive maintenance of the distance calculation tool for transport statistics. • Design and evolutive maintenance of the tool for the creation of statistical and thematic maps.</p>	Process
08	<p>[GISCO] GISCO geographical information system</p> <p>Description: Operation and evolutive maintenance of the GISCO (Geographic Information System for the Commission) system as well as related tools and services in Eurostat and the Commission Data Centre: - Procurement, processing and dissemination of reference geographic datasets for Eurostat and the Commission. - Production of statistical and thematic maps in paper and electronic format based on extractions from statistical databases. - Design and provision of GIS (Geographical Information System) tools.</p> <p>Product(s): • [GISCO] Demographic data at geospatial grid level.</p> <p>Other output(s): • Geospatial reference spatial datasets and services for Eurostat and Commission DGs. • Generalised reference datasets for the general public. • Statistical maps in electronic and paper format. • Data and services for the Commission internal Geoportal. • Spatial analyses for statistical or policy relevant issues.</p> <p>Other financing DG(s): JRC, REGIO.</p>	Process
08	<p>[LUCAS] Land use and land cover statistics</p> <p>Description: Preparation and carrying out of the regular Land use and land cover statistics (LUCAS) Survey. Collecting, processing and dissemination of European data on land use and land cover; by assessing and collecting available data in countries and by taking into account the need for harmonisation of these data and by co-operating with Commission DG, the European Economic Area, other international bodies and Member States.</p> <p>Product(s): • [LUCAS] Land cover and use, landscape.</p> <p>Other output(s): • LUCAS in-situ micro data on land-cover/land use, soil samples, land-cover/land use detailed data for specific modules, e.g. grassland.</p> <p>Other financing DG(s): AGRI, CLIMA, ENV, GROW.</p>	Process
08	<p>[NUTS] Maintenance of the Nomenclature of Territorial Units for Statistics Classification and related Regulations</p> <p>Description: Preparing a draft Regulation on a territorial classification as amendment of the NUTS classification. Coordination of the Nomenclature of Territorial Units for Statistics (NUTS) classification and regular revision via amendment regulations as well as Implementing Regulations in order to coordinate the adaptation of statistics to the NUTS changes. The process includes annual collection of Local Administrative Unit 2 (LAU 2, commune level) as basis for definition of NUTS boundaries as well as dissemination.</p> <p>Output(s): • Draft Regulation on a territorial classification as amendment of the NUTS classification. • Implementation Regulation for Nomenclature of Territorial Units for Statistics (NUTS). • Preparation of the upcoming NUTS update.</p>	Process
08	<p>[Reg] Coordination of Regional Statistics</p> <p>Description: Cooperation with Eurostat thematic units on regional statistics data collection in all phases of the statistical production cycle, the further evolution of indicators, metadata maintenance and their methodological basis as well as dissemination issues including the Eurostat Regional Yearbook and Statistical Atlas. Coordination with policy DGs of the Commission on regional, maritime, rural and urban statistics. Cooperation with ESS on regional, maritime, rural and urban statistics related issues. The process includes the actions related to the revision and maintenance of the thematic classifications, such as urban-rural typology. The process also includes activities to support the voluntary commitment by the European Commission to develop a global, people-based definition of cities and settlements together with OECD, UN and World Bank.</p> <p>Product(s): • [Reg] EU regions and regions' typology. • [DegUrb] Degree of urbanisation.</p> <p>Other output(s): • System of regional typologies and its maintenance, such as urban-rural and degree of urbanisation. • Geographic and statistical analyses for defining functional regions as well as other regional boundaries and characteristics for other DGs.</p>	Process
08	<p>[SubN] Sub-National statistics</p> <p>Description: The process covers: • regional labour market statistics both at NUTS 2 and NUTS 3 level, including the calculation of structural indicators. • rural development data collection. • compilation of indicators important for maritime policy. • compilation of aggregates based on regional typologies (metropolitan/urban/rural). (NUTS=Nomenclature of Territorial Units for Statistics).</p> <p>Product(s): • [Reg] EU regions and regions' typology. • [DegUrb] Degree of urbanisation.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
08	<p>[Urb] Urban statistics Description: Urban Statistics cover a range of statistical indicators for European cities. A smaller set of indicators are produced on an annual basis and a larger one on a multi-annual basis complemented by methodological work using small area statistics harvesting big data sources and open data sources. Product(s): • [Urb] Key indicators on European cities. Other output(s): • Inventory of novel methods for obtaining small scale statistics making use of advanced techniques and taking into account national experiences in the area. Other financing DG(s): REGIO.</p>	Process
08	<p>[636] Implementation of the Regulation on European statistics on natural gas and electricity prices Description: Implementation of the Regulation (EU) No 2016/1952 of the European Parliament and of the Council on European statistics on natural gas and electricity prices including work on the subsequent implementing acts. Output(s): • Implementing act on the format and arrangements for the transmission of the data. • Draft implementing act on quality reports.</p>	Project (2014-2019)
08	<p>[674] Sankey diagrams for energy balances Description: Production of Sankey diagrams for energy balances as Eurostat used to produce in the past in the paper form under the name Energy Flow Charts. There are possibilities to add additional features to the paper form and to utilise modern technologies, for the improvement of user-friendliness of the dissemination for complicated energy flows. Output(s): • Modifications to the web tool to produce Sankey diagrams for energy balances in order to adapt it to the changes introduced by the new "Energy Statistics Regulation" in the methodology and elements of the Eurostat energy balances. Among other elements, the new Regulation (which should be adopted during 2017 and for which the first data collection will take place in 2018) will introduce the collection of new renewable fuels which must be displayed in the tool.</p>	Project (2015-2018)
08	<p>[695] The Future Energy Information System Description: A renewed information system for energy statistics based on a functional and technical optimisation/review of the collection / validation / production / dissemination processes and systems for energy statistics and taking into account SDMX and VIP validation requirements. (SDMX=Statistical Data and Metadata Exchange, VIP=Vision Implementation Project). Output(s): • Redesigned database. • Improved validation tools and optimised data production and calculation of indicators. • SDMX artefacts for energy statistics.</p>	Project (2015-2019)
08	<p>[716] Update of energy questionnaires Description: Ensure operability of the updated joint annual energy questionnaires; implement new questionnaires in the production environment; implement new validation rules agreed by the Energy Statistics Working Group; update reporting instructions and manual for filling-in the questionnaires. Output(s): • Update of energy questionnaires. • Manuals and reporting instructions.</p>	Project (2015-2018)
08	<p>[751] Contribution to the Energy Union Description: Data compilation and service provision: contribute to the Energy Union Country Factsheets and to the SWD key indicators to monitor the progress towards the Energy Union objectives. Follow-up and contribution to the creation, evaluation and review of the energy security legal acts (on electricity, natural gas and oil & petroleum products stocks); also, of other energy and energy statistical reporting related legal acts (e.g. energy efficiency directive and renewable energy directive). Contribution to conceptual and methodological developments and support as concerns the establishment of statistical data for the design and monitoring of energy policies. Dissemination of the statistical information related to the Energy Union, including through high visibility publications. Output(s): • Contribution to DG ENER's country factsheets and to the SWD key indicators to monitor the progress towards the Energy Union objectives. • Input to creation, evaluation and review of DG ENER's legal acts on energy. • Conceptual and methodological developments as concerns the establishment of statistical data for the design and monitoring of energy policies. • Dissemination of the statistical information related to the Energy Union.</p>	Project (2016-2021)
08	<p>[781] Further disaggregation of the statistics on final energy consumption Description: Development of more detailed statistics on energy consumption by establishing breakdown keys for final energies by sector and main energy uses and integrating the resulting elements into the statistics (in order to comply with Article 9 of the Regulation (EC) No. 1099/2008 on energy statistics). Output(s): • Discuss possible breakdown keys for further disaggregation of the final energy consumption in the Industry sector; develop dedicated reporting template; • Prepare the disaggregation of the other final energy consumption sectors (Services and Transport). • Organize pilot exercise on new data collection; organize training for reporting countries. • Draft Update of Regulation (EC) No. 1099/2008 on energy statistics.</p>	Project (2016-2019)

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
08	<p>[CO2] Early estimates of CO2 emissions Description: Preparation of CO2 emission estimates on the basis of monthly and other energy statistics using a methodology developed in an earlier study. Analysing the quality of monthly data by evaluating the coherence of monthly and other energy statistics and describing clearly the process to be followed to improve this quality if necessary. Product(s): • [CO2] CO2 emission estimates from fossil fuel combustion. Other output(s): Final report of the project produced by the end of the year.</p>	Process
08	<p>[CrOiImRe] Crude oil import register *NEW* Description: Assessment of feasibility and gradual transfer of data collection on crude oil imports and crude oil supply costs from DG ENER and implementation in Eurostat as European Statistics. Output(s): • A legal act drafted to implement the data collection on crude oil imports and crude oil supply costs as European Statistics.</p>	Project (2017-2020)
08	<p>[EA-BA-ES] Early estimates of energy balances Description: Data collection, production and dissemination of early estimates of energy balances for year 2017; analysis of accuracy of estimates vis-à-vis the real 2017 data. Product(s): • [NRG] Energy. • [NRG-BS] Energy balance sheets. Other output(s): • Methodology description of estimates.</p>	Project (2016-2021)
08	<p>[ENERGY-BALANCES] Update of the energy balances methodology Description: Analyse and document in depth the existing energy balances produced by Eurostat and other international and national organisations. Develop, document, implement and publish the new methodology for energy balances and the energy balances themselves. Output(s): • New methodology for energy balances. • Other methodological documents.</p>	Project (2016-2018)
08	<p>[EnerPolInd] Monitoring of 2020 strategy energy indicators Description: Manage the statistical methodology for the production of indicators to monitor energy efficiency and share of renewable energy targets arising from Commission legislative acts and Europe 2020 strategy. Product(s): • [NRG-DE] Energy dependence and efficiency. • [NRG-RES] Share of energy from renewable sources.</p>	Process
08	<p>[HDD+CDD] Indicators Heating Degree Days and Cooling Degree Days Description: Re-launching and implementation of the "Heating and Cooling Degree Days"-data set. Following the development of a common method for the calculation and dissemination of Heating Degree Days (HDD) and Cooling Degree Days (CDD), process implementation actions [including also IT related actions] are necessary. Product(s): • [HDD+CDD] Heating degree days and Cooling degree days.</p>	Process
08	<p>[NRG-A] Annual energy statistics Description: Update of Eurobase with annual energy statistics data on solid fuels, oil and natural gas, electricity and renewable energy sources, in accordance with the Energy Statistics Regulation (EC) No 1099/2008, Annex B; preparation of energy balance sheets, publications, reports on compliance monitoring and quality assurance, user support output. Product(s): • [NRG] Energy. • [NRG-BS] Energy balance sheets. • [NRG-DE] Energy dependence and efficiency.</p>	Process
08	<p>[NRG-M] Monthly energy statistics Description: Update Eurobase with monthly statistics on solid fuels, oil and natural gas, electricity and certain renewable energy sources, in accordance with the Energy Statistics Regulation (EC) No 1099/2008, Annexes C and D; publications, reports on compliance monitoring and quality assurance. This includes detailed statistics on security of supply. Product(s): • [NRG] Energy.</p>	Process
08	<p>[NRG-Price] Natural gas and electricity prices and energy market statistics Description: Update Eurobase with natural gas and electricity prices according to Regulation (EU) No 2016/1952 and energy market statistics dataset including: bi-annual publications in Statistics Explained, reports on compliance monitoring and quality assurance, user support output. Product(s): • [NRG-Price] Energy prices.</p>	Process
08	<p>[WePr] Weekly prices of petroleum products *NEW* Description: Assessment of feasibility and gradual transfer of data collection on weekly prices of petroleum products from DG Energy and implementation in Eurostat as European Statistics. Output(s): • A legal act drafted to implement the data collection on weekly prices of petroleum products as European Statistics.</p>	Project (2017-2020)

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
09	<p>[368] Maintain and modernise the quality management system of the European Statistical System</p> <p>Description: Continuous update/modernisation of the common Quality Framework, quality standard setting, advising, quality for the institutions as a whole.</p> <p>Output(s): • Revised European Statistics Code of Practice. • Revised ESS QAF (Quality Assurance Framework), in line with the revised European Statistics Code of Practice. • Revised Single Integrated Metadata Structure, as appropriate and following the first round of implementation of SIMS v2.0. • Quality Declaration of the ESS and Quality Policy of Eurostat. • ESS Handbook for Quality Reports revised a second time. • ESS Quality Glossary continuously revised, as appropriate. • Advices and positions on quality issues provided and published, as appropriate. • For Eurostat: EFQM-related developments, for the ESS: QUAL@ESS Vision 2020 Action 3 (EFQM = European Foundation for Quality Management).</p>	Process
09	<p>[375] Coordinate quality work, assure stakeholders' relations</p> <p>Description: Coordination Group Quality, Working Group on Quality, DIME/ITDG, ESSC, ESGAB, etc. (DIME = Directors of Methodology Group, ITDG = Information Technologies Directors Group, ESSC = European Statistical System Committee, ESGAB = European Statistical Governance Advisory Board).</p> <p>Output(s): • Quality and the related work is steered in Eurostat. • Quality and the related work is steered in the ESS. • Continuous relations with the key stakeholders are assured. • Good relations with the other stakeholders are assured.</p>	Process
09	<p>[666] Implement and monitor the quality management system of the European Statistical System</p> <p>Description: Monitor the implementation, Quality Reviews exercise, Error management procedure, Impartiality Protocol, Quality reporting in the ESS.</p> <p>Output(s): • Monitor the Improvement Actions identified in the second round of ESS peer reviews. • Prepare the next round of ESS peer reviews. • Eurostat's Quality Reviews Reports. • Eurostat's Inventory of Error Reports. • Eurostat's revised Impartiality Protocol. • Related presentations, explanations, contributions are provided, as appropriate. • Advices and positions on quality reporting provided and published, as appropriate.</p>	Process
09	<p>[679] Quality for the institution as a whole</p> <p>Description: Further enhancement of quality management in Eurostat.</p> <p>Output(s): • Related reports and contributions provided, as appropriate.</p>	Project (2015-2021)
09	<p>[680] QUAL@ESS Vision 2020 Supporting Framework</p> <p>Description: Develop and implement enhancements to quality management in the European Statistical System (ESS).</p> <p>Output(s): • QUAL actions 1-3 under the umbrella of the ESS Vision 2020 being under development and implementation in cooperation with the Member States progressing according to plan. • The smooth functioning of the HLG-Q is assured (minutes, reports, documents, web pages, etc).</p>	Project (2014-2020)
09	<p>[857] Promote the quality management system of the European Statistical System *NEW*</p> <p>Description: Quality conferences, training courses, internal and international cooperation, communication, supporting activities.</p> <p>Output(s): • The biennial quality conferences take place. • (Internal and external like ESTP) training courses and presentations on quality issues take place. • Internal and international cooperation on quality issues is assured. • The external Eurostat web pages and internal Cybernews Intranet are continuously up-to-date. • The supporting / administrative activities are assured.</p>	Process
10	<p>[COSTS] Cost assessment - production of statistics in Eurostat and the ESS</p> <p>Description: Support priority-setting in the ESS.</p> <p>Output(s): • Cost analysis of European statistics (by products): Results of the remaining products of cost assessment in the ESS. • Cost assessment survey on official statistics: collecting cost and FTE information on the year 2017.</p>	Project (2015-2019)
10	<p>[FinalESPeval] Final evaluation of the ESP 2013-20</p> <p>Description: Final evaluation of the implementation of the European statistical programme 2013-20. This project depends on the approval of the extension of the ESP to 2018-20.</p> <p>Output(s): • Evaluation roadmap, contractor selected via a call for tender.</p>	Project (2019-2021)
11	<p>[ESPbeyond2020] European Statistical Programme beyond 2020</p> <p>Description: Preparatory work for a new European Statistical Programme (ESP) to cover the New Multiannual Financial Framework (MFF) period beyond 2020.</p> <p>Output(s): • Impact assessment. • Second mid-term evaluation of the ESP 2013-17.</p>	Project (2017-2020)

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
11	[372] Enterprise Architecture Description: Integration and standardisation of EU statistics production processes and data management. Output(s): • Progress in the integration and standardisation of EU statistics production processes, incl. running of EG on Standardisation. • Reference architecture for Eurostat and related implementation roadmaps (validation, data management...). • Enterprise Architecture reviews of Eurostat IT projects for the IT Design Board.	Process
11	[744] Implementing a common validation approach Description: The project will focus on (1) implementation of the European Statistical System (ESS) methodological handbook produced by the ESS Vision 2020 project Validation, (2) implementation and further development of VTL (Validation and Transformation Language), with the ultimate objective of adopting it as a standard ESS syntax for the description of validation rules, (3) Towards a validation policy that details the links between validation and compliance. Output(s): • Updated handbook on validation. • Implementation of VTL version 1.1 and of the handbook on validation. • Implementation of an ESS validation policy/architecture.	Project (2016-2020)
11	[791] Business process management and modelling Description: Development and implementation of a Eurostat process management framework. Output(s): • 80% Eurostat processes documented at high level. • Training of Eurostat staff. • Maintenance of central repository.	Project (2016-2020)
11	[EA] Framework - Enterprise Architecture Description: Support to and review of ESS Vision 2020 implementation portfolio and projects. Development and maintenance of ESS Reference Architecture for improving efficiency and quality of statistical production. Development, maintenance and promotion of standards and interoperability solutions aiming at higher integration of ESS processes. Output(s): • Architectural principles and framework for Vision implementation and process integration updated. • Benefit realisation review of ESS Vision 2020. • Up-to-dated ESS EA Reference Framework, including interoperability requirements. • Communication and capacity building. • Coordination and coherence with other developments (UNECE, technological innovation, ...). • Support to Member States to upgrade their interoperability maturity.	Project (2013-2020)
11	[ESS.VIP.PGM] ESS Vision 2020 Portfolio management Description: ESS Vision 2020 portfolio governance, risk and resources, administrative mechanisms, communication, monitoring. Output(s): • Contributions to Eurostat Portfolio Management Bureau, Coordination Group Vision and ESS Vision Implementation Group. • ESS Vision 2020 projects managed within a portfolio approach. • Monitoring of implementation of ESS Vision 2020. • Communication actions.	Process
11	[METHODOLOGY] Methodology in official statistics Description: Provide within Eurostat and to other DGs methodological expertise, user support and training to improve statistical production processes and quality of output, incl. through the methodological helpdesk and the methodological framework contract. Organisation of and secretariat to DIME/ITDG meetings. (DIME = Directors of Methodology Group, ITDG = Information Technologies Directors Group). Output(s): • Methodological support provided within Eurostat, incl. to ESS VIP 2020 ADMIN. • Methodological support provided to other Commission DGs. • DIME/ITDG plenary and SG, Methodology Working Group meetings organised. • METAC (Methodology Advisory Committee), Eurostat methodological network organised. • Contributions to Data4Policy provided.	Process
11	[SA(CoE)] Centre of Excellence on Seasonal Adjustment Description: Activities supporting the testing and the promotion of JDemetra+ (seasonal adjustment software). Support, training and coaching of Seasonal Adjustment practitioners. Output(s): • Co-ordination of seasonal adjustment in the European Statistical System and with the European System of Central Banks. • Development specifications, testing and support for JDemetra+. • Release of JDemetra+ 3.0 version including plug-ins for benchmarking, quality and revisions. • Seasonal Adjustment Expert Group.	Process
11	[379] IT Coordination and Management Description: Support the ESTAT IT Resource Manager (IRM) with the coordination of relations with DIGIT, handle the logistics for the internal IT Advisory Committee regular meetings, when necessary participate to the Digital Stakeholder Forum (DSF) representing ESTAT IRM. Support the IRM with the review and approval of the IT Expenditure requests. Output(s): • Governance of IT services across DIGIT and Local IT, overall Service level management across IT providers.	Process
11	[381] Workplace services - HW/SW management Description: Manage hardware (HW) and software (SW) of Eurostat internal IT end-users. Output(s): • Management of software's licenses for ESTAT specific software (client and server). From 2018, it includes all licenses for other Units previously financed with their operational budget. • Timely extension of maintenance contracts. • Proper management of hardware used by end-users. This includes the timely provisioning of PCs/laptops to ESTAT staff and the correct inventarisation of equipment.	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
11	[703] IT Training Coordination Description: Provide and coordinate IT Training. Output(s): • Manage the tasks of the "Responsible Formation Informatique" for Eurostat.	Process
11	[704] Local Data Centre Consolidation Description: Continue during 2018 to migrate Infrastructure towards DIGIT Data Centre - under DIGIT governance and execution. This internal project is to ensure support from ESTAT on this migration. Output(s): • Transition Local Servers from BECH Local Server Unit and JMO to future Data Centre selected by DIGIT as long-term solution for JMO Exit.	Project (2016-2018)
11	[795] IT Client Engagement Description: Coordinate IT engagement with all units and ensure business plans are correctly reflected in IT plans. Output(s): • User satisfaction feedback on overall IT services. • Alignment of Business projects with IT Projects. • Regular engagement with Units to collect their feedback on quality of IT services and to collect additional business requirements that need IT support.	Process
11	[796] Coordination of IT Design Board Description: Coordination of the activities of the IT Design board established in 2015 by the new IT Governance. Output(s): • Organize technical reviews for all new projects in ESTAT and confirm compliancy with IT strategy and IT principles outlined in IT Strategy/Governance documents. • Organize technical reviews of change requests representing major architecture changes including IT rationalisation.	Process
11	[Cloud] Cloud service engagement and management of providers *NEW* Description: Activities related to coordination and provisioning of IT services related to cloud services. Cloud services might be used instead of classical hosting services. Output(s): • Coordination of provided services from providers to business in Eurostat. • Consultancy to business in Eurostat regarding the use of cloud services. • Monitor and evaluate cloud service levels.	Process
11	[IT4NWW] IT infrastructure for New Way of Working Actions *NEW* Description: Implement IT infrastructure required for New Way of Working Actions (= rollout new IT tools for BECH building). Output(s): • Provide IT infrastructure which supports mobility and integrated communication.	Project (2018-2020)
11	[621] IT for dissemination of data and metadata Description: Maintenance and support of Information Systems for the dissemination of data and metadata - for Eurostat, and for potential sharing in the European Statistical System. Output(s): • Dissemination chain for reference data: support, and corrective and evolutionary maintenance. • COMEXT (Eurostat reference database for external trade statistics production, dissemination and energy statistics).	Process
11	[622] IT for data exchange Description: Maintenance and support of Information Systems for the exchange of data and metadata in the European Statistical System. Output(s): • eDAMIS (Electronic Data files Administration and Management Information System): support, and corrective and evolutionary maintenance. • SIMSTAT (Single Market Statistics): support for the SIMSTAT IT system after the trial data collection. • Census hub: support, and corrective and evolutionary maintenance, and information of Member States. • ESS-MH (Metadata Handler): support, and corrective and evolutionary maintenance.	Process
11	[623] IT for statistical production Description: Maintenance and support for production chains, implementation of new production chains using corporate IT tools. Output(s): • Implementation of production chains for new data collections. • Information systems for statistical production: support, and corrective and evolutionary maintenance. • Migration of "local" production chains towards corporate solutions.	Process
11	[624] IT for standardisation of data and processes Description: Maintenance, support and development of tools and services for standardisation of data and processes. Output(s): • SDMX (Statistical Data and Metadata Exchange) tools: support, and corrective and evolutionary maintenance. • Standard data collection tool based on Excel and SDMX: support, and corrective and evolutionary maintenance. • Participation in international activities related to SDMX, in particular representing Eurostat in the SDMX Technical Working Group. • SDMX tools Task Force. • VTL (Validation and Transformation Language) design and implementation.	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
11	[625] IT working group organisation and framework contract management Description: IT working group organisation and framework contract management. Output(s): • IT strategy: regular update and progress reporting. • Product management. • IT rationalisation: reduce the number of IT applications. • IT Working Group. • Framework contract(s). • UNECE (United Nations Economic Commission for Europe) Modernisation Committee Production & Methods.	Process
11	[711] IT tools for data processing Description: Maintenance and development of tools for data processing. Output(s): • Information System for Statistics (IS4STAT), Multi-dimensional tables (MDT), FAME (Statistical production system specialised in processing time series) interfaces. • Jdemetra+ connection to FAME. • Validation tools developments. Web-services and IT architecture governance.	Process
11	[Census2021(IT)] CensusHub 2021 - IT part *NEW* Description: Project to implement the IT side of the new round of Census collection on 2021. Output(s): • Mapping of INSPIRE data to CENSUS data, analysis of the possible changes needed in the CENSUS 2021 infrastructure.	Project (2018-2020)
11	[COOL(IT)] Corporate Overview Layer *NEW* Description: Project aiming at creating a standard, common web-based interface and process orchestrator that will allow different stakeholders to have a full control and overview of the statistical production processes, based on their configured role. Intended for all micro-economic domains, the application will allow a wider adoption once implemented. Output(s): • Design of the generic statistical production process steps to be monitored and controlled by the application. • Build mock-ups and prototype of the interface and validate them with the Directorate in charge. • Coordinate changes and implementations to be done in the statistical information systems managing the micro-economics production processes.	Project (2017-2020)
11	[DAS(IT)] Data Analytics Support *NEW* Description: Support for the data as a service project. It includes the set up and management of a data virtualisation environment to enable the on demand creation of statistics. Output(s): • Set up of a functioning data virtualisation environment and the structure and means needed in order to provide technical support to the data as a service project.	Project (2018-2020)
11	[EDC(IT)] Renovation of Eurostat's dissemination chain Description: • The Eurostat dissemination chain will be renovated, i.e. redeveloped based on an integrated new architecture. • The legacy Eurostat dissemination chain will be phased out. • A reusable solution for the dissemination of statistics, for other Commission Directorates General (DGs), will be produced by the project as well. Output(s): • Renovated dissemination chain. • Reusable solution for the dissemination of statistics.	Project (2014-2020)
11	[ESDEN] European Statistical Data Exchange (ESS Vision 2020 ESDEN) Description: Modernisation of the services offered to the European Statistical System for data exchange in order to increase the capacity and improve the interoperability and security to cope with the increasing needs of the ESS. Output(s): • Execution of the third phase of the ESDEN project including the following activities: • Connection of countries to secure network for the exchange of confidential data. • Development of the new interfaces for exchanging of data (Web services). • Modernisation of the current Single Entry Point (EDAMIS).	Project (2013-2020)
11	[EUROFARM(IT)] Farm Structure Survey modernisation (IT) *NEW* Description: Support IT activities for the modernisation of the farm structure survey IT system. This includes the implementation of the Farm Structure survey using corporate tools. Output(s): • First prototype of the new Farm Structure Survey system implemented using corporate tools for the implementation.	Project (2017-2020)
11	[HICP_Modern(IT)] HICP Modernisation *NEW* Description: Project concerning the IT part of the HICP modernisation initiative aiming to have a SOA based production system for the prices domain (HICP = Harmonised Indices of Consumer Prices , SOA = Service Oriented Architecture). Output(s): • Modernisation of HICP system using SOA infrastructure already in use in other domains (STRUVAL, CONVAL)) and further enhancements of the current production process.	Project (2017-2019)
11	[INTRASTAT(IT)] INTRASTAT Project - IT part *NEW* Description: IT activities related with the Intrastat modernisation project. It covers the implementation of IT system for the micro-data exchange on the domain of external trade. Output(s): • Modifications on the current IT system for microdata exchange (SIMSTAT) to accommodate the new requirements for a full production system.	Project (2018-2020)

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
11	<p>[NAPS-III(IT)] Extension of NAPS project (IT part) *NEW*</p> <p>Description: The goal of this project is to cover different workpackages related to the national accounts domain, including consolidation of processing tools, creation of revisions databases and extension of the quality report.</p> <p>Output(s): • First modules of the project are implemented, including among others the migration of REGACC to FAME.</p>	Project (2018-2020)
11	<p>[SERV] Sharing SERVICES (ESS Vision 2020 SERV)</p> <p>Description: SERV aims at creating the conditions for sharing statistical services and supporting their integration in statistical production processes at national, European Statistical System and Commission level.</p> <p>Output(s): • Prototype for a platform to share services in the European Statistical System (part of ESS Vision 2020 programme; SERV activity). • Participate in international activities related to CSPA (Common Statistical Production Architecture). • Data Validation Service that can be shared in the European Statistical System. • An ESSnet on Service implementation will be running. • Task Force shared SERVICES. • CSPA service catalogue: maintenance & support.</p>	Project (2013-2020)
11	<p>[405] Implement the SDMX standards in European Statistical System and beyond</p> <p>Description: Implement the Statistical Data and Metadata Exchange (SDMX) standards in statistical domains, support the harmonisation and integration of the underlying statistical business processes and relate this to the SDMX compliant validation services.</p> <p>Output(s): • SDMX standardisation services provided for statistical domains. • Business analysis related to validation services.</p>	Process
11	<p>[406] Provide user services for European Statistical System data validation and eDAMIS</p> <p>Description: Provide first level eDAMIS (electronic Data files Administration and Management Information System) user services to Eurostat and ESS users; provide first level user services related to data validation services to Eurostat and ESS users. Provide capacity building, user guidance and deliver appropriate testing for the new EDAMIS.</p> <p>Output(s): • User services provided for eDAMIS and ESS data validation. • eDAMIS and Validation Services User Group (EVUG). • Guidelines and end user documentations. • Training.</p>	Process
11	<p>[408] Support the legislation of European Statistical System standards</p> <p>Description: Support the legislation of statistical and technical standards in statistical domains.</p> <p>Output(s): • Legal advice services related to ESS standards provided.</p>	Process
11	<p>[409] Management and support of European Statistical System classifications (including legislation)</p> <p>Description: Produce, update and disseminate ESS horizontal classifications and related metadata in RAMON (Reference Architecture for Metadata Online - Eurostat's Metadata Server); produce, update and disseminate harmonised ESS structural metadata (code lists) and other metadata (e.g. CODED - Concepts and Definitions Database); ensure the user support for ESS classifications to the ESS and professional associations.</p> <p>Output(s): • Standardisation services related to ESS classifications and structural metadata provided. • Contribution to the Standards working group. • Statistical classification Task Force.</p>	Process
11	<p>[410] Provide input to the international work for statistical standards and metadata (UNECE, UNSD, SDMX)</p> <p>Description: Provide input and support to international work for statistical standards and metadata. This includes collaboration with UNECE Modernisation Committee on Standards, active participation in UNSD Expert Group on international statistical classifications and cooperation with SDMX constituency, including support of SDMX secretariat and SDMX sponsors.(UNECE = Economic Commission for Europe of the United Nations, UNSD = United Nations Statistics Division, SDMX = Statistical Data and Metadata Exchange).</p> <p>Output(s): • Activities and services supporting international work on statistical standards and metadata. • Services provided to the SDMX secretariat.</p>	Process
11	<p>[707] Standardisation of ESS structural metadata (code lists) and alignment with the SDMX code lists</p> <p>Description: This process contains standardisation of code lists and their correspondence with the Statistical Data and Metadata Exchange (SDMX) code lists.</p> <p>Output(s): • Availability of standardised code lists.</p>	Process
11	<p>[EDC] Improve the EDC; contribute to EDC renovation; make EDC available to other Commission DGs</p> <p>Description: Actively contribute to the renovation of the Eurostat Dissemination Chain (EDC), participate to task forces to analyse requirements and solutions. Coordinate and supply statistical support for the use of the EDC by other Commission DGs.</p> <p>Output(s): • Central data and metadata support services provided to other DGs of the European Commission. • Central data and metadata support services provided to the Eurostat/ESS data and metadata producer.</p>	Project (2015-2020)

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
11	[FIMS] Framework for Information Models and Standards Description: Develop, maintain and build capabilities for information models and related standards for European Statistical System data and metadata. Output(s): • Analysis of needs and requirements for metadata repositories and registry. • Support to other projects in the area of information models and standards.	Process
11	[ESS-ITSEC-ASS] Implementation of the European Statistical System IT Security Assurance mechanism Description: Implement and manage the IT security assurance mechanism in the European Statistical System (ESS) and report annually to the European Statistical System Committee (ESSC). Output(s): • IT security certification for ESS members - audit reports - annual reporting to ESSC on certification mechanism.	Project (2016-2020)
11	[ESS-ITSEC-SUPP] Support to ESS members on IT security improvement Description: Implement and manage supporting mechanism to ESS members for improving their IT security framework in order to support the exchange of microdata (VISION 2020). Output(s): • Grants provided to ESS members. • Management of the central certification body. • List of supported ESS members. • Report on achievement of IT security in ESS members.	Project (2017-2020)
11	[ITSEC-GOV] Put in place a security governance in Eurostat and in the European Statistical System Description: Define and put in place with ESS members IT security standards in order to ensure secure and reliable exchange of confidential information. Put in place a decision body related to IT security related issues within the ESS. Ensure IT security governance in Eurostat. Output(s): • Implementation and communication about the common IT security standards for Information Exchange. Documentation of ESS hardware and software architectures for security purposes in order to cope with the diversity of the ESS environments. • Management of the Expert Group on ESS IT security for elaborating and monitoring security aspects of information (data, email, micro-data, documentation) exchange in the ESS. • Security governance aligned with ESS security strategy, ESTAT IT Strategy, ESTAT Information Security Policy, Enterprise Architecture (EA) governance and project portfolio management (PPM).	Project (2014-2020)
11	[ITSEC-IAM] Implementation of Identity and Access Management in ESTAT *NEW* Description: Put in place an integrated access management system allowing to organise, track and manage users accesses to the different IT systems in ESTAT. Output(s): • Identity and Access Management (IAM) application installed in ESTAT. • List of users and access rights.	Project (2017-2019)
11	[ITSEC-PROT] Protection of information systems Description: Detection of intrusion, penetration test on ESTAT IT systems, liaison with DIGIT CSIRC (Computer Security Incident Response Capability) for detection of vulnerabilities, reporting on security incident, monitoring, follow-up and provision of recommendations for improving security of Information Systems. Monitoring of ESTAT environment. Output(s): • Receipt and analysis of logs coming from all ESTAT IT systems with Splunk. Penetration tests.	Process
11	[BusArc] Business Architect in the Directorate *NEW* Description: Coordinate and deliver modernisation projects in the production environment of macroeconomic statistics. Output(s): • Analysis and optimisation of the business functions. • Support to production units to develop and implement modernisation projects in the production environment.	Process
11	[COOL] Corporate Orchestration and Overview Layer *NEW* Description: The COOL project suggests developing a universal statistical production architecture and related services. The architecture is composed of independent services, following the SOA (Service-Oriented Architecture) principles expressed in the Statistical Production Reference Architecture (SPRA). The new architecture will facilitate a higher level of automation and an overall more transparent and stable production process with significantly lower maintenance costs. Output(s): • Target architecture for a new way to do statistical production based on flexible use of services. • Implementation of new approach in HICP (Harmonised Indices of Consumer Prices). • Planning for roll-out to other production teams in the Directorate.	Project (2018-2020)
11	[794] Methodological Support Big Data Description: The use of big data for official statistics is a very new topic for statistical services. Skills related to computer science, statistics and domain specific knowledge are required to successfully perform projects in this domain. New methods for data analysis, processing and management have to be applied. There is a lack of data scientists in statistical offices. This lack should be compensated using contracts on methodological support for Big Data projects internal to Eurostat. Use of big data sources requires additional supporting actions like implementation of strategies on skills, communication, legislation or IT infrastructures. Output(s): • Implementation of communication strategy for big data and official statistics. • Implementation of skills strategy. • Implementation of IT infrastructure strategy.	Project (2018-2020)

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
11	<p>[BIGD] ESS Vision 2020 BIGD & Smart Statistics</p> <p>Description: In the Scheveningen Memorandum (27/09/2013), the DGINS called for a Big Data Action Plan and Roadmap (BDAR) to follow up its implementation. The BDAR 1.0 was adopted by the European Statistical System Committee on 26/09/2014 and contains a list of actions for achieving the long-term goal of integrating big data sources into official statistics' production. Smart Statistics will analyse the technological foundations of the statistical and information system of 2025 which will operate within an enlarged digitisation of our societies and greater interactions between the web, the web of data and a multitude of smart environments (Internet of Things (IoT), smart cities, industry 4.0, etc.). The project will be based on proofs of concept that were developed as part of the feasibility study in 2017 in specific areas of smart environments, such as energy, transport, employment, health, population, economics, consumption, etc.). Particular attention will be paid to the blending of traditional core survey instruments and sources (Labour Force Survey, Statistics on Income and Living Conditions, Health, etc.) with big data.</p> <p>Output(s): • Launch of pilots on big data and official statistics. • Launch of pilots related to smart environments. • Conditions of integration of big data and smart environments into smart statistics. • Conditions of access and use of big data sources. • Cross-sectional work on methodology, quality, IT infrastructure and dissemination. • Workshop on Big Data. • Implementation of successful pilots from 1st round of Big Data pilots (2017-2018).</p>	Project (2014-2022)
11	<p>[ADMIN] ESS Vision 2020 project on administrative data sources (ADMIN)</p> <p>Description: The ADMIN project is a coordinated set of actions aiming to support Member States in using administrative data sources without compromising output quality.</p> <p>Output(s): • Access to and development of data sources (reports, best practices and recommendations, preparation of long-term EU actions on improving access). • ESSnet on quality of multisource statistics. • Combining administrative sources and surveys using modelling and estimation methods. • Development of quality standards for statistical frames for social statistics. • Pilot and implementing actions in Member States.</p>	Project (2012-2019)
11	<p>[ESBRs] European System of Interoperable Business Registers (ESS Vision 2020 ESBRs)</p> <p>Description: Development of the Business Architecture and the interoperability framework for the ESBRs with a direct focus on measurable quality improvements of the EGR for its users to improve the consistency and quality of business statistics.</p> <p>Output(s): • Interoperability Framework business model established. • Pilot testing by some Member States of a subset of the interoperability tools for the system of SBRs (Statistical Business Registers) prepared. • Proposal of specifying selected statistical services. • Workshops for dissemination of the ESBRs results. • The implementation of the Roadmap for the ESBRs Business Architecture is started.</p>	Project (2013-2019)
11	<p>[EGR(IT)] EuroGroup Register (EGR) - testing</p> <p>Description: The EGR applications are tested and then put into production.</p> <p>Output(s): • EGR applications tested and out into production.</p>	Project (2017-2020)
11	<p>[EGR] Business registers - coordination and monitoring; EuroGroup Register (EGR) - production</p> <p>Description: Business register coordination and monitoring; EGR data production.</p> <p>Product(s): • [EGR] Aggregated statistics based on EGR.</p> <p>Other output(s): • National business register coordinated and monitored; regular EGR data produced.</p>	Process
11	<p>[CollEconPlatf] Collecting Data and Compiling Statistics on the Collaborative Economy</p> <p>Description: The aim of the project is to start a regular production of statistics on the collaborative economy and to improve the quality of existing data collections. The aim is also to tackle several long term strategic issues related to the production of official statistics in an increasingly digitised world: An efficient collection of basic data from owners of private data (Collaborative Economy Platforms) and exploring new ways of collaboration with NSIs. This project supports the policies under the Digital Agenda and the Digital Single Market. The statistical domains affected include national accounts, business- and labour market statistics. Some attention will be paid to tourism statistics.</p> <p>Product(s): • [NAMA] Annual national accounts. • [Tran-Ind] Transport indicators. • [GVC-Ind] Globalisation indicators. • [SBS] Structural Business Statistics. • [TourAcc] Tourism industry - accommodations. • [ISocEnt] Information society - enterprises. • [ISocHI] Information society - households and individuals*.</p> <p>Other output(s): • Defining new statistics to be produced. • Agreeing on statistical methodology. • Setting up new data collection systems in corporation with NSIs. • Developing new IT infrastructure.</p>	Project (2017-2019)

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
11	<p>[INTRASTAT] Implementation of a redesigned and modernised Intrastat system following the ESSC orientation on the results of the ESS Vision 2020 projects REDESIGN and SIMSTAT</p> <p>Description: This project will implement the redesign of the Intrastat system in accordance with the orientation taken by the ESSC in May 2016, which includes a set of enabling measures organised around 9 work packages: new legal provisions and methodological guidelines in the context of FRIBS, enhancement of innovative compilation methods and of the quality monitoring, implementation of a new data source (of the Intra-EU micro data exchange) in the statistical production process with the necessary accompanying measures on confidentiality and security, Administrative Burden Reduction initiatives, communication at European and national level, globalisation and evaluation.</p> <p>Output(s): • FRIBS (Framework Regulation Integrating Business Statistics) basic act incorporating new legal provisions on the modernised Intrastat system, draft implementing and delegated acts, progress reports on the work carried out under the various themes.</p>	Project (2017-2020)
12	<p>[CoE-SDC] Centre of Excellence on Statistical Disclosure Control (ESSnet)</p> <p>Description: Development and maintenance of methodology for statistical disclosure control, incl. tools and methods for tabular and micro-data protection.</p> <p>Output(s): • New governance structure for SDC (Statistical Disclosure Control) tools implemented. • New Statistical Disclosure Control functionalities.</p>	Project (2014-2020)
12	<p>[DAS] Data as a Service *NEW*</p> <p>Description: The Data as a Service project will pursue three main objectives: • improving the accessibility of Eurostat's data for analytical purposes. • improving access to microdata for research purposes. • strengthening Eurostat's position within the Commission as a provider of statistical analysis services.</p> <p>Output(s): • Deployment of cross-domain data integration platform. • Pilot implementation of a metadata-linking layer to enhance discoverability (based on the outcomes of the related pilots in the inception phase). • Introduction of data analytics and data discovery services within Eurostat. • Deployment of confidentiality-on-the-fly software for the regular production of statistical tables in at least one domain.</p>	Project (2017-2020)
12	<p>[DIGICOM] ESS Vision 2020 DIGICOM</p> <p>Description: Execution of DIGICOM project in line with project plan.</p> <p>Output(s): • User survey based on user profiling exercise. • Shared visualisation tools. • Steps towards implementing the LOD (Linked Open Data) strategy, incl. standards. • Development of statistical literacy products. • Promotion campaign in following-up on the results of the branding study.</p>	Project (2015-2020)
12	<p>[SDC(CoE)] Centre of Excellence on Statistical Disclosure Control</p> <p>Description: Development and maintenance of methodology for statistical disclosure control, incl. tools and methods for tabular and micro-data protection.</p> <p>Output(s): • Support, development and maintenance of statistical disclosure control tools. • Improving micro-data access opportunities for the research community.</p>	Process
12	<p>[SDCMA] Statistical confidentiality and microdata access</p> <p>Description: (1) Management and coordination of statistical confidentiality in Eurostat and within the ESS. (2) Methodological support on statistical disclosure control (3) Ensure smooth provision of access to confidential data for scientific purposes.</p> <p>Output(s): • Co-ordination of statistical confidentiality. • Support on statistical disclosure control provided. • Continuously improved access to microdata for researchers and provision of PUFs (public use files).</p>	Process
12	<p>[412] Eurostat website</p> <p>Description: The website provides a stable access to Eurostat products and services, with enhancements for users. Evolutionary maintenance and quality assurance of the website, including purchases of hardware and software.</p> <p>Output(s): • Make ESTAT website an attractive and easy source of information on European statistics for citizens. Ensure high availability, performance and continuous improvements of functionality, usability and web content.</p>	Process
12	<p>[421] Publications</p> <p>Description: Widespread dissemination of Eurostat's value-added output through electronic and paper publications. Production, dissemination and archiving of statistical publications, including the implementation of the annual publications programme.</p> <p>Output(s): • Full range of publications oriented to users' needs, all available via the website. Small number of printed and cross-cutting publications, including two flagship publications. Editorial services offered to the production units.</p>	Process
12	<p>[612] Management of external users support network</p> <p>Description: Management of contracts for all external users support centres; coordination of the network and participation in the quality control.</p> <p>Output(s): • Management of contracts for all external users support centres; coordination of the network and participation in the quality control.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
12	<p>[613] Promotion of European statistics Description: Production and development of different communication and promotional tools about Eurostat and European statistics. Output(s): • Production and dissemination of communication tools (posters, postcards, calendars ...). • Organisation of joint (Eurostat/NSI) events to promote European statistics to users.</p>	Process
12	<p>[745] Continuous adaptation of dissemination products and services to user needs Description: Engage with users of European statistics in order to better identify their needs. Production of (shareable) visualisation tools/info graphics strengthening the user-orientation of Eurostat website. Development of dissemination products which enable users to obtain statistics on a range of mobile devices, including smartphones, tablets and e-readers. Output(s): • In the frame of the DIGICOM project, conduct a user profiling exercise and set-up a social network platform for communicating with users of European statistics. • Innovative shareable visualisation tools/info graphics on Eurostat website and dissemination products for mobile devices. • Release of a new ESS multi-media product on the EU.</p>	Process
12	<p>[StatExpl] Statistics Explained Description: Maintenance, further development and content management (including translation) of the on-line dissemination system "Statistics Explained". Output(s): • Wide range of explanatory information and analysis is continuously updated and delivered to users through an on-line dissemination system. • A new section of Statistics Explained will be dedicated to basic users. This section will aim at making statistics understandable for people having limited knowledge in the domain (such as students at secondary school). It will be developed in the frame of the DIGICOM project on statistical literacy after consultation of the ESS members in order for them to possibly re-use it.</p>	Process
12	<p>[402] Manage and improve the Reference environment for dissemination. Description: Daily management of the Reference environment for dissemination including: • Improve the quality of data presentation. • Maintain and monitor the data navigation tree (EN, FR, DE). • Create and maintain the derived tables, including EU policy indicators. • Implement and maintain code lists (EN, FR, DE). • Contribute to the definition of data structures and standard code lists. • Contribution to the code lists' management. • Supply statistical support to other EC DGs. Output(s): • Central data production and dissemination services provided for European and other statistics. • Further harmonised and unified data structure and code lists.</p>	Process
12	<p>[403] Manage the production, dissemination and standardisation of European Statistical System reference metadata Description: Manage the production, dissemination and standardisation of ESS reference metadata using ESMS (Euro SDMX Metadata Structure), ESQRS (ESS Standard for Quality Reports Structure) and EPMS (Euro Process Metadata Structure); maintain and improve the ESS Metadata Handler; manage the content of the Euro SDMX (Statistical Data and Metadata Exchange) Registry; provide reference metadata services to other DGs of the European Commission. Output(s): • Central ESS metadata production and dissemination services provided (including SDMX Registry services). • Standards Working Group. • Metadata Task Force.</p>	Process
12	<p>[611] Rationalise the purchases of external databases Description: This process contains: to rationalise the purchases of external databases within the European Commission. Output(s): • Coordination services provided with regard to the purchases of external databases for the European Commission. • Availability of framework contracts.</p>	Project (2014-2020)
12	<p>[697] Regular update and enrichment of Basext Description: This process includes maintenance, improvement and further development of data and metadata disseminated in Basext (Statistical portal of International data and metadata). Output(s): • Provision of service "Dissemination of other statistics through Basext".</p>	Process
12	<p>[ITSEC-MGT] Information Security management Description: Follow-up of Eurostat Information Security Policy. Use of secure emailing, access rights, protection of information, implementation of security standards, liaise with DG HR/DS and DIGIT. Output(s): • Communication on security aspects. Information and awareness of security matters to ESTAT staff. • Management and update of ESTAT Information Security Policy. Report on security standards implementation. Development of security notices for the policy implementation. • Management of access rights, encryption mechanisms and passwords for the following applications: SECER, RUE, LANCRYPT, NOAH, WINPT/WINPG, security conventions, tokens, specific access rights. • Monitoring and improvement of security of IT systems, screening and checking of BIA (business impact assessment) and Security plans. • Follow-up of security of ESTAT environment hosted in DIGIT.</p>	Process
12	<p>[ITSEC-REC] Making confidential data available to researchers for scientific purposes Description: Ensure access to confidential data for researchers either through the Eurostat Safe Centre or through the development of a secured remote access facility. Output(s): • Availability of the Eurostat environment for remote access to confidential data for researchers. • Management of Eurostat Safe Centre: Usage report.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/Process
12	[501] European Statistical System report Description: Preparation of the annual report of the European Statistical System. Output(s): • Publication of the annual report of the ESS.	Process
12	[502] Internal communication to Eurostat staff Description: Internal communication to Eurostat staff using a variety of channels, such as the intranet, Eurostat Infos or meetings; relations with the Commission Communication Network. Output(s): • Intranet up-to-date. • Publication of several news items each day. • Publication of several issues of Eurostat-Infos, the Eurostat newsletter. • Organisation of several informal staff meetings with senior management. • Reporting of Eurostat SOS results.	Process
12	[504] Media relations and related activities Description: Press office activities such as preparation and dissemination of news releases, news items, factsheets and infographics, preparation and organisation of press briefings, preparation of LTTs (lines to take) on sensitive issues, preparation and validation of interviews with top management, relations with the spokesperson service and the Commission Communications Network. Output(s): • Publication of around 200 news releases in three languages. • Publication of around 200 other news items on the website in EN. • Publication of several factsheets and infographics. • Press briefings and interviews, if and when appropriate. • LTTs upon request.	Process
12	[614] Media, institutional and user support Description: Support for users from the media, the institutions and the public. Output(s): • Answering user requests from media, EU institutions and the public. • Providing training for media and institutional users on Eurostat and its data as required.	Process
12	[802] Social media Description: Dissemination of Eurostat output via social media; relations with the Commission social media network. Output(s): • Regular dissemination of latest statistics via Twitter and Facebook.	Process
12	[803] Vision newsletter Description: Preparation of the quarterly vision newsletter. Output(s): • Publication of 4 editions of the vision newsletter.	Process
13	[EMOS] VIP - European Master in Official Statistics Description: Implementation of European Master in Official Statistics (EMOS) in university Master programmes in collaboration with national statistical offices. Output(s): • Implementation of EMOS labelling and development of the EMOS network: secretariat to the EMOS Board meetings, EMOS Workshop, cross-border learning activities, and evaluation of EMOS.	Project (2012-2019)
13	[ESTP] European Statistical Training Programme Description: Design and implementation of the European Statistical Training Programme (ESTP) in Member States, including programme coordination, contract management and follow-up of courses. Output(s): • Around 45 courses organised in Member States, European Free Trade Association (EFTA) and Eurostat for European Statistical System (ESS) staff.	Process
13	[RESEARCH] Research and innovation in official statistics Description: (1) Support and promote research in official statistics. (2) Develop/support the research lines related to Official Statistics in the Horizon 2020 work programmes. (3) Dissemination modernisation and research project results. (4) Support to collaboration between researchers and official statisticians. Output(s): • Preparation of NTTS (New Techniques and Technologies for Statistics) 2019 conference. • Research lines related to Official Statistics in the Horizon 2020 work programme. • Support and maintenance for CROS (Collaboration in Research and Methodology for Official Statistics). • Support to research projects on official statistics.	Process
14	[DGINS] DGINS Conference Description: Organise the DGINS Conference, in collaboration with the host country. Output(s): • Annual conference with host country.	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/Process
14	<p>[ESSweb] Manage the European Statistical System Website Description: Publication of news and information about the activities of the European Statistical System (ESS) and its partners; exchange of knowledge and best practices among members of the ESS, with the aim to develop the ESS website as a space for the ESS community and to improve the communication among members and the image of the ESS and European statistics. Output(s): • Annual report, presentations to the Dissemination Working Group, weekly email to ESS mailing list.</p>	Process
14	<p>[HIC] Manage the cooperation with EEA/EFTA countries, Switzerland and Higher Income Countries in the statistical domain Description: Implementation of specific agreements and Memoranda of Understanding, promote cooperation. HIC included are: Brazil, India, Colombia, Mexico, Chile, South Korea, Russia, Canada, US, Australia, New Zealand, Japan, Colombia and Costa Rica, as well as GCC-Stat and CIS-STAT. (EEA = European Economic Area, EFTA = European Free Trade Association, GCC-Stat = Statistics Centre of the Gulf Cooperation Council, CIS-STAT = Statistical Committee of the Commonwealth of Independent States). Output(s): • Memoranda of Understanding and specific agreements, activities related to the implementation of roadmaps.</p>	Process
14	<p>[IO-manage] Manage and coordinate Eurostat's relations with international organisations and bodies (UN family, WTO, OECD, ISI...) Description: Management of relations, exchange of information, support to EU Delegations and other Commission services, participation in meetings, establishment of specific agreements, monitoring of the financial contribution to international organisations, support to implementation of National Strategies for the Development of Statistics (NSDS). Manage and coordinate Eurostat's relations with the European System of Central Banks and implement the Memorandum of Understanding between the European Statistical System (ESS) and European System of Central Banks (ESCB). Output(s): • Management and coordination of relations, exchange of information, support to EU Delegations and other Commission services, participation in meetings, establishment of specific agreements, monitoring of the annual financial contribution.</p>	Process
14	<p>[IO-secr] Provide the secretariat for international bodies and committees Description: Provide the secretariat for ESSC, ESGAB, ESAC, PG and IRWG, as well as the ESF and its Bureau, and manage the relations with these international bodies. (ESSC=European Statistical System Committee, ESGAB=European Statistical Governance Advisory Board, ESAC=European Statistical Advisory Committee, PG=Partnership Group, IRWG=International Relations Working Group, ESF=European Statistical Forum). Output(s): • Meetings and respective formal reports, opinions of the bodies, coordination of the EU position in international fora.</p>	Process
14	<p>[228] Support the development of the statistical system in Greece through the provision of technical assistance in selected areas of statistics Description: Support the development of the statistical system in Greece through the organisation and management of technical assistance activities in the areas of public finance statistics, project management and selected statistical domains. Output(s): • Quality of Greek statistical data improved.</p>	Project (2010-2020)
14	<p>[230] Coordinate, design, contract, implement and follow-up cooperation programmes for the Enlargement countries Description: Coordinate, design, contract, implement and follow-up cooperation programmes for the Enlargement countries to assist the alignment of their statistical production with the EU acquis. Output(s): • 2017 IPA (Instrument for Pre-Accession Assistance) statistical cooperation programme contracted. • Contributions to the National IPA programmes provided to ensure that the programmes address relevant EU acquis and are well coordinated with regional cooperation programmes. • Objectives of the IPA 2014 cooperation programme achieved and availability of data increased. • Implementation of the 2015 IPA programme ongoing. • Memorandum of Understanding and corresponding annexed SLA (Service Level Agreement) with DG NEAR updated when necessary; Semi-annual IPA activity reports drafted and submitted to DG NEAR. • Semi-annual and end year reports on the SLA provided to DG NEAR in the framework of the Annual Activity Report. Other financing DG(s): NEAR.</p>	Process
14	<p>[233] Assess and monitor the statistical systems in the enlargement and European Neighbourhood Policy countries Description: Monitor the statistical systems in the Enlargement and European Neighbourhood Policy (ENP) countries using different assessment instruments (global assessments, peer reviews, sector reviews, compliance monitoring database, Eurostat annual programming missions). Output(s): • A yearly monitoring report on the implementation of the GAs and PRs recommendations is available. • Assessment reports from Global Assessments (GA) and peer reviews (PR) are available for selected enlargement and ENP countries. • Mission reports available for the visited countries. • Sector assessment reports for selected statistical domains are available for some enlargement and ENP countries. • 2018 compliance monitoring round conducted and Statistical Management Information System (SMIS+) (acquis compliance) reports available for the enlargement countries. • New methodology for global assessments in the EECCA (Eastern Europe, Caucasus and Central Asia) countries and for peer reviews in the enlargement countries implemented.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/ Process
14	<p>[234] Coordination of statistical cooperation</p> <p>Description: Support and promote coordination of statistical cooperation activities for the enlargement and European Neighbourhood Policy (ENP) and Central Asia countries through donor coordination, organisation of meetings on statistical cooperation and a newsletter on cooperation news.</p> <p>Output(s): • Annual donor coordination survey for the enlargement, European Neighbourhood Policy East and South and Central Asia countries implemented and results presented to the Management Group on Statistical Cooperation. • Working group meeting on statistical cooperation (MGSC) successfully held and key decisions on cooperation taken. • Quarterly newsletter on statistical cooperation published.</p>	Process
14	<p>[236] Support the EU enlargement policy</p> <p>Description: Support the EU enlargement policy through participation in sub-committee meetings under the Stabilisation and Association / European Agreements, following-up on commitments on chapter 18 from the negotiation process, contributing to the annual EU reports on the enlargement countries.</p> <p>Output(s): • Input to sub-committees provided and meetings attended. • Input to the annual EU reports on the enlargement countries including the statistical annex provided to DG NEAR. • Negotiations on the statistics chapter with Montenegro pursued.</p>	Process
14	<p>[238] Cooperation programme to improve statistics in the European Neighbourhood Policy East countries</p> <p>Description: Transform the long-term strategy to improve statistics in the European Neighbourhood Policy (ENP) East region into a cooperation programme as a basis for Financing Decision, taking into account available funds.</p> <p>Output(s): • Proposal for a regional programme for statistical cooperation accepted and tendered.</p>	Project (2013-2018)
14	<p>[250] Support the implementation of the European Neighbourhood Policy</p> <p>Description: Support the implementation of the European Neighbourhood Policy (ENP) through input to EU progress reporting, to the Association Agendas/Association Agreements/other political agreements, to sub-committee meetings and through promoting the importance of statistics for evidence-based decision making for European policies (monitoring and design).</p> <p>Output(s): • A section on statistics included in each political agreement negotiated. • Input to sub-committee meetings provided and meetings attended. • Input to the reporting on the ENP provided to the European External Action Service (EEAS) including the statistical annex. • Input to the Association Agendas provided to the EEAS. • Provision of statistical data for policy purposes ensured.</p>	Process
14	<p>[251] Support to other Commission services in the design and implementation of European Neighbourhood Policy cooperation programmes with relevance for statistics</p> <p>Description: Support other Commission services in the implementation of technical assistance programmes in the European Neighbourhood Policy (ENP) region - Medstat IV, SEIS, EU4ENERGY - through advice on statistical issues in technical assistance programmes of different kinds (regional or national) with a view of obtaining statistical data in these areas.</p> <p>Output(s): • Advice provided on the implementation of the Medstat IV programme. • Advice provided on other assistance programmes (e.g. EU4ENERGY) for the ENP countries resulting in new statistical data. • Technical assistance provided to the ENP East countries on the Shared Environment Information System (SEIS) programme with a particular emphasis on waste statistics. • Contribution to assistance programmes provided in the ENP countries, such as on twinning projects and others resulting in improved availability and quality of data.</p> <p>Other financing DG(s): NEAR.</p>	Process
14	<p>[252] Support to other Commission services in the design and implementation of cooperation programmes with relevance for statistics in non-EU countries</p> <p>Description: Support the design and implementation of cooperation programmes through provision of technical advice on statistical matters.</p> <p>Output(s): • Technical advice to the EC, European External Action Service and EU Delegations on statistical cooperation with Africa, Asia, Latin America and Caribbean countries provided. • Statistics included in the agenda of EU political dialogues with third countries and regions (e.g. ASEAN (Association of Southeast Asian Nations), ASEM (Asia-Europe Meeting), African Union, etc.).</p> <p>Other financing DG(s): DEVCO.</p>	Process
14	<p>[256(IT)] Support to production and dissemination of statistics - IT part</p> <p>Description: IT tools and support for production and dissemination of statistics on non-EU third countries and regions.</p> <p>Output(s): • Tools for statistical production (ERETES, EUROTRACE) maintained. • Helpdesk function maintained.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/Process
14	<p>[256] Support to production and dissemination of statistics</p> <p>Description: Support the increased utilisation of statistical and cooperation tools by NSIs and organisations providing technical assistance (donors) through promotion, training, user-friendly dissemination and the visibility of statistics on non-EU third countries and regions through the website and publications.</p> <p>Output(s): • Training on Eurostat cooperation tools implemented. • Publications produced (e.g. EU-AU (European Union-African Union) Yearbook, leaflets and statistical books. • Training on Eurostat IT tools implemented.</p>	Process
14	<p>[263] Support third countries and their regional organisations to implement their policies and strategies</p> <p>Description: Support the strengthening of the statistical systems in third countries and their regional organisations through capacity building measures, provision of advice and the promotion of regional models of working like the European Statistical System (ESS).</p> <p>Output(s): • Regional cooperation promoted and facilitated, by sharing experiences of the ESS model of working. • Statistical capacity building of ASEANstat (Statistical Office of the ASEAN secretariat) supported through provision of advice. • Statistical capacity of the African Union Statistics Division strengthened. • ESS values and initiatives promoted during visits and the study week at Eurostat.</p>	Process
14	<p>[660(IT)] Information on European standards in statistics - IT part</p> <p>Description: • Maintenance and development of the SMIS+ compliance monitoring tool. • SMIS+ evaluation reports produced. (SMIS+ = Statistical Management Information System +).</p> <p>Output(s): • Functioning and further development, as necessary, of SMIS+ ensured.</p>	Process
14	<p>[660] Information on European standards in statistics</p> <p>Description: Collect information on legal acts, data requirements and methodology for the entire statistical acquis. Prepare for launching, processing, finalising and monitoring the compliance of the statistical systems of enlargement countries with EU statistical acquis.</p> <p>Output(s): • Statistical Requirements Compendium updated. • SMIS+ (Statistical Management Information System +) evaluation reports produced. • SMIS+ (Statistical Management Information System +) upgraded.</p>	Process
14	<p>[661] Implementation of cooperation strategies</p> <p>Description: Support the implementation of statistical cooperation strategies for the different European Neighbourhood Policy (ENP) regions through the panel on statistics for the ENP East countries, the implementation of training courses and meetings on European Statistical System values.</p> <p>Output(s): • Regional programmes for the ENP countries tendered. • A workshop/working group meeting on quality for the ENP South countries successfully organised and the European Statistical System quality framework promoted. • Annual meeting of the Principal National Coordinators of the ENP South countries organised and FORUM meeting prepared. • Meetings of the panel on statistics organised for the ENP East countries. • New schedules for ENP East panels and workshops designed. • New schedule for seminars and workshops for the ENP South countries designed. • New training programme for the ENP South countries designed. • Seminars and workshops on EU statistical acquis successfully held, knowledge transferred and more and better quality data available. • Three training courses on key statistical issues held for the ENP South countries. • Two training courses on key statistical issues held for the ENP East countries.</p>	Process
14	<p>[662] Management of high level seminars and meetings with the enlargement and European Neighbourhood Policy countries to promote strategic discussions</p> <p>Description: Organisation and management of high level meetings and seminars for the enlargement and European Neighbourhood Policy (ENP) countries to stimulate strategic discussions, promotion of European Statistical System initiatives and increased availability of good quality data.</p> <p>Output(s): • FORUM meeting for the ENP South countries successfully held with key management and cooperation issues decided. • High level seminars for the ENP East and Central Asia countries successfully held with key management and cooperation issues decided. • Key documents from the high level meetings and seminars as well as other methodology documents and guidelines available in Russian and if necessary, in other EU languages. • Policy Group meeting (PGSC) organised and strategic conclusions defined for the enlargement countries. • Strategic information meeting held for the DGs of the NSIs of the enlargement countries.</p>	Process
14	<p>[663] Management of high level seminars and meetings with the countries of Africa, Asia, Latin America and Caribbean to promote European Statistical System values</p> <p>Description: Organisation and management of seminars and high level meetings for African, Asian and Latin American countries to promote the regional cooperation model such as the European Statistical System (ESS), to facilitate regional cooperation and to encourage the application of ESS values such as the CoP (Code of Practice) and quality management systems.</p> <p>Output(s): • A High level seminar for Latin American countries successfully held and ESS values on quality promoted. • High level seminar for Asian countries successfully held and ESS values on quality promoted. • New schedule for high level seminars with African/Asian and Latin American countries designed.</p>	Process

P.A.	Activities: [Code] title, description, plus their statistical products and/or other outputs and, if applicable, the flag *NEW* and the list of other financing DGs (for the full description of the statistical products, see the ad hoc Catalogue)	Project/Process
14	<p>[732] Coordinate, implement and follow-up the pan African statistical cooperation programme</p> <p>Description: Implementation of the first tranche of the pan African statistical cooperation programme and preparation of the second phase (design and coordination with DG DEVCO).</p> <p>Output(s): • Activities such as workshops, training, support to the setup of the African statistical institute implemented. • The Service level agreement with DG DEVCO updated (when necessary). • End of year report prepared for DG DEVCO in the framework of the Annual Activity Report. • Smooth implementation of the Pan African Statistics (PAS) ensured and deliverables provided and checked. • Requests from DG DEVCO met on time (new action fiche designed).</p> <p>Other financing DG(s): DEVCO.</p>	Process
14	<p>[CPC-ENP] Statistics on enlargement (Candidate and Potential Candidates) and ENP countries</p> <p>Description: Collection of statistical data from the enlargement and European Neighbourhood Policy (ENP) countries for the purpose of the statistical annexes to the EU reports on the enlargement and EN policy and for publications of leaflets and the pocketbook.</p> <p>Product(s): • [CPC-ENP] Enlargement and ENP-East and South countries.</p> <p>Other output(s): • Report on the inclusion of data from enlargement countries into Eurostat database produced. • Public website on cooperation issues updated. • Data available in Eurobase for enlargement and ENP countries. • Publications on enlargement and ENP countries available.</p>	Process
14	<p>[212] Commitments on Confidence in Statistics</p> <p>Description: Support Member States towards the establishment of Commitments on Confidence in Statistics to maintain confidence in European statistics and to maintain or improve the implementation of the European Statistics Code of Practice as laid down, from June 2015, in Regulation (EC) No 223/2009 on European Statistics. The aim of this project is to ensure establishment of the Commitments by Member States, or their submission of progress reports on efforts undertaken toward the establishment, in accordance with Article 11 of Regulation (EC) No 223/2009, with a view to the implementation of the enhanced ESS governance framework.</p> <p>Output(s): • Commitments on Confidence signed by all Member States as well as EEA/EFTA states.</p>	Project (2015-2018)
14	<p>[Eurotrace] Eurotrace implementation, maintenance and user support</p> <p>Description: Evolutive maintenance of and user support for Eurotrace, an open source statistical software for statistical data treatment and management, currently used by around 80 non EU countries, including EU Candidate Countries.</p> <p>Output(s): • Enhanced version of the Eurotrace open source software and user support.</p>	Process
